OBJECTIVE:

Detail-oriented Manual Test Engineer **with** 5 years of experience **in** functional, regression, integration, and UAT testing**. Proficient in** Jira-Xray **for** test management and defect tracking**, with expertise in** test case design, execution, and documentation**. Executed** 5,000+ test cases**, identified** 1,000+ defects**, and ensured** 95%+ defect resolution before production**. Experienced in** database testing (MySQL), mobile testing (iOS & Android), and Agile environments**. Strong** analytical skills, customer focus**, and ability to deliver** high-quality software on time**. A** quick learner**, adaptable, and** ready to contribute as an immediate joiner**.**

PROFESSIONAL SUMMARY:

- **Over 5 years of experience** as a **Manual Test Engineer**, ensuring **top-notch software quality** through **meticulous test planning, execution, and defect management**.
- **Expert in Functional, Integration, Sanity, and Regression Testing**, with a keen eye for identifying critical defects and improving application performance.
- **Created and executed** over **2,500+ test scenarios** and **5,000+ test cases**, ensuring **comprehensive test coverage** across multiple applications.
- **Identified and reported** more than **1,000+ defects**, working closely with development teams for **quick resolution and quality enhancements**.
- **Hands-on experience with Jira-Xray**, effectively managing test cases, tracking defects, and collaborating with cross-functional teams for seamless project execution.
- **Recognized for delivering high-quality releases on time**, ensuring **zero post-production defects** in multiple critical projects.
- **Strong knowledge of SDLC, STLC, and Agile methodologies**, actively contributing to sprint planning and continuous process improvements.

TECHNICAL SKILL & EXPERTISE:

Category	Skills & Tools
Testing Types	Functional, Regression, Integration, System, Sanity, Smoke, UAT, Compatibility, Exploratory, GUI Testing
Test Management	Jira-X-ray, HP ALM, TestRail
Defect Management	JIRA, Bugzilla, HP ALM
Requirement Analysis	Test Scenario Identification, Requirement Traceability Matrix (RTM)
Database Testing	MySQL, Basic SQL Queries (SELECT, INSERT, UPDATE, DELETE, Joins)
Mobile Testing	iOS and Android devices (UI, Functional, Compatibility, Performance)
Web Technologies	HTML, CSS (UI validation)
Reporting & Documentation	Test Plans, Test Cases, Test Summary, Defect Reports
Agile Methodologies	Agile Scrum, Sprint Planning, Daily Stand-ups

PROFESSIONAL EXPERIENCE:

Project Details:

Role: Senior Test Engineer (QA)

Employer: Muthoottu Mini Financiers| **Domain:** Finance | **Product:** Finance - Gold Loan Management, Reporting, and Customer Onboarding

Duration: Sep '24 – At present | **Client**: Reputed NBFC for Gold Loans| **Team Size**: 10

Project Description:

Focused on optimizing Gold Loan Management by streamlining customer onboarding, loan processing, and financial reporting. Ensured seamless loan disbursement, accurate interest calculations, and regulatory compliance to enhance operational efficiency and customer experience.

Responsibilities:

- Executed and managed Manual Testing across **SIT, UAT**, and Production environments, ensuring accurate gold loan processing and identifying critical defects for timely resolution.
- Authored and maintained **500+ test cases in Jira-Xray**, covering loan application, eligibility verification, interest calculation, and repayment processing.
- Performed Regression Testing to validate new financial features, ensuring accurate **EMI calculations, late fee application, and foreclosure handling.**
- **Conducted Functional and Integration Testing on customer onboarding,** loan disbursement, and gold valuation processes to ensure data accuracy and system stability.
- Collaborated with cross-functional teams, including developers and business analysts, to verify loan eligibility criteria, credit checks, and document verification workflows.
- Documented comprehensive **test reports, defect logs, and execution results**, providing insights into financial compliance, risk analysis, and loan approval workflows.

Project Details:

Role: Software Test Engineer (QA)

Employer: Yosicare | **Domain**: HealthCare | **Product**: Yosi Care - Internet-Based Patient Intake services

Duration: Jan '23 – June '24 | **Client**: American hospitals | **Team Size: 14**

Project Description:

Focused on transforming patient experience by eliminating the traditional waiting room process. Streamlining pre-arrival paperwork and administrative workflows, Yosi Health reduces waiting times, enhances operational efficiency, and significantly improves the patient journey.

Responsibilities:

- **Executed and managed** end-to-end **Manual Testing** across **SIT, UAT, and Live Environments**, ensuring **seamless feature rollouts** and identifying **critical defects** for **timely resolution**.
- **Authored and maintained 500+ Test Cases per Cycle** in **Jira-X-ray**, covering **positive and negative scenarios** based on customer requirements from **Monday.com**.
- **Conducted Functional, Integration, and Compatibility Testing** to validate **system stability** across **Web and Mobile Platforms (iOS & Android)**.
- **Collaborated with Cross-Functional Teams**, including **Developers and Business Analysts**, to clarify requirements and improve **software quality**.
- **Improved System Efficiency by 80%** by streamlining **patient check-ins** across internal systems and **third-party EMRs** through **meticulous validation and defect tracking**.
- **Enhanced User Experience** by identifying and resolving **time zone issues** in **Telehealth Video Conferencing**, ensuring **accurate scheduling** and **seamless functionality**.
- **Documented Comprehensive Test Reports, Test Execution Results, and Defect Logs** to support stakeholders in making **informed decisions**.
- **Trained and Mentored Junior Testers**, ensuring **knowledge sharing** and best practices in **Manual Testing Methodologies**.

Role: Test Engineer
Employer: Crown Solutions- TCS **|** **Domain:** Banking **|** **Project:** Royal Bank of Canada
Duration: Nov '22 – Dec '23 **|** **Client:** Royal Bank Canada **|** **Team Size:** 8
Responsibilities:

- Collaborated closely with a major banking client**, handling manual testing** for critical financial modules, ensuring compliance with banking regulations.
- Performed regression, smoke, and sanity testing across loan processing, transactions, and account management to ensure seamless functionality.
- Executed and validated fund transfers, loan approvals, EMI calculations, and account statements to ensure data accuracy and transaction reliability.
- Actively reported and tracked defects in **JIRA**, ensuring timely resolution and maintaining comprehensive defect logs.
- Reviewed and validated use cases and user stories from JIRA, ensuring feasibility and accuracy in alignment with banking application requirements.

Role: Junior Test Engineer
Employer: Hexbedded Technologies **|** **Domain:** Healthcare **|** **Project: Role: Junior Test Engineer**
Employer: Hexbedded Technologies | Domain: Healthcare | Project: Advanced Healthcare system
Duration: June '2015 – Dec '2017 **|** **Team Size:** 5
Responsibilities:

- Executed manual testing based on business requirements from SRS, ensuring functional accuracy in healthcare applications.
- Performed basic performance testing using **JMeter,** analyzing system response times and load handling for patient portals and appointment systems.
- Identified and logged defects related to medical records, billing, and insurance claims, ensuring timely resolution with developers.
- Collaborated with senior testers and developers, gaining expertise in healthcare compliance standards like **HIPAA.**

EDUCATION QUALIFICATION:

Bachelor of Electrical and Electronics Engineering | 2011- 15 | Aggregate percentage: 70 % |
Institution: Kathir College Of Engineering, Coimbatore.
