- Contributed to the development of **Lead Generation** strategies by accurately capturing research data.

PROJECTS

1. Hospital & Health Care (Manual Testing)

Overview: Pivotal is a platform that collects and visualizes key healthcare data, highlighting relationships between different datasets to provide valuable insights for healthcare organizations.

Responsibilities:

- Created and modified User Acceptance Test Cases based on requirements.
- Conducted Functional and System Integration Testing of the healthcare data visualization platform.
- Tracked defects and collaborated with the team to ensure timely fixes.

2. Drug Development and Clinical Management (Manual Testing)

Overview: A cloud-based application for developing and validating analysis reports to support regulatory submissions for new drug approvals, using data from clinical trial patient datasets.

Responsibilities:

- Developed Test Scenarios and Test Cases for testing the clinical management application.
- Validated clinical trial data through rigorous Regression Testing and defect tracking.

3. Clinical Analytics Platform (Manual Testing)

Overview: Deployed a secure cloud-based healthcare product, integrated third-party applications, and migrated legacy medical records while ensuring data integrity and confidentiality.

Responsibilities:

- Evaluated functionality of Windows-based, third-party, and healthcare applications.
- Tested server connections and verified data integrity using logs.
- Developed Regression Cycles for every new Agile Sprint.
- Designed and executed test cases to validate application functionality in test environments.

PROFESSIONAL QUALIFICATION

- **Master of Computer Applications (MCA)**
  Banner Amman Institute of Technology, Sathyamangalam (2014 - 2016)
