OBJECTIVE

Software Test Engineer with 2 years of experience in both manual and automation testing. Proficient in Selenium, TestNG, JIRA, API testing, and CI/CD integration. Passionate about improving test efficiency through automation and ensuring robust software quality. Seeking an opportunity to work in an agile, innovation-driven environment where I can expand my technical skills and contribute to delivering high-quality applications.

SKILLS

- Manual Testing (Functional, Regression, UAT)
- Automation Testing (Selenium, TestNG)
- Black-Box Testing
- API Testing (Post Man)
- Java Selenium/Webdriver
- Performance Testing (JMeter, LoadRunner)
- Testcase Writing and Execution
- Bug Tracking (JIRA, Bugzila)
- Agile and Scrum Methodology
- CI/CD (Git)

EXPERIENCE

ServXGlobal Software Solutions Pvt Ltd.

09/2022 - 09/2024

SoftwareTest Engineer

- I conduct thorough cross-platform testing across web and mobile applications.
- Good experience in manual testing of web applications which is developed using like java.
- Writing functional and regression test cases.
- Configured TestNG XML for parallel and grouped test execution.
- Integrated TestNG with Selenium WebDriver for robust automation.
- Performing regression testing before the new release.
- Involved in Usability testing, Black box testing, Functionality testing, Regression testing, System testing and Compatibility testing Coordinated with the user group in accomplishing the UAT Testing.
- Designed and executed performance test scripts using Apache JMeter to analyze application response time.
- Conducted load, stress, and endurance testing to ensure system stability.
- Good knowledge on Non Functional testing and its types(load, stress and volume testing).
- Automated test cases for cross-browser testing using Selenium Grid.
- Conducted browser compatibility(Firefox, Chrome, Microsoftedge) testing of the applications.
- My responsibilities execution of test cases for developed features comprehensive, test plans, test cases and test scripts to ensure the quality and functionality of software applications.
- I actively contribute to the design and implementation of test automation framework and strategies, ther by enhancing efficiency and scalability.
- Used selenium webdriver to automate to regression testcase.
- Created and executed test cases, test plans, and test cycles in JIRA.
- Drafted detailed release notes highlighting new features, bug fixes, and enhancements.
