Project Details:

Client: Timberland

Domain: E-Commerce

Tools used: Java-Selenium, BDD Cucumber, Maven, POM, GIT, JIRA, Postman, Rest Assured, Appium, SQL.

Description: Timberland is an American manufacturer and retailer of outdoor footwear and apparel owned by VF Corporation. The company also sells accessories including watches, eyewear, and leather goods. Timberland's corporate headquarters are in Stratham, New Hampshire. In this project, I have been involved in automating test scripts using BDD Cucumber and rest Assured.

Roles and Responsibility:

- Analyzing and understanding the user stories and acceptance criteria.
- Prepared feature scenarios and automation scripts in Selenium with Cucumber.
- Implemented different automation frameworks like POM, Junit & TestNG.
- Performed defect tracking and management in JIRA.
- Analyze the test results and maintain the test reports using JVM Reports.
- Involved in all levels of Agile ceremonies starting from Test planning to Retrospectivemeeting.
- Regression testing and generating reports through Jenkins.
- Involved in the End-to-End Integration testing with the Multiple application including UI Automation, System Testing, API Testing.
- Worked with the Developers team to test the API.
- Test Execution, Defect Tracking and Reporting, Test summary Report, Daily status Report, Weekly status report.
- Involved in Test Execution, Results Evaluating and Defect Reporting.
- Involved in discussion with the Business Analysts in Functional issues.
- Performed Integration Testing, System Testing and Regression Testing.

Client 2: Hume Bank

Domain: Banking

Tools used: Excel, Manual Testing, Jira.

Description: Hume Bank is an Australian bank. Headquartered in Albury, New South Wales, it is a customer-owned bank that started as a building society in 1955. Its business focus is on retail banking and assisting local economic development.

Roles and Responsibility:

- Analyzing the user stories, prepare the test scenarios based on acceptance criteria.
- Review the Test scenarios, identifying test cases for manual testing.
- Raise and track the defect using JIRA until closure. Re-tested the fixed defects.
- Participated in all the Agile Methodology Ceremonies- planning daily scrum calls, sprint review and sprint retrospective.
- Supported Automation team and updated TestNG scripts
- Prepare test scenarios and test data for different user stories.
- Identifying end to end scenario test cases and executing it manually.
- Developing new test scripts.
- Test script execution and analyze the failed scenarios.

Declaration:

I do hereby confirm that the information given is true to the best of my knowledge and belief.
