Objective:

To be a part of a team that demands innovative solutions, challenging my strengths and makes the best out of me to seek a well-defined position to utilize my skills and abilities to be unique in the industry.

Professional Summary:

- Around 3 years of experience as Quality Engineer with **Manual testing**, **Selenium Automation, API Testing** in E-commerce domain and flight booking application.
- Hands-on experience on web based, client-server functional testing, android testing and IOS testing.
- **Automation Framework Development:** Contributed to the design and implementation of automation frameworks using tools like Selenium and TestNG.
- **Test Script Creation:** Developed and maintained automated test scripts for functional, regression, and performance testing of healthcare, e-commerce applications.
- **Collaboration:** Worked closely with developers, product owners and business analysts to understand requirements and ensure quality deliverables.
- **Test Case Design:** Designed test cases based on user stories and acceptance criteria, focusing on both positive and negative scenarios.
- **Defect Tracking:** Identified, reported and tracked defects using tools such as JIRA, ensuring timely resolution and documentation of issues.
- **Integration Testing:** Performed API testing using tools like Postman to verify data exchanges between healthcare systems and third-party services.
- **Continuous Integration:** Participated in CI/CD processes, integrating automated tests into pipelines using GIT or similar tools.
- **Documentation:** Maintained comprehensive documentation of test plans, test cases and automation scripts for knowledge sharing and audit purposes.
- **Learning & Adaptability:** Demonstrated ability to quickly learn new technologies and tools relevant to healthcare automation testing.
- **Team Contributions:** Actively participated in sprint planning and retrospectives providing feedback to improve processes and test coverage.
- **DB Testing:** Familiar with basic database testing techniques including writing and executing simple SQL queries to validate data and ensure consistency.

Team Management:

- Prioritizing tasks, allocating resources, delegating work within the team.
- Responsible for knowledge transfer within the team and project whenever required.
- Coordinated team members to make sure the tasks completed and the requirements met.

Education Qualification:

- **Swarnandhra College Of Engineering and Technology**
  Bachelor of Technology (B.Tech)

Project Details:

Project Name : Bakkt
Duration : Oct 2022 – Aug 2023
Type of Application : Web Application.
Role : Software Engineer (QA Automation)
Team Size : **18**

Description: It is a flight booking web application. It is an US based project. As a Software Engineer, I am responsible for the automation testing of the flight booking website where to test the process of booking the flights and to test the refund related things.

Project Details:

Project Name : Siam Makro (Makro PRO)
Client Name : CP Axtra PCL
Duration : Aug 2023 – Till date
Role : QA Engineer
Team Size : **27**

Description: CP Axtra is a customer-centric online sales and delivery-pickup service, both of which are contingent on a digital organizational transformation. As a Software Engineer in the Quality Assurance (QA) role, I have played a crucial part in ensuring the quality and reliability of the application.

Responsibilities:

- Collaborated with cross-functional teams including developers, business analysts and project managers to gather requirements and understand the project scope.
- Developed detailed test plans and test cases based on the functional and non-functional requirements of the project.
- Proactively lead the team with all the team members with smooth and excellent outcome for a short period of time.
- Actively run the daily stand up's with the developers and QA's along with the PO successfully.
- Performed in the show case/demo meetings with high activeness to all the teams.
- Driven the UAT and E2E tests along with the different teams and successfully released to PROD with 0 or no issues.
- Conducted thorough manual testing to verify the functionality, usability and performance of the software.
- Executed test cases and identified software defects using bug tracking tools like Jira.
- Collaborated with the development team to ensure timely resolution of issues, conducting retesting and regression testing as necessary to uphold software quality and meet project deadlines.
- Actively participated in User Acceptance Testing (UAT) sessions, working closely with end-users to gather feedback and address any concerns or issues and also involved in late night deployments.
- Assisted in the creation of user documentation, providing clear and concise instructions for end-users to maximize the usability of the application.

Key Achievements:

- Successfully completed comprehensive test coverage, ensuring the application met the client's requirements and quality standards.
- Efficiently identified and reported critical defects, contributing to the overall improvement of the application's stability and performance.
- Received positive feedback from the client for giving support during application going online. Received client accolades for presenting crucial feature demos to content and business teams.
- Tested more than 60+ newly developed features in website & mobile app, raised more than 450+ bugs and tested more than 850+ feature & bug tickets.
- Implemented innovation by developing automation scripts to assist employees in tracking completed and pending bugs, optimizing QA efforts, and more.

Declaration:

I hereby declare that the information provided in this resume is true, complete and accurate to the best of my knowledge.
