Hyderabad

Summary

With over **16 years** of experience in web development, I thrive as a **Frontend Developer** and **Certified Scrum Master**, specializing in **React**, **Next.js**, and **TypeScript**. I excel at creating **scalable, high-performance web applications** utilizing **JavaScript**, **TailwindCSS**, and **HTML**. My commitment to mentoring junior developers has led to enhanced application performance and increased user satisfaction. My technical skill set is complemented by hands-on experience in **Ipswich, UK**, where I developed complex features, optimizing user experience and streamlining project workflows.

Work Experience

Technical Specialist

Oct 2020 - May 2023

Tech Mahindra

- Collaborated with **BT** in **Ipswich, UK** to enhance system performance, achieving an **80%** increase in efficiency.
- Addressed integration challenges by **developing** a new call service platform, achieving a **90%** boost in **operational efficiency**.
- DISPC (Dispatcher): a SIP transaction stateful proxy acting as a load balancer for all core network elements in the new GMV network.
- CSM (Core Session Manager): a SIP B2BUA, the central network element of the new GMV network from an end-to-end call routing perspective, intended to rebuild the current service logic of the TeS and NOAS OS VPN service.
- The Application was developed to maintain the call records and create interactive network tree flow using the VIS library for creating Trees.
- Which includes static trees and dynamic trees to provide the data.
- My Role: The project involved providing on-site support in the UK for 14 months, starting in January 2022 and ending in March
- The project involved developing complex features, specifically the decision tree visualizations, and designing and developing an interactive user experience.
- The technology stack used for this project included HTML5 and CSS3, SASS, TypeScript for enhanced user experience, JavaScript, React JS, Redux Forms React-Redux, React Hooks, React VIS library, JEST, Docker, Jenkins, and Ubuntu 1 LTS.
- Additionally, the project also involved monitoring the CI-CD pipelines.

Technical Specialist

Oct 2020 - Apr 2021

Electronic Arts

- Electronic Arts is a platform that develops games for gaming enthusiasts.
- The company aims to create a user-friendly dashboard application and registration portal with high-fidelity browser support and modern user interface technologies to provide gamers with a fresh and exciting experience.
- My Role: Design and develop interactive and device-responsive user experiences.
- Created reusable web components using Stencil JS.
- Utilized HTML5, CSS3, SASS, JavaScript, Stencil JS, Redux, and React JS for a seamless user experience.
- Designed, developed, and implemented critical UI/UX components using Next.js, React, Tailwind CSS, TypeScript, and JavaScript.
- Translated business requirements into functional, visually appealing, and responsive user interfaces.
- Created and maintained reusable code and UI components to drive efficiency and consistency across the platform.
- Led the integration of front-end applications with RESTful APIs, ensuring seamless data flow and functionality.
- Mentored and guided junior developers, fostering an environment of continuous learning and improvement.
- Conducted comprehensive code reviews to maintain high standards of code quality and best practices.
- Developed and maintained CI/CD pipelines to automate deployment processes and ensure smooth releases.
- Collaborated with product managers and designers to deliver wireframes, user journeys, and prototypes optimized for multiple devices.

- Monitored application performance post-deployment, implementing timely bug fixes and updates.

Lead - Technology

Nov 2018 - Oct 2020

QuaQua Experiences Pvt Ltd

- Client: In-house Project: QuaQua is a platform that provides a digital experience for the travel and tourism industry.
- It integrates 360-degree virtual reality content to create immersive end-to-end travel experiences.
- QuaQua aims to capture the world's travel experiences through captivating 360 videos and AR/VR stories.
- The application is constantly evolving with new features being developed.
- URL: QuaQua.com
- Key achievement: Designing and developing QuaQua app with new UI technologies, targeting high-fidelity browsers, and migrating from Angular to React.
- And Leading the Team.
- My Role: During my work, I focused on creating reusable components in ReactJS.
- I also tackled a longstanding image optimisation issue and helped the team resolve a font problem on a web application.
- I took charge of designing and developing interactive and device-responsive user experiences and creating and designing mockups.
- To achieve a great user experience also tackled long-standing image issues in the application.
- Designed, developed, and implemented critical UI/UX components using Next.js, React, Tailwind CSS, TypeScript, and JavaScript.
- Worked with the UI technologies such as HTML5, CSS3, SASS, JavaScript, AngularJS, and ReactJS.
- Developed data-driven SEO initiatives, increasing website traffic by 25% and enhancing online visibility.
- Led a cross-functional team in improving customer satisfaction, resulting in a 50% increase in positive feedback and a 20% reduction in complaints.

Sr. UI/UX Developer

Aug 2016 - Oct 2018

Wissen Infotech

- Client: Invesco Mutual Funds: Revamping of Invesco Mutual Funds website.
- URL: https://invescomutualfund.com/
- To achieve a fresh look and user-friendly interface, the Invesco Mutual Funds website was redesigned.
- My Role: I took on this project with a strong sense of purpose and worked independently to exceed expectations, showcasing my capacity for self-directed work.
- My responsibilities included converting designs into interactive web applications, integrating them into the Sitefinity CMS framework, and utilizing a technology stack that included HTML5, CSS3, JavaScript, jQuery, and renderJS to achieve a seamless user experience.

Sr. UI Developer

Apr 2014 - Aug 2016

Techno Soft Corporation

- Client: Deloitte: All Deloitte member firms.
- URL: http://wwwdeloitte.com/global/en.html
- The major accomplishment of Deloitte has been the redesign and development of its global website, Deloitte.com.
- This website serves as a common platform for external digital experiences and Deloitte's global brand and communication.
- The website has been developed using Adobe CQ5 and Adobe Experience Manager(AEM) and is multilingual.
- It is also tightly integrated with over seven external frameworks, making it a ready-to-use web content strategy for any Deloitte member firm.
- Some of the major member firms that have come on board include Deloitte Netherlands and Deloitte Ireland.
- My Role: Design and develop an interactive and device-responsive user experience.
- This involves developing Adobe CQ5 client libraries and components using JSP, ensuring an optimized web experience, and adhering to Web Content Accessibility Guidelines
- Additionally, create and design mockups and wireframe prototypes using UXpin, as well as UI frameworks and libraries for JavaScript components.
- HTML5 and CSS3, including IE8 support, are necessary for providing a consistent user experience.

Sr. Programmer Analyst, Jr. Programmer Analyst, Trainee

Jan 2007 - Apr 2014

Thummas Technologies Pvt. Ltd.

- Projects in Thummas Technologies Pvt. Ltd.

- 1) Scrubsinfashion.com portal.
- Server-side scripting: PHP, MYSQL.
- Role: Integration of E-commerce Templates, Integration of Payment providers, Inventory Update code for Stock Levels.
- Back end: MySQL.
- Duration: Jan 2007 to Apr
- Dates: Dec 2007 -
- The technology used: PHP, MySQL, Ajax, JavaScript and jQuery.
- Software: Adobe Photoshop CS3, Adobe Dream Weaver CS
- Description: Scrubsinfashion.com is a portal for selling Medical scrubs/Apparel Online.
- The client, a retailer, requested the creation of 36 manufacturer websites linked to the portal.
- My Role: I was involved in integrating e-commerce templates into the website.
- I coded the listings, details, and cart pages while keeping in mind the website's design.
- I also integrated payment providers like LinkPoint, PayPal, and Google Checkout.
- I coded the SEO and the inventory update, which updates the stock level on the websites based on the manufacturer's stock levels.
- I made extensive use of jQuery tabs and Zoom plugins.
- Additionally, I converted PSDs into HTML, using technologies such as PHP, JavaScript, HTML, CSS, and jQuery.

Education

Master of Computer (M.C.A)

Start Date - 2005

University College of Engineering, Kothagudem, Kakatiya University
