Philo John

Rams Ark, Tirunelveli - 627007 • (91) 8220477028 • philojohn2115@gmail.com

Highly skilled **QA Tester** with extensive experience of 5+ years in **API testing**, **regression testing**, and **automating new feature scenarios** using tools like **Ready API**, **Selenium WebDriver**, and **Jenkins**. Proficient in **Agile methodologies**, working with **VersionOne** to manage **sprint stories** and ensuring smooth **cycle-wise testing** and **production releases**. Expertise in **label certification testing** for logistics applications, **self-healing automation frameworks** using **Healenium**, and performing **cross-browser testing**. Strong background in **manual testing**, **defect tracking with HP ALM**, and integrating **CI/CD pipelines** for continuous testing. Collaborative team player with a focus on delivering high-quality software solutions aligned with business objectives.

Experience

2019 - PRESENT
Automation Tester | Atos | Tirunelveli

- **API Testing Expertise**: **Automated** new feature test scenarios using Ready API, Postman, and Insomnia, **reducing manual testing effort by 40%**. **Performed API testing** for multiple applications, focusing on Regression and Label Generation functionalities, **improving test coverage by 30%**.
- **Agile Methodologies**: **Actively participated in Agile practices**, leveraging VersionOne to track and manage sprint stories and tasks, ensuring **100% sprint completion rate** and improving team efficiency by **20%**. Collaborated in planning, executing, and testing cycle-wise functionalities, ensuring smooth releases to production and alignment with sprint goals.
- **Label Certification Testing**: **Led label certification testing** for logistics applications, ensuring compliance with industry standards, and **reducing defects by 25%** before release.
- **Manual & Regression Testing**: **Designed and implemented** automated test scripts using JavaScript-based tools like Selenium WebDriver, resulting in **a 50% faster test execution time** to ensure functionality, reliability, and performance prior to automation. Leveraged Jenkins to streamline regression testing workflows.
- **Automated Test Development**: **Designed and performed** automated test scripts using JavaScript-based tools like Selenium WebDriver, resulting in **a 50% faster test execution time**.
- **Self-Healing Test Automation**: **Developed a self-healing test automation framework** using Healenium, reducing maintenance time by **35%**, reducing test maintenance effort and enhancing resilience against UI changes.
- **Cross-Browser Testing**: **Executed cross-browser testing** across multiple platforms, ensuring **99% compatibility** for end-users.
- **Team Contributions**: **Contributed to the Rating Applications Team**, validating complex shipping rate calculations, and ensuring **100% accuracy** in rate determination using JavaScript in Postman and Jenkins. Worked with the **Tracking Applications Team**, verifying real-time tracking updates provided to customers for enhanced transparency and user experience. **Played a key role in an Internal Generative AI Project**, collaborating to integrate AI-driven tools, which improved test case generation efficiency by **60%**.
- **Defect Management**: **Managed defects effectively using HP ALM**, reducing defect resolution time by **20%**.

- **Version Control & CI/CD Pipelines**: **Maintained and managed** test scripts in GitHub, streamlining version control processes and enabling **seamless collaboration across teams**. (e.g., Jenkins/GitHub Actions) for continuous testing.
- **VBScript Expertise**: **Automated regression and functional test cases** using VBScript for legacy systems, **cutting down manual effort by 50%**.
- **Log Analysis & Debugging**: **Utilized Splunk for log analysis and debugging**, identifying issues **30% faster**, leading to quicker resolutions.

Skills

Automation Testing • Defect Management • Team player • Excellent time management skills • Multitasking • Agile Testing • Selenium WebDriver

Technical Skills

- AUTOMATION TESTING TOOLS: Ready API, Jenkins, GitHub, Postman, Selenium.
- LANGUAGES/FRAMEWORKS: Java, Data Driven, Page Object model, VB, JavaScript.
- TOOLS: HP ALM, Version 1, Splunk, Ready API, Postman, Insomnia, Eclipse, Excel, Selenium WebDriver.
- REPOSITORY: SharePoint, Microsoft OneDrive.
- DOMAIN KNOWLEDGE: Logistics, Ecommerce.
- DOCUMENTATION: Microsoft office (Excel, Word, and PowerPoint), Notepad++

Education

APR 2019
Bachelor of Computer Science Engineering | St. Xavier's College | Nagercoil

MAY 2015
High School | St. Ann's School | Panagudi
