OBJECTIVE

Seeking a challenging career that will help me utilize my abilities to the fullest and help me enhance my technical and functional knowledge at the same time offering stability and professional growth.

PROFESSIONAL SUMMARY

- Technical Architect with **14+ years of IT experience**, specializing in **Intelligent Automation, Enterprise AI Solutions and Gen AI**.
- Strong background in **RPA, Intelligent Document Processing, and Automation at scale**, with deep experience working with global enterprises in **banking, insurance, and financial services**.
- Proven expertise in designing and delivering **LLM-powered platforms**, **Copilot-style assistants**, and **AI-driven decision systems** on **Azure**.
- PMP and UiPath Level 3 Certified, with a strong track record of leading large teams, building Centers of Excellence, and driving measurable business outcomes through automation and Generative AI.

SKILLS / AREAS OF EXPERTISE

Automation & RPA

- UiPath (Advanced Developer – Level 3 Certified)
- Power Automate
- Action Center, Document Understanding, Computer Vision
- Apache / Astronomer Airflow

Generative AI & AI Platforms

- Large Language Models (LLMs), GPT-5, GenAI Architecture
- Intelligent Document Processing (IDP)
- Copilot-style Conversational AI Solutions
- Prompt Engineering, Content Validation, Gap Detection

Cloud & Backend Architecture

- Azure Function Apps
- RESTful API Design & Integration
- Azure AI Services
- Event-driven & Serverless Architectures

Programming & Data

- Python, Java, VB Script, Selenium,Headless Selenium
- PL/SQL, MongoDB
- Postman, SOAP UI

Tools & Platforms

- Azure, AWS
- Git
- Jira, Confluence, Rally

Certifications

- PMP Certified
- UiPath Advanced Developer (Level 3)

PROFESSIONAL EXPERIENCE

Mphasis Limited, Bengaluru, India Jun'21- Till Date

DESIGNATION*: Technical Architect, Mphasis Application Delivery Unit*

Roles and Responsibility :

- Led a **team of 18 engineers** as Automation Architect, partnering with **Business Process Owners, Program Managers, BAs, and SMEs** to assess feasibility, re-engineer processes, and deliver high-value automation solutions.
- Owned **end-to-end solution architecture** including **PDDs, SDDs, technical designs, effort estimation**, and governance, embedding **Intelligent Automation and GenAI capabilities** beyond standard RPA.
- Architected and delivered **GenAI solutions** including **LLM-based Intelligent Document Processing**, **GPT-powered Learning Review Automation**, and a **Copilot-style Product Marketing Assistant** for automated MRD creation.
- Designed and implemented **scalable, serverless backend APIs using Azure Function Apps**, enabling enterprise integration, automation orchestration, and AI-driven insights.
- Ensured **engineering excellence and delivery quality** through **code and test reviews, stakeholder communication, team mentorship**, and continuous innovation.

Client: CHUBB Insurance

Role: Technical Project Manager

Project : Soroco Migration to Astro

- Leading enterprise-scale automation initiatives, **specializing in migrating low-code/no-code automations from Soroco to Python-based Apache Airflow frameworks.**
- Worked along with team in designing and delivering API-driven automations across web applications, mainframe systems, and desktop applications, ensuring scalability, reliability, and cost efficiency.
- Hands-on in building, orchestrating, and deploying automations on **Linux servers and Azure Kubernetes Service** (AKS), enabling low-cost, cloud-native execution.
- Worked along with team in Adept at driving end-to-end delivery including automation development, CI/CD deployment, and

- Test automation using Selenium with Python, while collaborating with cross-functional teams to meet business and technical objectives.

GenAI & Intelligent Automation Initiatives

DXRPro – Intelligent Document Processing using LLMs

Role: Technical Architect

- Architected and delivered an enterprise-grade Intelligent Document Processing platform leveraging Large Language Models (LLMs) for unstructured document analysis.
- Implemented LLM-powered content extraction, classification, and semantic analysis, improving processing accuracy and efficiency by 40–50%.
- Designed scalable, serverless backend APIs using Azure Function Apps to orchestrate document ingestion and processing workflows.
- Enabled enterprise system integration to deliver automated insights and support faster, data-driven decision-making.
- Established reusable GenAI patterns for document intelligence across business domains**.**

Client : Internal

Learning Review Automation – GenAI-Based Quality & Compliance Platform

Role: Technical Architect

- Designed and implemented a Generative AI–based automation solution to replace manual human review of courses on the Mphasis Learning Portal.
- Leveraged GPT-5 to automatically validate course content against quality, compliance, and instructional standards.
- Developed secure RESTful APIs using Azure Function Apps and integrated them with Power Pages for user-driven review initiation and monitoring.
- Reduced manual review effort by 60–70% and accelerated course publishing timelines by ~50%.
- Delivered a scalable, auditable solution aligned with enterprise governance and compliance needs.

Product Marketing Assistant – GenAI-Powered MRD Creation (Copilot-Style)

Role: Technical Architect

- Built a GenAI-powered Product Marketing Assistant to automate creation of Marketing Requirement Documents (MRDs).
- Designed a Copilot-style conversational chatbot enabling users to upload and analyze product documentation.
- Implemented backend processing using Azure Function Apps to extract and structure insights from unstructured inputs.
- Defined 30 standardized MRD sections/questions and leveraged LLMs to auto-populate high-quality content.
- Enabled intelligent gap detection, prompting users when missing information dynamically.
- Reduced MRD creation time from days to hours, improving speed, accuracy, and consistency.

Client: JPMC

Project Name: Win Automation to UiPath Migration

- Performed migration from Win Automation to UiPath.
- Leading team of 18, provide solution to the use case identified for automation.
- Developing Reusable objects and sub-processes that can be leveraged by other automations and work to catalog them.
- Presenting work to design and technical reviews. Perform unit, Quality Assurance (QA), and documented UAT before conducting Live-Proving Session in Prod environment.
- Create release packages, release notes and operational handbook along with a completed test plan for turnover to the RPA platform team.
- Support fixes and approved changes during the production monitoring phase after an automation starts running in production.
- Troubleshoot and complete assigned fixes and approved changes received as tickets for currently running automations.
- Contributing to improving the operation of the team by working on assigned side projects from documentation to developing tools.

Client: Securian Financial

Project Name: Securian Enterprise RPA Implementation

- Led a **10-member team** to deliver **end-to-end intelligent automation solutions**, including feasibility analysis, solution design, development, and production rollout.
- Architected and modernized **UiPath platforms across On-Prem and Cloud**, executing **infrastructure, VM, and Orchestrator (Classic to Modern) migrations** with CI/CD enablement.
- Built and scaled the **Automation Center of Excellence (CoE)**, delivering **26+ enterprise bots** (19 in production) with strong governance, reusability, and KPI realization.
- Implemented **advanced Intelligent Automation capabilities** including **Action Center, Document Understanding, Computer Vision, and Intelligent OCRs**, while leading **AI/ML and GenAI POCs** using **UiPath AI Center, AWS, and Hugging Face**.
- Owned **platform administration, architecture reviews, innovation initiatives**, and supported **RFPs, resource planning, and UiPath-to–Power Automate migrations**.

Accenture Solution Pvt Limited, Bengaluru, India Dec'17- Jun'21

***DESIGNATION**: Application Developer Senior Analyst, India Development Centre*

Client: COTY International

Project Name: Innovation Automation

- Delivered **end-to-end RPA solutions using UiPath**, covering requirements analysis, solution design (PDD/SDD), development, testing, deployment, and production support in **Agile environments**.
- Designed and built **resilient automations using UiPath REFramework**, deploying and managing bots via **UiPath Orchestrator** with enterprise-grade monitoring and control.
- Partnered with **Process SMEs** to identify high-value automation opportunities, develop **reusable**

components, and educate business users on bot adoption.

- Integrated automations with **ServiceNow, SAP, web applications, and Virtual Agents** using web services and APIs.
- Reduced **business incidents by ~60%** through intelligent automation, while resolving critical production issues, mentoring junior developers, and delivering automation POCs and demos.

Infosys Technologies Limited, Bengaluru, India Oct '11 –Oct'17

***DESIGNATION**: Technology Analyst, Financial Service Integration Oracle Unit*
Client: Fidelity Investment

- **Project Name: Oracle HRMS Implementation, Oracle Advanced Benefits Module**
- **Role : Technology Analyst**
- **Duration : Jan 2015 – Oct 2017**

Project 1: Annual Enrollment

Role: Cluster Lead
Application: EBS HRMS, Oracle Advanced Benefits

- Have handled AE for clients: EATN, OFDP, MERCK, GDYN and IBM.
- Worked with Project Analyst, Operations Delivery Lead, Client Service Manager, Config Analyst, and Project Manager to clarify client-specific requirements.
- Develop test cases to address stated requirements with expected results.
- Data mine and mocking test population.
- Conduct Walk-through of Test Plans and Test Cases with Project, Project Analyst and Configuration Teams. Verify that environments are available for testing and that all entry criteria like creation of TICKETS have been met.
- Determine the scope of test execution based on the SRA. Execute and analyze results of defined test cases.
- Log any defects found during testing and report them back to Configuration, tracking the defects to closure and signing off on the TICKETS.

Project 2: H&W Automation
Role: Developer

- End to end Automation of Test Planning phase.
- Provided client the solution to automate Test Case Creating Phase by developing tool on Oracle Apex framework with capability to interface with Quality Center and Test Scenarios repository.
- Tested the tool on the parameters like Performance, Coverage of the scenarios, Non- Redundant Data.
- Handled Projects for clients like EATN, IBM, CMSE, Barnabas Health, GM, and GD.
- Perform functional Systems Acceptance Test Design and Execution as required.
- Accountable for ensuring QA milestones and deliverables are met.
- Leads and coordinates the QA efforts for a project including planning, execution, status reporting, defect triage.
- Perform functional Systems Acceptance Test Design and Execution as required.
- Determines testing milestones and tracks progress.
- Participates in technical review of project documents/plans.
- Facilitates Regression Test case handoff to the Automation/Regression team.

EDUCATIONAL QUALIFICATION:

Passing Year	Institute	Degree	Score

2011	**JSS Academy of Technical Education, Noida**	**B.Tech in Computer Science**	**71.1**
2006	**Central Academy, Lucknow, UP**	**Class XII: CBSE**	**74.4%**
2004	**Central Academy, Lucknow, UP**	**Class X: CBSE**	**74.4%**

ACHIEVEMENTS

- Awarded Pinnacle Award in Mphasis.
- Awarded Kudos Award by various Leaders.
- ACE Award
- Greater Than Award
- Star Performer Trained around 18 people on **HRMS and US HealthCare**.
- Trained people in **HCM FUSION - BENEFITS**
- Won Hackathon Event organized by the Client 'Fidelity Investment'.
- Awarded 'Insta Award' twice for taking transition of a new client from Fidelity just before AE.
- Awarded 'Extra Mile Award' for continuous contribution in Automation.

Declaration

I hereby declare that information given is true to the best of my knowledge.

Place**: Bangalore**
