Intend to establish myself as a Computer Science Engineer with one of the most admired and reputed institutions of the world and continuously rise to positions of increasing responsibility by contributing to the growth of the organization. I believe that my technical, functional and communication skills will enable me in facing an ever challenging yet interesting career ahead.

Summary

- Sound Technical Knowledge in **JavaScript**, **ReactJs, AngularJs, Python, Node Js** Technologies.
- Excellent **Analyzing** and **Problem solving** Skills
- Good Programming Practice in developing Application on **Windows, Red Hat, MAC** and **Linux, Backtrack**
- Good Programming Practice in **Multithread Programming** ,**Express Server, Single Thread Pages** and **Object Oriented Program Paradigm**
- Sound Technical Knowledge in **Data Structures** and **Data Base Programming**
- Good **Team member** and **self-motivated**
- Basic level Programming knowledge in **UML** diagrams**, DBA, Socket Programming**
- Excellent **Server Based Skills** and **Hands on experience with AWS & Azure**

Professional Experience

- Currently Working for **ADP Pvt.Ltd** (India) As a Software Developer, Hyderabad from **August-2018** to till today
- Worked for **InfecServices** (India) As a Software Developer/Consultant, Hyderabad from **February-2017** to **July-2018**
- Worked for **MetaSoftSolutions** (India) Private Limited As a Senior Software Developer, Hyderabad from **September-2014** to **January-2017**

Education

- M.CA. **Aurora Engineering**, JNTU University, 2014with **87%**
- B.Sc– Kakatiya University, 2011with **87%**.
- Intermediate – Board of Intermediate, 2008 with **76%**
- S.S.C – S.S.C Board, 2006 with **78%**

Technical Competencies

Languages : **C, C++, Java, Python, SQL** and **PL/SQL**
IDE : **Intel XDK**, **Visual Studio** and **Vi Editor**
Database : **Oracle, NOSQL, MY SQL, MongoDb** and **MS-Access**
Operating Systems : **Windows, UNIX, Red Hat, BackTrack5, MAC**
Scripting &Framework: **HTML, DHTML, XML, JavaScript, React Js, AngularJs, NodeJs, Django, Django-Rest, Express Js and Mongoose**
Web Services : **AWS, Azure, Restful, Heroku, Python Anywhere**

Projects

Project Title 1 : MIA Chabot

Role : Software Engineer (ADP)

Environment : **NodeJs, JavaScript, Socket Io, AWS, Machine learning, Dialog Flow**

Back End Used : **Mongo DB, Node Express API's**

Description:

MIA Chabot is associate query based answering project. It can reply to the user based on HR specific questions and answers. Its internal project, it is available in the associate portals of ADP.

Responsibilities:

- Preparing Functional specification based on System Requirement Specification.
- Implementing component as per Functional Specification
- Communicating customer and vendor for various changes during development and support.
- Preparing Test Environment

Projects

Project Title 2 : TLM Configuration Editors

Role : Consultant (ADP Client)

Environment : **MDF, NodeJs, Express**, **React Js**, **JEST, Typescript,** Ubuntu&Windows

Back End Used : **Oracle, Java API's**

Description:

Configuration editors are the setup pages for all the functional activities in TLM products. All products are included Time Card, Clocks, and Pay Classes etc. It has use of no of clients throughout the world around 60,000 clients

Responsibilities:

- Preparing Functional specification based on System Requirement Specification.
- Implementing component as per Functional Specification
- Communicating customer and vendor for various changes during development and support.
- Preparing Test Environment

Projects

Project Title 3 : WFN Candidate Experience

Role : Consultant (ADP Client)

Environment : **NodeJs, Express**, **Angular2**, **Karma, Typescript,** Ubuntu&Windows

Back End Used : **Oracle, Java API's**

Description:

Candidate experience project is most awaited and it has use no of clients in the stream of WFN. It is mobile responsive enterprise application, clients can create and update their jobs in the dashboard WFN logins, the jobs and all is visible to the jobseekers irrespective of locale based. Totally it is big project it has almost 1, 20,000 clients throughout the world.

Responsibilities:

- Preparing Functional specification based on System Requirement Specification.
- Implementing component as per Functional Specification
- Communicating customer and vendor for various changes during development and support.
- Preparing Test Environment

Projects

Project Title 4 : FR (My First Responder)

Role : Sr Software Developer

Environment : **NodeJs, Express, JavaScript**, **AngularJs**, Ubuntu&Windows
