Shyam Kishor *Full Stack Developer*

shyamnitp2k11@gmail.com 8789758090 Bangalore, India

EDUCATION

National Institute of Technology, Patna (NIT Patna)
Bachelor of Technology (Information Technology)
05/2011 – 05/2015
Marks : 8.07 C.G.PA

College Name : CM Science college
Intermediate (10+2)
03/2008 – 03/2010
Marks : 70.4%
Board : B.S.E.B

School Name : ML Academy
Matriculation
03/2007 – 03/2008
Marks : 73.2%
Board : B.S.E.B

TECHNICAL SKILL

Programming Language: Java, Unix, Data Structure and algorithm

Framework: Spring Boot, Spring AI, React JS, Microservices, REST Web service, Elastic search, Apache Solr, Apache Lucene, Docker, Kubernetes, Kafka, Grafana, Spring Batch, Mockito

Database: Oracle, Mongo DB, Sybase, DB2

Version Control: GitLab, GitHub, SVN, Perforce

Tool Hands on: Eclipse, IntelliJ, Postman, Robot 3T, Studio 3T, Autosys

EXPERIENCE

Project: Java Development Kit (JDK)
Company: Oracle India
08/2024 – Present

The **JDK (Java Development Kit)** is a comprehensive software development kit that provides tools, libraries and compilers necessary for developing Java applications and running them on different platforms.

Contribution:

- Designed and build Framework which will test functionality of JDK Internal Tools like Complier, Hotspot, c1 and c2 complier.
- Designed and build framework which can run real world application on Java VM and test JDK diagnostics tools like jcmd, jstat, jfr, jconsole, and Java Mission Control (JMC).
- Engineered an **AI-powered chat assistant** using Spring APIs and Retrieval-Augmented Generation (RAG) to analyze machine utilization data and deliver accurate, context-aware responses to user queries.
- Modernized the **Aurora application** by migrating from GlassFish 4 to GlassFish 7 and upgrading Jakarta EE from version 7 to 10, improving compatibility and long-term maintainability.

Technical Details:

Java, Spring Boot, Micro service, REST Web service, Docker, Kubernetes, Kafka, MongoDB, React JS, Junit, Mockito, Azure, Maven, Git, Elastic search and Graph QL, Grafana, Spring AI, Agentic AI, RAG, System Design

Project: Filr
Company: OpenText Corporation
04/2024 – 08/2024

Filr is enterprise file sharing and sync solution product. It allows user to access and share files from any device. Filr is like Google Dropbox.

Contribution:

- Designed and build secure communications for email b/w two smtp servers and b/w local postfix server to other snmtp servers.

Technical Details:
Java, Spring Boot, Microservices, REST Web service, Docker, Kubernetes, Kafka, MongoDB, Junit, Mockito, Azure, Maven, Git, Elastic search and Graph QL, Grafana

- 10 years of experience as a Full Stack Developer in the financial and e-commerce domains, specializing in end-to-end software development.

- Experience in Core Java, Spring Boot, Spring AI, RAG, System Design, React JS, Microservices, REST Web Service, Docker Kubernetes, Kafka, MongoDB, Spring Batch, Oracle, Data structure and Algorithm, JUnit and Mockito, Grafana.

AWARDS AND ACHIEVEMENTS

Secured All India ranks 29618 in AIEEE 2011 and secured AIR 6211 in GATE 2017.

Received 2 times Bravo awardsin Walmart labs and received 1 times bronze award in Genpact headstrong capital market.

Project: Global Supplier Management (GSM)
Company : Walmart labs
10/2019 – 04/2024

GSM is supplier onboarding platform. Onboard supplier across the globe in Walmart.

Contribution:
- Developed the GSM Next application from scratch and successfully migrated it from a monolithic architecture to a Micro services-based system.
- Designed and developed REST services, third party API integration and sync communication b/w Micro services via Kafka for GSM application.
- Designed and developed adaptor application top of azure storage blob and explore APIs to manage the file on azure storage blobs.
- Building and integrate application with task management system.
- Designed and developed services which manage data in elastic search. Create Grafana dashboard for monitoring and alerts for GSM services.

Technical Details:

Java, Spring Boot, Microservices, REST Web service, React JS, System Design, Docker, Kubernetes, Kafka, MongoDB, Junit, Mockito, Azure, Maven, Git, Elastic search and Graph QL, Grafana

Project: CPIT & Juno Application
Company: Genpact
04/2018 – 09/2019

Contribution:
- Design and develop spring batch application is for replicate the data from DB2 DB to Sybase DB using Spring Batch and schedule it with Autosys Job.
- Designed and Developed code deployment tool (conduit) which manage the deployment.

Technical Details:
Java, Spring Batch, Spring Boot, Unix, DB2 and Sybase, Gradle, REST.

Project: Personal Finance Management (PFM)
Company: Envestnet Yodlee
10/2015 – 03/2018

PFM provides 360-degree view for all financial account. Allow user to aggregate all type of accounts in one short for financial institution.

Contribution:
- Web scraping for various financial containers like Investment for many financial institutions.

Technical Details:
Java, XML, Selenium, Spring Framework, Hibernate, Maven, MongoDB, Junit, Mockito
