Professional Summary:

- QA Engineer with 2.5 years of experience in LOS, financial applications, and cloud-based workflow automation (NPCI).
- Good in manual testing & black box testing.
- Having experience in defect tracking & bug reporting.
- Good exposure in all phases of Software Development Lifecycle (SDLC/STLC).
- Software experience in identify Test Scenarios, Testcase Designing and Testcase Preparing.
- Good exposure into the Functionality, Compatibility, Database and Regression
- Understanding Software Requirement Specification and identifying the required Test Experience in executing Test Cases to test the application functionality.
- Good knowledge in Defect Reporting and Tracking using Automation Tools JIRA, BUGZILLA
- Good understanding of RDBMS concerns like(constraints, normalization ,tables etc...)
- Good knowledge of writing SQL queries and also having experience in using PLSQL
- Goodknowledgeof DDL,DML,TCL.
- HavingexperienceonhittingAPI(usingGET,POSTmethods)
- Having experience in using SOAPUI
- Having experience in **Automation testing**.

Quality Specialist Engineer
Cavintek Software Private Limited — *Oct 2023 – Jan 2025*
Project: CFLOW (Cloud-Based Workflow Automation)
Platform: Web Browser
Testing Approach: Manual / Automation
Role: QA Engineer
Description:
Cflow is a cloud-based workflow automation (No-Code BPM) software used to automate complex business processes, including document management, approval flows, and compliance processes. It is deployed in critical environments like **NPCI** for streamlining financial operations, making it relevant to financial services workflows similar to **Loan Origination processes.**
Responsibilities:

- Designed and executed comprehensive test cases based on business and functional requirements.
- Conducted end-to-end functional, regression, and integration testing across Test, UAT, and Production environments.
- Performed API testing for integrations with third-party applications, ensuring seamless workflow connectivity.
- Utilized defect tracking tools (e.g., Trello, kanban) for issue reporting, root cause analysis, and tracking defect life cycle.
- Participated actively in Agile sprint ceremonies (daily standups, sprint planning, retrospectives).
- Automated key workflows and sanity checks using Selenium with Java, contributing to faster regression cycles.
- Worked on workflows involving multi-level approvals, document routing, and compliance checks**,** similar to LOS processes like underwriting and verification.

Software Tester,
HDB FINANCIAL SERVICES, CHENNAI.
PROJECT 1:
Project Title: HDB OnTheGo

Platform: Android, iOS, Web browsers

Testing Approach: Manual

Role: QA engineer
