EXPERIENCE

Sr. Software Engineer-Test
06/2019 - Present

Truecaller International LLP — Bangalore, India

Leading end-to-end QA strategy and release quality for consumer and enterprise platforms

- Led end-to-end QA strategy for enterprise platforms in a **450M+** MAU ecosystem, improving defect leakage by **~60%** and reducing QA cycle time by **~40%**.
- Owned quality planning across **API, backend, and Android systems in Java,Appium/Selenium,TestNg,REST Assured** supporting a continuous production release cadence.
- Created, reviewed, and executed Test Plans in Android,iOS and Web Automation.
- Drove risk-based testing and early defect discovery in collaboration with stakeholders, aligning quality goals.
- Validated a **hybrid AI-powered Call Assistant and AI Call Scanner** on iOS and Android, testing **call interception, ASR, NLP intent classification (spam/scam/legit), and rule-based decision flows**, with emphasis on accuracy, latency, and user trust.
- Conducted **GenAI/LLM testing for post-call summaries: prompt validation, hallucination checks, multilingual evaluation, data quality validation, AI regression testing**. Ensured high-risk decisions were deterministic and compliant.
- Developed and maintained **robust automation frameworks**, enhancing regression accuracy and release confidence.

Lead QA Engineer (Founding QA Member)
01/2017 - 05/2019

HomeLane — Bangalore, India

Founding QA member responsible for quality across multiple platforms

- Joined as the first QA engineer and accelerated scaling the QA team to 10+ members.
- Owned quality across Android, Web, backend services, and internal workflow systems.
- Collaborated closely with CTO, PMs, and Tech Leads during high-risk releases.
- Implemented automation frameworks for Mobile, API, and Web, reducing manual test efforts by 60%.
- Defined comprehensive testing strategy increasing feature release capacity by 40% during rapid growth and acquisition phases.
- Led cross-functional release readiness with CTO, PMs, and Tech Leads for high-risk launches, maintaining zero critical failures in production.

Software Exploratory Test Engineer
12/2015 - 01/2017

Moolya Software Testing Pvt. Ltd — Bangalore, India

Software exploratory testing for a cloud-based platform

- Executed exploratory, functional, and API testing for a cloud-based enterprise teleconferencing and Fintech platforms.
- Validated voice, SMS, and complex call workflows across distributed systems.

https://www.moolya.com/

Software Engineer – QA
09/2013 - 12/2015

Data Template (Client: PHFI – UDAY Project) — Bangalore, India

Bengaluru
Software Engineering with a focus on QA for public health projects.

- Enhanced data efficiency 60% by testing Tablet Android applications and enterprise server systems for public health.
- Supported deployments, client coordination, and facilitated field-testing across multiple locations.

EDUCATION

B.E
08/2008 - 05/2012

Rajiv Gandhi Technical University — Bhopal

- Specialisation in Information Technology

10th & 12th
03/2004 - 03/2006

CISCE — Prayagraj, India

- Computer Science and Mathematics

SUMMARY

Results-driven Software Engineer in Test (SDET) with over 11 years of experience in quality assurance and test automation, expert in mobile application testing and API quality verification. My key achievements include managing QA for platforms serving over 450 million daily active users, resulting in a defect leakage reduction of approximately 60% and a QA cycle time decrease of around 40%. I have leveraged GenAI and LLMs to enhance test case generation and accelerate root cause analysis processes across multiple projects. Looking to drive high-quality, AI-driven platforms as a Lead/Senior SDET in large-scale environments

KEY ACHIEVEMENTS

LLM Experience Impact
Achieved 60% defect reduction and 40% faster QA cycles for 450M+ daily active users.

AI-Driven Testing Enhancement
Utilized GenAI tools, enhancing 5 projects' testing strategies with improved automation efficiency.

SDET Team Growth Leadership
Led quality assurance team expansion from 1 to 25+, optimizing overall testing effectiveness.

SKILLS

Languages
Core Java, SQL, Python (Beginner)

Automation Tools & Frameworks
Selenium, Playwright, Appium, RestAssured, gRPC, TestNG, Postman, Charles Proxy, JMeter

Test Management
Zephyr, Jira, Confluence

Mobile & Profiling
XCUITest, Xcode Instruments, Android Studio, ADB

QA Engineering
Test Strategy, RCA, A/B test workflow validation, Performance Testing, Stakeholder Management, Quality Metrics, Process Improvement

AI-Driven QA
GitHub Copilot, Gemini, LLM-based test expansion, AI-assisted test data generation for API & mobile workflows
