Senior Staff / Principal Software Engineer | Cloud & Big Data Architect

Driving scalable cloud-native solutions and high-performance data pipelines with expertise in Java, Python, Spark, AWS, GCP, and end-to-end system architecture.

PROFILE SUMMARY

- Senior software engineer with over 13 years of extensive experience in **designing and delivering cloud-native solutions, microservices-based architectures, big data pipelines, and end-to-end SaaS platforms**, combining deep technical expertise with hands-on ownership from architecture to deployment.
- Expertise in **architecting distributed cloud systems** handling **100+ TBs of data monthly**, improving system resilience and throughput, while introducing **real-time monitoring and alerting frameworks** that reduced incident response time by **20-30%**.
- Skilled in **optimizing data-intensive services** for multi-tenant SaaS environments, incorporating **adaptive caching strategies and parallelized workflows** that decreased query latency by **30%** and enhanced tenant onboarding efficiency.
- Proficient in designing cross-service **API standardization** & **token-based authentication mechanisms**, enhancing **inter-service communication reliability** and supporting secure scaling for thousands of concurrent users.
- Strong experience in **mentoring and guiding engineers across teams**, conducting architecture reviews, code quality assessments, and technical onboarding, resulting in **20% faster feature delivery** and **15% reduction in post-release defects**.
- Proven ability in **implementing end-to-end automation and CI/CD enhancements**, including data-driven functional validations and rollback mechanisms, driving measurable **SLA improvements, operational efficiency gains**, and reduction in manual interventions.

CORE COMPETENCIES

- Cloud Architecture & Scalable System Design
- Big Data Engineering & Distributed Systems Optimization
- Microservices & Service-Oriented Architecture
- End-to-End Data Pipeline Design & Optimization
- API Design, Integration & Standardization
- SaaS Platform Development & Multi-Tenant Provisioning
- Automation, Test-Driven Development & Quality Engineering
- Performance Tuning & Scalability Enhancement
- System Reliability, Observability & Monitoring
- Technical Leadership, Mentorship & Code Reviews
- Full Lifecycle Product Delivery & Implementation
- Workflow Design & Process Automation

TECHNICAL SKILLS

Programming & Scripting	Java 8, Python, Shell
Frameworks & Libraries	Spring Boot, Hibernate, REST, Microservices, Mockito, TestNG, JUnit, Cucumber
Databases & Storage	MySQL, Oracle 11g, MongoDB, ElasticSearch, Redis, Google Cloud Storage, AWS S3, AWS RDS
Big Data & Data Processing	Apache Spark, GCP Dataproc, GCP Composer, Apache Airflow
Messaging & Queues	RabbitMQ, Kafka
Caching & Performance	Redis, Celery (Python)
DevOps & Build Tools	Maven, Gradle, Jenkins, CI/CD
Security & Authentication	JWT-based authorization, Basic Auth, API security practices
Software & IDEs	Eclipse, IntelliJ, MySQL Workbench, Cursor
Other Tools & Platforms	PDFtron, Confluence, Agile/Scrum methodologies

EDUCATION

Bachelor of Engineering (B.E.) in Computer Engineering – PVG's College of Engineering & Technology, Pune, India | 2012 | 62%

AWARDS & RECOGNITIONS

- Citi Silver Gratitude Award (03/2021) – For release support and automation of attribute extraction
- Citi Silver Gratitude Award (11/2020) – For completing and integrating PDFtron from POC to production
- Symantec Level 3 WoW Award (01/2019) – For SpamLab migration and release

SOFT SKILLS

- **Collaborator**
- **Communicator**
- **Innovative**
- **Analytical**
- **Problem-Solver**

CAREER TIMELINE

- **Sep 2012 – Oct 2015** — *Yagna iQ Pvt. Ltd*
- **Oct 2015 – Oct 2016** — *ITyX India Pvt. Ltd*
- **Oct 2016 – Jan 2018** — *PTC Software (India) Pvt. Ltd*
- **Jan 2018 – Nov 2019** — *Symantec Software Pvt. Ltd*
- **Dec 2019 – Jul 2021** — *Citicorp Services India Limited (Citibank*
- **Jul 2021 – Present** — *Broadcom Software (CA Technologies –*

WORK EXPERIENCE

R&D Engineer 4 | Broadcom Software (CA Technologies – Symantec) | *Jul 2021 – Present*

Project 1: CASB-Audit – Big Data Modernization & Security Analytics

- Migrated **Hadoop jobs to Apache Spark** for firewall logs (Palo Alto, Checkpoint, McAfee, BlueCoat).
- Improved **service resolution from IP addresses by 25%**, processing TBs of monthly logs using **Spark, Scala, GCP Dataproc, Airflow**.
- Converted legacy **Pig scripts** to Spark; reduced **MongoDB load by 37%** via caching in Redis and Google Cloud Storage; implemented Celery tasks in Python.
- Boosted automation test coverage from **25% to 65%** using **TestNG, Google Gemini, Claude**.

Technology Stack: Java, Python, Apache Spark, Scala, GCP Dataproc, Apache Airflow, Google Cloud Storage, Google Cloud Composer, Redis, Mongo

Project 2: SaaS Platform Services (SPS) – Provisioning & Product Integration

- Owned and enhanced **3 Spring Boot microservices**: Provisioning, Workflow, Integration App; participated in Agile sprints, design, code reviews, and bug fixes.
- Refactored provisioning APIs with **automatic rollback and retry** leveraging **ElasticSearch** , async processing of requests using **RabbitMQ** - reducing manual error handling by **22%**; implemented **data-driven unit tests** (TDD).
- Implemented **FAST provisioning v3** validator for NEW/UPDATE/TERMINATE/TENANT actions; enabled subscription movement between tenants; covered with **unit & Cucumber functional tests**.
- Integrated **Web Isolation product** into CMP, supporting full lifecycle events; developed a **Spring Boot migration tool** for tenant data.
- Automated **closure of pending transactions** via REST endpoint triggered from Jenkins; migrated APIs to **JWT-based authorization**.
- Maintained **code quality and security compliance**, resolving SONAR and BlackDuck issues.

Technology Stack: Java, Spring Boot, MySQL, ElasticSearch, Redis, RabbitMQ, Maven

Apps Dev Sr. Programmer Analyst (Assistant Vice President) | Citicorp Services India Limited (Citibank)| *Dec 2019 – Jul 2021*

- **Source Document Acquisition Module:** Led end-to-end development of a new module in **Data Trace Tool**, designing backend schema, APIs, microservices, and unit tests; successfully demoed to business users.
- **PDFtron Integration:** Developed APIs to edit, save, and retrieve PDF documents; extended functionality to Excel, Word, and Outlook files for seamless UI rendering.
- **Document Sourcing Automation:** Automated document acquisition across geographies; designed DB schemas, REST services, and unit tests; ensured **smooth deployment and dry runs**.
- **Process Optimization:** Streamlined backend workflows, improving **document processing efficiency** and reducing manual interventions.

Technology Stack: Java 8, Spring Boot, Oracle, Spring, Microservices, REST APIs

Software Development Engineer Grade C | Symantec Software Pvt. Ltd | *Jan 2018 – Nov 2019*

- Managed **ULTRA DNS Reputation product modules**, including purging old data from MySQL/**S3** and monitoring DNS queries in real-time using **AWS lambda**.
- Migrated **SPAMLAB product to AWS**, writing functional test cases in Java and deployment scripts in **Python boto**.
- Delivered **enhancements to email security workflows**, ensuring smooth product migration and system stability.

Technology Stack: Java 8, Spring Boot, MySQL, AWS S3, AWS Lambda, AWS RDS, Python Boto

Software Specialist | PTC Software (India) Pvt. Ltd | *Oct 2016 – Jan 2018*

- Developed REST APIs for **Windchill Config Management**; implemented server-side enhancements for **Assemble to Order (ATO) module – John Deere project**.
- Delivered **backend services with error handling, documentation (Swagger), and JUnit tests**, ensuring reliable product functionality.

Technology Stack: Java, RESTEasy, Spring Boot, JUnit

Software Developer | ITyX India Pvt. Ltd | *Oct 2015 – Oct 2016*

- Developed REST APIs for **KMS (Knowledge Management System)**; integrated multiple Dropbox accounts and created Elastic indexes from byte streams.
- Enhanced **UI-server interactions and data indexing**, improving system responsiveness and reliability.

Technology Stack: Java, REST APIs, ElasticSearch, UI integration

Software Engineer / Module Lead | Yagna iQ Pvt. Ltd. | *Sep 2012 – Oct 2015*

- Designed and developed **BoMs Optimization Framework**, improving solution creation performance by **20%**.
- Developed **Product Selection Engine (PSE)** and APIs for RF, APICEM, PartnerSight projects.
- Built **Product Store marketplace architecture** to display multiple vendor products with optimized backend services.

Technology Stack: Java 7, Spring, MySQL, Hibernate, Data Structures, Algorithms, OOP, Design Patterns
