Neha Singh

Engineering Manager – Product Development & Program Management

+91 9910477308 **Nehasinghtiwari2@gmail.com** **https://www.linkedin.com/in/neha-singh-a0700718/**

Accomplished Engineering Manager with more **than 12 years of extensive experience** in Product Development and Program Management, specializing in leading engineering teams to design, develop, and deliver innovative products using cutting edge technologies. Adept with emerging tools and technologies, keen reader and writer.
Expertise in **solutioning and pre-sales activities** to drive revenue and sales for overall growth of practice.

- Full Stack Product development
- Solution Architect
- Program Management
- MEAN, MERN
- AWS Cloud Services
- SQL
- Disaster Recovery
- Docker
- Nginx
- Basic DevOps
- Product management

PROFILE SUMMARY

- **Seasoned in driving product development with over 12 years of experience,** adept at leveraging technologies such as NodeJS, Express, ReactJS (with Hooks and Context API), and a range of databases including MSSQL Server, AWS aurora, and Redis.
- Experienced in **pre-sales activity**, building solutioning, estimates, timelines, presentations to client on solutioning.
- **Experienced in full-stack development**, proficient in both back-end and front-end to create robust solutions, maintaining high standards of software engineering for superior code quality and system architecture.
- **Leveraged capabilities in spearheading Software Development Lifecycle (SDLC)** from concept through delivery of next generation applications and customizable solutions, entailing all aspects pertaining to Requirements Gathering, Application Design, Debugging, System Operations & Maintenance.
- **Proficient in using version control** systems like Git for collaborative development, branching, merging, and managing code repositories effectively.

PROGRAM MANAGEMENT SKILLS

Driven Request for proposals [RFPs] for various clients and secured winning the deals.

Team Management: Direct reporting of 12 members. Handling end-to-end growth and performance management.

Project Management: Timelines creation, Gnatt chart, burndown chart for performance tracking, risk identification & mitigation planning.

TECHNICAL SKILLS

Solution Architecting: Full stack product with AWS/Azure services, Nginx , Docker , Cloudformation as IaaS, Disaster resilience set up for applications. Microservices & event driven architecture. Experienced working with micro frontend and Mono Repo for front end.

Pre Sales: Understanding client requirements from the RFPs, building proposed solutions.

Frontend technologies: Angular, React, Redux, Flutter
Backend technologies: NodeJS, Express
Database/ Caching: MySQL, MongoDB, Redis, AWS Aurora
ORM: Sequelize, Mongoose
Version Control/ Tools: Git, Jira, Jenkins

CAREER TIMELINE

2012-14	2016-18	2018-20	2020-21	2021-23	2023-Present
TCS	Ingenuity gaming pvt ltd	Accenture	Joulon India	Huawei India	Tredence Analytics

WORK EXPERIENCE

Jan'23- Present: Technical Program Manager | Tredence Analytics Pvt Ltd

Projects Undertaken:

Projects Title: **Walmart (Client)**
Role: Technical Product Manager
Technical Stack: Python FastAPIs, Django , SQL, GCP Projects, WMS

Key Result Areas:

- Enabled a system to compute for employee check in times, idle times. It was based on fixed frequency data pulls using CRON schedulers fetching data from various data systems and computing according to business logic and integrate with UI.
- Developed a comprehensive High Level design and Low Level Designs , including ERD for the application build.
- Collaborated effectively with the cross functional team to gather and refine requirements, ensuring alignment with project goals and timelines.

Projects Title: **BJs[Client]**
Role: Frontend Tech Lead
Technical Stack: ReactJS, Redux, Node Js, Express , AWS LAMBDA, AWS STEP Functions, Typescript, New relic, Scalyr, Okta

Key Result Areas:

- Led the UI team in developing multiple app features, focusing on enhancing UI/UX and ensuring seamless integration across platforms (Web, Mobile, Desktop).
- Set up disaster recovery for application with RTO and RPO of 30 minutes , 4hours respectively
- Created a solution architecture detailing solution for business problems
- Set up AWS ECR,STEP, LAMBDA.
- Node cron jobs to run the scheduled APIs

Projects Title: **HEB [Client]**
Role: Frontend Tech Lead
Technical Stack: DASH, FastAPIs, Python, Azure, PostgreSQL

Key Result Areas:

- Led the UI team in developing multiple app features, focusing on enhancing UI/UX and ensuring seamless integration across platforms (Web, Mobile, Desktop).
- Set up disaster recovery for application with RTO and RPO of 30 minutes , 4hours respectively
- Created a solution architecture detailing solution for business problems
- Set up AWS ECR,STEP, LAMBDA.
- Node cron jobs to run the scheduled APIs

May'21- July'22: Senior Associate| Huawei India Private Ltd

Projects Undertaken:

Projects Title: **Venus Platform**

Period: Aug'21- Sep'22
Role: Backend Developer (Individual Contributor)
Technical Stack: Angular 8, RxJs, mongoDB,mongoose, node 16 , Express
Deployment : CloudDragon

Key Result Areas:

- Engineered robust APIs enabling seamless consumption by UI and various clients, ensuring high performance and scalability.
- Implemented comprehensive unit tests to validate API functionalities, enhancing code quality and reliability.
  integrates videos and images generated by artificial intelligence, video generation, images generation, share-sync images, web scrapping of images , local upload of video/images, animations plays , save to local or cloud based library.
- lighthouse audit score from 19 to 45 within a week's time and reduce bundle sizes by half, implemented lazy loading , reduced web application load time by 70%.

May'20- Jan'21: Consultant UI Developer | Joulon India Pvt Ltd

Projects Undertaken:

Projects Title: **Joulon Asset management app**
Period: May'18- Dec'21
Role: Consultant UI Developer
Technical Stack: Flutter, DART, NodeJS, Express, MongoDB

Key Result Areas:

- An hybrid app running on ios, android and web , which displayed rig level data to enterprise users in charts and list format. This data was drilled by data sciences team to display usage pattern of rigs, operational status and downtime.
- Release to AppStore and google play with version fixes.

Jul'18- May'20: Associate Developer | Accenture

Projects Undertaken:

Projects Title:	**Shell [Client]**
Period:	Jan'20- Jul'20
Role:	Primary UI Developer, Backend Developer
Technical Stack:	dot net, SQL, HTML, CSS, Bootstrap, Angular 4

Projects Undertaken:

Projects Title:	**National Trade Portal, Singapore [Client]**
Period:	Jul'18- Dec'19
Role:	Primary UI Developer, Backend Developer
Technical Stack:	angular 4, Node, Express, SQL

Jul'18- May'20: Associate Developer | TCS

Projects Undertaken:

Projects Title:	**CBEC [Central Board of Excise and Customs]**
Period:	June'12- Dec'14
Role:	Primary UI Developer, Backend Developer
Technical Stack:	C#, Dot net, SQL, Javascript
