Skills

- Methodologies
- Test Plans, Cases and Processes
- Scripting and Documentation
- Regression and Negative Testing
- Testing Automation
- Defect/Bug Tracking
- Test Strategies and Coverage.

Programming Languages:

- Java
- SQL

Testing Tools:

- Selenium WebDriver
- Azure Devops
- Eclipse
- Swagger
- Postman

Defect Tracking Tools:

- Azure Devops
- Jira

Frameworks:

- Page Object Model (POM)
- Test Data Driven (TDD)

Databases:

- SQL Server

Web Technologies:

- HTML
- CSS
- XML
- JavaScript

Experience

Consultant ***Oct 2021-Current***

Capgemini

1. Project: USI Insurance Services (Insurance Domain)

- Designed and Developed Test Plan and Test Scripts based on User Stories.
- Understanding all the aspects of Azure Devops including team plan, track, and discuss work items such as user stories, tasks, bugs, and features.
- Extensively involved in all stages of testing life cycle, Software Development Life cycle (SDLC) and Software Testing Life cycle (STLC) using Agile methodologies.
- Analysed business requirements and user experience goals to develop test plans and test cases.
- Having knowledge in API Testing to check responses using Swagger and Postman.
- Also, hands-on experience in identifying the root cause of failed User Stories those were in maintenance, Modifying, Rebuilding and Re-Automating the failed cases to ensure smooth execution.
- Involved in Direct Interaction with the client helped in changing the requirement based on changing functionality which resulted in profound testing.
- Drafting reports detailing the defects.
- Documentations on Defect Management, Test Management & Test Automation
- Experience in data validation, Database testing using SQL queries.
- Wrote and executed SQL Queries.

Technical Environment: Selenium, WebDriver, Java, TestNG, Agile, Eclipse, Azure Devops, Xpath, SQL Server, POSTMAN.

2. Project: HSBC (Core Banking)

Description: The Hongkong and Shanghai Banking Corporation, commonly referred to as HSBC, is one of the largest banks in Europe. The bank headquartered at London, United Kingdom. HSBC Developing the Global Trade and Receivables Finance (GTRF)business.

Responsibilities:

- In Agile environment, attended daily stand-up meetings, reviewed user stories.
- Analyzed the business requirements document, created the detailed test design for new functionality.
- Conducted Smoke Testing, Functional Testing, End to End Testing, Regression Testing and User Acceptance Testing.
- Wrote and executed SQL queries.
- To validate the data.
- Filed and tracked the defects using Jira.
- Documentations on Defect Management, Test Management &Test Automation.
- Created Selenium automation scripts in Java using TestNG framework and page object model (POM) and Configured Web Driver, Maven tool.
- Developed automated tests in partnership with developers for continuous regression testing and reducing manual testing.
- Followed Agile/Scrum Methodologies for all theproject activities.

Technical Environment: Selenium, WebDriver, Java, TestNG, Agile, Eclipse, Jira, Xpath, SQL Server, POSTMAN.

QA Engineer *June 2021-Oct 2021*

CGI

3. Project: CIBC (Core Banking)

Description: The Canadian Imperial Bank of Commerce, commonly referred to as CIBC, is one of the "Big Five" banks in Canada. The bank headquartered at Commerce Courtin Toronto, Ontario. CIBC Developing the Salesforce Financial cloud ECRM application for its services.

Responsibilities:

- Developed automation test applications, and executed unit, integration, system, user acceptance, and regression testing.
- Performed testing processes like Test Planning and Defect Management and involved in Manual, Regression, and User Acceptance Testing.
- Participated in design and requirement analysis discussion.

- Extensively worked in Agile environments.
- Experienced in Test Activities including Requirement Analysis, Test Effort Estimation, Test Planning and Defect Management.
- Created Test Plan and Strategy for Releases.
- Tracked and reported the defects using Jira.
- Analysis of User Stories of each Sprint & preparing automated test cases from user stories.
- Involved in Test Modelling by Conform IQ, OR Mapping, OR Creation and OR Maintenance.
- Using Script-less automation UI using Java Selenium and TestNG.
- Also, hands-on experience in identifying the root cause of failed User Stories were in maintenance, Modifying, Rebuilding and Re-Automating the failed cases to ensure smooth execution.
- Experienced in automation and created Frameworks for Rest APIs/UI Test Automation using Selenium, Java, TestNG and Rest Assured.
- Performed defect reporting using tracking tools like Jira.
- Participated in QA weekly meetings and various other meetings and discussed enhancement and modification request issues and defects in the applications.

Technical Environment: Selenium, WebDriver, Java, TestNG, Agile, Eclipse, Jira, Xpath, SQL Server, POSTMAN.

QA Analyst *May 2019-June 2021*

TATA CONSULTANCY SERVICES

4. Project: CITI BANK (Core Banking)

Description: Under the CITI BANK we are working on the application that name is ROP. Under ROP there are two major components, that is front end and back end. It has entire core banking functionality.

Responsibilities:

- Analyzed Business Requirement Documents and Technical Specification document and developed test plan and test cases for testing the application.
- Test Planning and coordinating on all SDLC phases.
- Responsible for integration testing, Functional testing, Regression testing, Sanity Testing, Smoke Testing and Defect Tracking.
- Developed Test Scripts to implement Test Cases, Test Scenarios.
- Enhancement on Test Data Driven (TDD) framework in Eclipse.
- Using Selenium WebDriver and implemented TestNG to run parallel testing by creating Groups and categorizing test cases.

- Used Selenium APIs such as take screenshot for failed test cases, select for selecting multiple values from list, Action for various key and mouse event, with different locators like Xpath, CSS, id, Link text and name.
- Utilized Jira as a test management and defect tracking tool.
- Developed and executed SQL Queries to verify the proper insertion, deletion, and updates to the database.
- Actively participated in daily Agile Scrum meetings and involved in Iteration Planning.
- Ensured the best user experience by focusing on the quality and integrity of an application for requirement specifications, business logic, user experience and system end to end validation.

Technical Environment: Selenium, WebDriver, Java, TestNG, Agile, Eclipse, Jira, Xpath, SQL Server, POSTMAN.

Key Strengths

- Ambitious to build a career with an organization where teamwork is required and hardworking is appreciated and to be in a position which is best suited to my knowledge and skills.
- Hardworking and ready to work under pressure, Punctual, friendly, and dedicated.
- Good grasping abilities and good communication skills.
- Exceptional quality of convincing and making the subordinates complete task on time.
- Effective with experience working with teams to plan and execute successful projects.
- Motivated and friendly worker with a flexible schedule and willing to work weekends.
- Work collaboratively with team members and provide excellent customer service.
- Talented and dedicated to continuous improvement to keep everything running smoothly.

Education

Bachelor of Computer Science *Apr 2018*

Mumbai University (N.E.S. Ratnam College),

Percentage: 65 %

H.S.C *Apr 2015*
