KOPURI BHARGAVI

Chennai Tamil Nadu • +91 9951473027 • bhargavikopuri53@gmail.com

Professional Summary

A skilled Test Engineer with over 2 years of experience in Functional and Non-Functional Testing, specializing in Performance Testing, Security Testing, and Application Monitoring. Proficient in designing, executing, and analyzing test cases to ensure application scalability, security, and reliability. Experienced in identifying web application vulnerabilities using industry-standard security tools. Adept at collaborating with cross-functional teams to enhance software quality and security. Seeking an opportunity to leverage technical expertise in a dynamic software development environment.

EDUCATION

Vishnu Institute of Technology, Bhimavaram Andhra Pradesh **(2019-2022)**

Computer Science and Engineering **6.8**

SKILLS &TOOLS

- **Performance Testing Tools:** LoadRunner, JMeter, Neo Load
- **Security Testing Tools:** Burp Suite, OWASP ZAP (DAST)
- **Application Monitoring:** Dynatrace, New Relic
- **Test Management:** JIRA, Tracker Man
- **Automation Testing:** Playwright with JavaScript
- **Protocols:** Web (HTTP/HTML), Ajax TruClient, SOAP GUI
- **Scripting & Performance Optimization:** LoadRunner scripting, JMeter scripting (Beanshell, parameterization, correlation)

Proof-of-Concepts (POC)

- Done POC for Stress Stimulus using Fiddler
- Done POC for k6 Load Testing Tool

CERTIFICATIONS

- **JMeter Intro and Pro Certification** – Blaze Meter University
- **Tricentis NeoLoad Certification**
- **Google Associate Cloud Engineer Certification**

PROFESSIONAL EXPERIENCE

Test Engineer | Wipro India Pvt Ltd, Chennai (Dec 2022 – Present)

- Designed and executed comprehensive test cases and scenarios based on business requirements and functional specifications to ensure platform functionality, usability, and performance.
- Conducted manual testing (Regression, Integration, System, and Usability Testing) to validate fixes and maintain product quality.
- Collaborated with cross-functional teams (developers, business analysts, and QA members) to identify, document, and track defects using JIRA in Agile workflows.
- Delivered detailed test reports to stakeholders, highlighting test outcomes, key issues, and areas for improvement.
- Performed cross-browser and mobile testing using BrowserStack, ensuring compatibility across multiple devices and OS versions.
- Utilized Chrome DevTools for inspecting elements, debugging issues, and optimizing mobile web application performance.
- Conducted responsive design testing, verifying UI/UX consistency across various screen resolutions.
- Performed performance testing using JMeter and LoadRunner, executing Load, Stress, Spike, Endurance, and Volume tests.
- Implemented performance monitoring using Dynatrace and New Relic to analyze system behavior under various workloads.
- Converted LoadRunner scripts to JMeter, optimizing test execution and reducing licensing costs by adopting open-source frameworks.
- Integrated Selenium with OWASP ZAP for automated security testing, identifying vulnerabilities such as XSS, SQL Injection, and OWASP Top 10 threats.
- Analyzed ZAP security scan results, collaborated with developers to fix vulnerabilities, and documented the entire integration process.
