- Experience in Manual **Mobile Testing** using Browser Stack
- Experience in creating, modifying and enhancing manual Test Cases.

- Good hands-on experience with designing test cases covering all test conditions and eliminating redundancy and duplications.

Technical Summary:

Programming Languages	Core Java
Test Management Tools	QMetry, TestRail
Automation Testing Tool	Selenium
IDE	Eclipse
Test Framework	TestNG, Cucumber (BDD), POM, Data Driven
Testing Methodology	Agile Methodology, Waterfall Model
Build & CI/CD Tools	Maven & Jenkins
Web Technologies	HTML, XML
Version Control	GitHub
Bug Tracking Tools	JIRA, Version One
API & Database	Postman, SQL Basics

Education details:

Completed **Bachelor of Mathematics** from Kongu Arts and Science, Erode.

Professional Experience:

Worked in **Infosys Limited** (2021 May till Present)

Project details:

PROJECT 1:

Domain : E-Commerce
Client : Adidas AG
Technology : Selenium WebDriver, Core JAVA, Cucumber, Postman, GitHub, Jira, Jenkins, Agile Methodology.
Duration : 2022 March – till Date.

Description:

Adidas AG is a German athletic apparel and footwear corporation headquartered in Germany. Merchandizing application is a web application for range planning and merchandise in a production environment. The purpose of this project was to automate the test cases for application by using Selenium, Maven as build management and TestNG as test management tools.

.

Roles & Responsibilities:

- Experience in using automation tools & frameworks like Selenium.
- Analyse and study Functional Specification document.
- Assist in QA Plan document preparation.
- Responsible for Writing test scenarios and test cases.
- Provide issue status reports.
- Execution of test cases.
- Actively participated in daily standup call and Sprint review meeting and Retrospective meeting.
- Responsible for getting clarifications from development team about defects.
- Identifying test cases for regression suite and updating the script accordingly.
- Responsible for performing Functional testing, Re-testing and Regression testing.
- Having experience in Cucumber, GitHub, Maven, and Jenkins.

PROJECT 2:

Domain : E-Commerce
Client : Tractor Supply Company, USA
Technology : Selenium WebDriver, Core JAVA, TestNG, Postman, GitHub, Version One, Jenkins, Waterfall model.
Duration : 2021 August – 2022 February

Description:

The project is an American chain store that sells home improvement, agriculture, lawn and garden maintenance, livestock and pet care equipment and supplies. The Module which I had handled were Log in, sign up, Wishlist, Save for Later, Cart page, Checkout page, Payments.

Roles and Responsibilities:

- Analysing the User Stories and planning the User Stories to be completed in the Sprint.
- To Identify the test cases that need to be automated.
- To Test manually and identify the defects.
- To read all the documents and understand what needs to be tested.
- Responsible for preparing test scenarios and writing Test scripts for regression and functional testing Using TestNG Framework.
- Inspect the X-path of the Web Element.
- Participating in all the agile ceremonies - Sprint Planning, Daily scrum calls, Sprint review, and Sprint retrospective.
- Identify the Bugs and report the defects to development team through JIRA.
- Re-testing the Resolved defects.
- Client Interactions through e-mails and conference calls.
- Preparing the Test Summary Reports.
- Pushing the code to Git code repo.
