DHAVAL KORADIYA

SENIOR DEVELOPER

Mobile: +91- 9033403889 Email: koradiyadhaval@gmail.com Linkedin: https://www.linkedin.com/in/dhaval-k-09924374/

Demonstrate a commitment to excellence as a Mobile App Developer, bringing forth 13 years of extensive experience in mobile application development, particularly in Android native and React frameworks. Seeking opportunities to leverage this expertise within innovative tech companies.

Profile Summary

Motivated Mobile App Developer with 13 years of experience, specializing in Android Native (8 years) and React Native (5 years). Strong expertise in Android Studio, Core Java, Kotlin, JavaScript, TypeScript, ReactJS, Node.js, Axios, Redux Toolkit, Context API, Firebase Notifications, Google Maps API, and Background Synchronization. Proficient in building scalable, user-focused applications, optimizing performance, and delivering innovative features across mobile and web platforms. Adept in team leadership, Agile environments, and end-to-end product development.

Competencies

User Experience Design
Quality Assurance Processes
Data Analytics Interpretation
Agile Development Methodologies
Mobile App Security
Market Research Analysis
Product Development Lifecycle
Cloud Computing Integration

Work Experience

Jun 2024 – Aug 2025: ERS LABS – Sr. Developer (Android & React Native), Hyderabad (Remote)

- Built and maintained **Android, iOS, and cross-platform apps** using React Native, React.js, Angular, TypeScript, JavaScript, and ASP.NET Core.
- Implemented background sync, optimized APIs, and integrated **Firebase, Google Maps, push notifications, and Redux**, improving performance and retention.
- **Recommended upgrades to legacy products** based on new technology trends, ensuring long-term scalability and competitiveness.
- Partnered with UI/UX designers and product managers, **suggesting enhancements to improve user experience** and product usability.
- Mentored junior developers and conducted **code reviews**, ensuring high-quality, maintainable deliverables.
- Designed secure backend services with **ASP.NET Core & PostgreSQL**, ensuring reliable integration with mobile and web apps.

Apr 2022 – Sep 2023: IBS Software – Developer Lead (ReactJS & React Native), Bengaluru (Remote)

- Managed a development team, balancing leadership and hands-on coding.
- Conducted R&D in ReactJS and React Native to drive feature innovation.
- Spearheaded integration of background services and performance optimization.

Jul 2020 – Oct 2021: Ace Analytics – React Native & ReactJS Developer, Ahmedabad

- Implemented performance improvement strategies for mobile apps.
- Designed reusable UI components and integrated third-party APIs.

Apr 2019 – Jun 2020: Innvonix Technology – Android Native & React Native Developer, Ahmedabad

- Developed Android applications with Room DB, Firebase, and Kotlin.
- Ensured compliance with standards and delivered optimized apps.

Jul 2016 – Mar 2019: Dubond Infotech – Android Developer (Team Lead), Ahmedabad

- Managed senior-level R&D tasks and mentored junior developers.
- Delivered multiple native apps with Payment Gateway integrations.

Feb 2016 – Jul 2016: Communication Craft – Android Developer, Ahmedabad

- Built Android applications with focus on UI/UX and background services.

Jan 2014 – Feb 2016: Germanium Inc – Android Developer, Ahmedabad

- Resolved critical performance issues and implemented new features.

Freelance Work Experience

Oct 2021 – Mar 2022: Freelancer – React Native Freelancer, Consultant Ahmedabad

- Designed and implemented mobile application features with React Native, delivering a smooth and responsive user interface across Android and iOS.
- Collaborated with backend teams to consume APIs and integrate third-party libraries, enhancing app functionality and reliability.

Sep 2023 – Jun 2024: Freelancer – React Native Freelancer, Consultant Ahmedabad

- Developed and deployed cross-platform mobile and web applications using React Native and React.js, improving user experience and scalability.
- Built and integrated RESTful APIs with Node.js and PostgreSQL, ensuring secure data handling and optimized backend performance.

Education

- **MCA** – GTU Murlidhar Group of Computer Application, Rajkot (2010 – 2013)
- **BCA** – Saurashtra University, Junagadh (2007 – 2009)

Projects

Echo Logistic – Logistics Platform (US & Canada)
Web Product Application- https://www.echo.com/
Android Mobile Application: EchoDrive - Apps on Google Play
IOS Mobile Application: EchoDrive
Role: React Native Engineer

- Built logistics apps for order processing, shipment tracking, and route optimization.
- Integrated 3rd-party APIs to deliver real-time supply chain visibility.
- Designed driver app with **optimized navigation and push notifications** for better delivery efficiency.
  Tech Stack: React Native, Node.js, Google Maps, Firebase
  Impact: Increased shipment tracking accuracy by **35%**, reducing delivery delays.

GuestBook Travlr – Travel & Hospitality Platform
Role: Mobile App Developer

- Developed guest booking application similar to **Airbnb/Booking.com** with smooth search and reservation workflows.
- Implemented **background synchronization** and **custom swipe card UI** inspired by Tinder for booking interactions.
  Tech Stack: React Native, Android Native, Firebase
  Impact: Enhanced guest booking experience, increasing app engagement by **40%**.

GuestBook Host – Property Management App
Role: Mobile App Developer

- Created host-side platform to manage **reservations, availability, and property listings**.
- Integrated notification system for instant booking updates and guest communication.
  Tech Stack: React Native, Firebase, Node.js
  Impact: Reduced host response time by **50%**, improving customer satisfaction.

GuestBook Cleaner – Property Service App
Role: Mobile App Developer

- Built an operational app for cleaners to **schedule, manage, and track property cleaning tasks** after guest checkout.
- Enabled task assignment and real-time status updates for better coordination.
  Tech Stack: React Native, Firebase
  Impact: Streamlined housekeeping operations, cutting delays by **30%**.

Rock Fire – Investment Portfolio Platform (Europe)
Role: Full Stack Developer

- Designed a financial management system with **multi-role support** (individual, joint, and organizational accounts).
- Implemented secure account handling and **role-based access control**.
  Tech Stack: React Native, ASP.NET Core, PostgreSQL
  Impact: Simplified portfolio tracking for investors, improving adoption in target region.

Dancero – Event Management Application
Role: React Native Developer

- Built event creation and booking features including **ticketing, schedules, and booking plans**.
- Integrated **live chat** for user engagement during events.
  Tech Stack: React Native, Firebase, Node.js
  Impact: Improved user retention by **25%** through community-driven interactions.
  🔗 Play Store

Wear Gallery – Media Sharing App (Android & WearOS)
Role: Android Developer

- Developed media-sharing platform to transfer and view images/videos between phone and **WearOS devices**.

- Designed lightweight UI for wearables ensuring **smooth synchronization**.
  Tech Stack: Android Native, Java, Firebase
  Impact: Delivered seamless phone-to-watch media transfer, gaining **10k+ installs**.
  🔗 Play Store

Jobaroot – Job Consultancy Platform (UAE)
Role: React Native Engineer

- Created a **multilingual job portal** (English/Arabic) for candidates and recruiters.
- Implemented **role-based features** for job seekers, employers, and recruiters.
  Tech Stack: React Native, Node.js, Firebase
  Impact: Expanded reach in UAE job market, increasing recruiter engagement by **45%**.
  🔗 Play Store

JMS – Wholesale & Delivery Platform (Australia)
Role: Full Stack Developer

- Built **Client App** for wholesale fruit, vegetable, and nut orders.
- Designed **Driver App** for real-time delivery tracking, order updates, and route optimization.
  Tech Stack: React Native, Node.js, PostgreSQL, Firebase
  Impact: Automated order and delivery process, reducing manual errors by **40%**.

Fitness Tracker – Health & Wellness App (iOS & Android)
Role: Mobile App Developer

- Developed cross-platform app to **track workouts, health stats, and daily activities**.
- Designed **graph-based dashboards** for progress visualization.
  Tech Stack: React Native, iOS, Android, Firebase
  Impact: Increased user retention with **data-driven fitness insights**.
  🔗 Preview

Agrix – Agricultural Support Platform
Role: React Native Engineer

- Built farmer support system to manage **farmer profiles, farms with geo-locations, and expert adviser accounts**.
- Integrated Google Maps for farm location mapping and consultation tracking.
  Tech Stack: React Native, Google Maps, Node.js
  Impact: Improved advisory services for farmers, boosting adoption by **30%**.
  🔗 Preview

Erewhon Internal – Enterprise Supply Chain Tool
Role: Full Stack Developer

- Created internal app for managing **purchase orders, suppliers, and multi-store inventory**.
- Automated approval flows and reporting for better decision-making.
  Tech Stack: React Native, ASP.NET Core, PostgreSQL
  Impact: Improved supplier management efficiency by **25%**.
  🔗 Preview

Learning Time for Mode – Kids Educational App
Role: Mobile App Developer

- Designed gamified quizzes and interactive lessons to make learning fun.
- Integrated progress tracking and parent dashboards.
  Tech Stack: React Native, Firebase
  Impact: Increased user engagement among children with **interactive learning modules**.

Book Application – Flight Reservation System
Role: Full Stack Developer

- Built global **flight booking and reservation system** with real-time availability.
- Integrated airport authority management tools for compliance and operational control.
  Tech Stack: React Native, Node.js, ASP.NET Core, PostgreSQL
  Impact: Improved booking efficiency and authority compliance, reducing errors by **20%**.

Technical Skills

- **Mobile Development:** Android Native (Java, Kotlin), React Native, ReactJS, Expo, Angular
- **Programming & Frameworks:** JavaScript, TypeScript, Node.js, Asp.net, Redux Toolkit, React Hooks, Context API
- **Tools & APIs:** Android Studio, Navigation Graph, Room DB, SQLite, Retrofit, Fresco, Socket.IO
- **Integrations:** Firebase Push Notifications, Google Maps, Google Fit, Apple HealthKit, Background Sync, Social Media Login
- **Payments & Transactions:** Wordpay, PayPal, Google In-App Subscription
- **Other Expertise:** Mobile Security, Cloud Integration, UI/UX Design, Agile Methodologies, Cross-platform development
