Phone : +91 9840596873

PROFILE SUMMARY

Implementation Enginner with 3+ years of experience in product support and backend automation at Cognizant Technology Solutions and PayTabs Global. Expertise in troubleshooting production issues, test automation using Newman/Postman, root cause analysis, SaaS ticket management, cloud technologies (Azure, Red Hat OpenShift), and database optimization. Proven track record in troubleshoot complex technical issues, maintain high availability of critical applications, and improve service delivery. .

KNOWLEDGE PURVIEW

- Software Development Lifecycle Management
- Data Analysis
- Database Management
- Requirement Gathering
- Technical Documentation
- Incident management
- Cloud Technology
- Change management
- Coding and Scripting

WORK EXPERIENCE

Paytabs Global as Implementation Engineer, Chennai
May 2025 - Present
Role:

- Resolved SaaS Incident tickets within SLA, categorizing by projects for faster resolution and backtracking, boosting customer satisfaction and team turnaround time.
- Automated 139 MEPS test cases with Newman (100% success rate) slashing manual testing from 2-3 days (~1200 minutes) to 4-8 minutes per cycle, enabling faster releases and 93-96% efficiency gains.
- Conducted RCA on recurring Mercury production issues, sharing insights with support team to reduce incoming tickets and improve system stability; prototyped AI agent for multi-file log analysis to aid daily production support.
- Supported BijliPay deployments by developing executable setups, mentored new team member on processes, and guided QA team on automation, ensuring smooth onboarding and consistent operations.
- Collaborated with infra team on production deployments for validation, minimizing downtime and ensuring error-free releases

Cognizant Technology Solutions as Jr. Software Engineer, Chennai
June 2022 - Nov 2024
Role:

- Monitored and optimized operational efficiency of application servers and databases on Red Hat OpenShift and Azure platforms, ensuring uninterrupted service delivery leading to high availability across all critical applications.
- Ensured compliance with SLAs by regularly analyzing system performance metrics and maintaining robust documentation processes, which resulted in a 15% improvement in overall service delivery timelines across platforms. Developed simplified processes for managing service tickets related specifically to bug fixes; directly decreased resolution time by approximately 4 hours per ticket while ensuring adherence to SLA compliance standards.
- Coordinated efforts across engineering and product teams focused on optimizing application features; implemented enhancements which resulted in an average of 30 service tickets resolved per week due to improved functionality.
- Deployed and managed Java applications with scheduled jobs on Red Hat OpenShift and Microsoft Azure, leveraging cloud-native scheduling capabilities.
- Configured fixed-rate, fixed-delay, and cron-based schedules within Java applications to meet specific business requirements for recurring operations

IT SKILLS

- **Programming Languages:** Java
- **Database scripts**: MS SQL
- **Tools:** Oracle SQL Developer, Microsoft SQL Server IntelliJ, Postman, AppDynamics, Grafana, ServiceNow, JIRA
- **Version control:** GitHub
- **Cloud Platforms**: Red Hat OpenShift, Microsoft Azure
- **OS Commands:** Unix
- **API protocol:** REST API

EDUCATION

- Bachelor of Engineering (Mechanical) from Sri Sairam Engineering College, Tambaram, Chennai, Aug 2018 - May 2022
- 12th from Vyasa Vidyalaya Metric Higher Sec. School, Adambakkam, Chennai, Jun 2016 - Jun 2018
- 10th from D.A.V School, Adambakkam, Chennai, Jun 2015 - May 2016

PERSONAL DETAILS
