# FATHIMA M

**SENIOR QA CONSULTANT**

+91 8072840116 | fathima.qaofficial@gmail.com

## PROFILE

With **1 year of experience** in a **NON-IT** role and **3.5 years of hands-on experience in Software Testing**, I have honed a diverse skill set that blends customer-centric problem-solving and technical expertise. My background in customer service has shaped my ability to work with clients, understand their requirements, and ensure quality outcomes, while my transition to IT has provided me with advanced software testing skills, enabling me to excel in dynamic development environments. I adapt quickly to new technologies, and my combined experience makes me a versatile and value-driven professional.

## CAREER SUMMARY

- Utilized Selenium WebDriver, Java, TestNG, and Cucumber BDD to design and implement automated test scripts, ensuring thorough UI and functional test coverage.
- Built and maintained a robust Page Object Model (POM) framework with a Data-Driven approach to enhance the reusability and efficiency of test execution.
- Performed manual testing across functional, UI, cross-browser, and regression scenarios, successfully identifying and logging critical defects in JIRA.
- Created and executed API test cases using Postman and REST Assured to validate request-response integrity and ensure smooth backend communication.
- Conducted performance testing using JMeter to evaluate system performance under varying load conditions.
- Integrated Jenkins with Git and Maven to enable seamless test execution within CI/CD pipelines.
- Verified data integrity across test scenarios by performing database validations with SQL queries.
- Executed mobile web testing using Java Selenium with browser emulators to ensure consistent application behavior across mobile browsers.
- Collaborated closely with developers, business analysts, and product owners in Agile/Scrum environments, actively contributed to sprint planning, and participated in daily stand-up meetings.

## EXPERIENCE

| | | |
|---|---|---|
| Colan Infotech Private Limited | Senior QA Consultant | Oct 2021 - Till Present |
| NTT Data Services | Customer care Senior | Nov 2020 to Oct 2021 |

## EDUCATION

**BCA - 2014**

Alpha Arts & Science College

## EXPERTISE

- Core Java
- J-Unit
- Agile
- J Meter
- Postman API
- Selenium WebDriver
- GIT
- POM
- SQL
- Rest Assured
- PlayWright
- Maven
- Jira
- Android Testing
- Agile Environment
- Cucumber
- TestNG
- Jenkins
- Mobile Testing

## PROJECTS HANDLED

## COLAN INFOTECH PRIVATE LIMITED

**Project Name: Home depot**
**Testing: Manual & Automation**
**Description:** The Home Depot caters to do-it-yourselfers, as well as home improvement, construction and building maintenance professionals. The Home Depot Canada operates 182 stores in convenient locations across Canada. Stores average more than 100,000 square feet, with approximately 20,000 square feet of outdoor seasonal space. Stores stock as many as 40,000 home improvement products, tailored to the communities they serve.

## ROLES & RESPONSIBILITIES

- Reviewed business requirements and developed test scenarios, test cases and automation scripts for e-commerce processes, including product search, cart management, checkout, order processing and returns.
- Designed and executed automation scripts using Selenium WebDriver, Java and Cucumber BDD, ensuring seamless functionality across browsers and platforms.
- Conducted manual testing for UI, functional, regression, and end-to-end workflows.
- Tested API endpoints for order creation, payment processing, and inventory management using Postman and REST Assured to validate backend operations.
- Developed a Page Object Model (POM)-based framework, optimizing test script reusability and execution efficiency.
- Integrated automated test scripts with Jenkins for CI/CD.
- Performed mobile testing using emulators and real devices, ensuring a consistent shopping experience across mobile platforms.
- Logged and tracked defects in JIRA, collaborating with developers to resolve issues.
- Validated database transactions using SQL queries, ensuring data accuracy in customer accounts, orders, and payment records.
- Engaged in Agile ceremonies, including sprint planning, daily stand-ups, and retrospectives, ensuring continuous alignment with business and development teams.

**Project Name: CIBC (Canadian Imperial Bank)**
**Testing: Manual & Automation**
**Description:** The Canadian Imperial Bank of Commerce is a Canadian multinational banking and financial services corporation headquartered at CIBC Square in the Financial District of Toronto, Ontario. The CIBC (Canadian Imperial Bank of Commerce) project typically involves banking and financial services applications, focusing on areas like digital banking, credit processing, investment management, and customer security.

## ROLES & RESPONSIBILITIES

- Conducted manual and automation testing for various banking modules, ensuring seamless functionality across web and mobile platforms.
- Performed functional, regression, system integration, and cross-browser testing to validate banking operations, including digital transactions, loan processing, and customer account management.
- Executed SQL queries to verify backend data accuracy, ensuring correct transaction records, account details, and financial reporting.
- Automated critical banking workflows using Java, Selenium WebDriver and TestNG framework enhancing test coverage and execution efficiency.
- Validated payment gateway integrations, fund transfers, credit processing, and investment transactions to ensure smooth financial operations.
- Identified and logged defects in JIRA, collaborating with developers and stakeholders for quick resolution.
- Assisted in User Acceptance Testing (UAT) by preparing test scenarios, supporting end users, and verifying final system performance before production deployment.
- Integrated Jenkins, Git and Maven for CI/CD, enabling automated test execution and seamless deployment processes.
- Worked closely with business analysts, product owners, and developers in Agile/Scrum environments, contributing to sprint planning, daily stand-ups, and retrospective meetings.

## NTT Data services

**Description:** NTT Data Services is a global IT service provider, part of the NTT Group, specializing in digital, cloud, and IT services. With a strong presence across more than 50 countries, NTT Data delivers comprehensive solutions across various industries, including financial services, healthcare, and telecommunications. As a senior member of the customer service team, I contributed to providing exceptional service delivery while supporting digital transformation and IT solutions for clients worldwide.

## ROLES & RESPONSIBILITIES

- Delivered exceptional customer service by providing timely resolutions to customer queries, ensuring high customer satisfaction levels.
- Supervised and mentored junior team members, fostering a collaborative and high-performance work environment.
- Addressed and resolved customer complaints, concerns, and issues via phone, email, and chat, ensuring effective problem-solving and follow-up.
- Utilized diagnostic tools and techniques to identify and resolve service issues, providing feedback to relevant teams for continuous service improvement.
- Regularly prepared and presented performance reports, highlighting trends, areas of success, and opportunities for improvement.
- Ensured team adherence to NTT Data's quality standards, compliance policies, and customer handling protocols.
- Identified opportunities to streamline processes, reduce response time, and increase overall efficiency in service delivery.
- Utilized CRM software to track customer interactions, manage follow-up tasks, and ensure timely resolution of issues.

## AWARDS

- **Mentor of the Year** – For guiding junior testers, sharing knowledge and enhancing the team's capabilities.
- **Process Optimization Award** – Recognizing efforts in improving QA processes, reducing testing time and increasing accuracy.
- **Outstanding Quality Champion** – For consistently maintaining high-quality standards in software testing and defect prevention.

## STRENGTHS

- Attention to Detail
- Critical Thinking
- Problem-Solving
- Technical Proficiency
