OBJECTIVE

Proficient React developer with one year of experience in front-end development, specializing in building high-performance and responsive user interfaces using React.js,Tailwind css, and TypeScript. Passionate about delivering scalable solutions and enhancing user experience by applying modern web development principles. Seeking a front-end developer role in a tech startup, particularly in the e-commerce domain, to contribute to cutting-edge projects, drive user engagement, and grow alongside a forward-thinking team.

EXPERIENCE

React.js Developer

SRK IT Solutions (2023 - Present)

- **Developed and maintained front-end features** using React.js, optimizing browser performance and ensuring responsiveness across various devices, which led to a 20% reduction in user-reported latency issues.
- **Utilized Material-UI framework** to create visually appealing and consistent user interfaces, accelerating development time by 30% through reusable components.
- **Implemented state management using hooks**, streamlining data flow and improving the application's stability, resulting in a smoother user experience during high-traffic scenarios.
- **Engineered efficient data-fetching mechanisms** to consume APIs and dynamically display content on the UI, reducing API call failures by ensuring robust error handling and loading state management.
- **Collaborated closely with back-end developers** to define API contracts and establish efficient communication protocols, reducing integration time by 15% and ensuring seamless data exchange.

PROJECT

HKART – Ecommerce website

Live Demo - https://fancy-bubblegum-96f080.netlify.app/

Product Catalog: Developed a responsive product catalog with pagination, ensuring seamless navigation even with large datasets by implementing efficient state management techniques.

Product Filtering: Designed and implemented advanced filtering options to allow users to refine product searches by categories, prices, and attributes, enhancing usability by reducing search times.

Shopping Cart: Engineered a dynamic shopping cart system with real-time subtotal and total price calculations, using optimized event handling to ensure fast updates.

Responsive Design: Utilized Material-UI and responsive design principles to deliver a consistent experience across devices, overcoming challenges related to cross-browser compatibility.

Methodology: Adopted a component-driven architecture to ensure modularity and scalability. Used performance monitoring tools like Lighthouse to optimize loading times and user experience.

BrainIQ - Quiz Game

Live Demo - https://fastidious-tiramisu-e542f0.netlify.app

- Developed a BrainIQ quiz game using Next.js and Tailwind CSS.
- Implemented category selection feature allowing users to choose preferred topics.
- Integrated question generation based on selected categories.
- Designed and programmed a scorecard to display users' quiz results.

SKILLS

HTML - Proficient in developing interactive, user-friendly websites using HTML5 for enhanced semantic clarity and cross-device compatibility.

TAILWIND CSS - Experienced in utility-first CSS with responsive design principles, custom themes, and grid layouts. Successfully implemented Tailwind CSS in production-level projects.

TYPESCRIPT (TSX): Proficient in TypeScript for building type-safe React applications. Experienced in creating reusable components, ensuring strict type-checking, and enhancing maintainability of large codebases.

REACT JS - Advanced proficiency in React.js, including Hooks, React Router, and integrating third-party libraries such as Axios API. Delivered optimized React components for scalable web applications.

NEXT JS - Skilled in Server-Side Rendering (SSR), API Routes, Dynamic Routing, and Image Optimization to enhance performance and SEO of web applications.

REDUX – Hands-on experience with Redux for state management, including designing actions and reducers for complex application workflows.

SQL - Proficient in SQL with expertise in performing INSERT, DELETE, UPDATE, and using INNER JOIN for data manipulation and retrieva
