SOFTWARE TESTING (SDET) EXPERIENCE

*Overall, 3.5 Years of experience in IT industry with 1.8 years of **Functional Testing, Database Testing, API Testing using Postman and 2+** years of experience in Web Automation Testing/Maintenance (Selenium/Java) and **Agile project management process** experience in **Manufacturing domain**.*

- **3.5+ Years of industry experience in the area of Software Testing (Functional Testing, Database Testing and API Testing)** with a solid understanding of **agile methodology**, Effort Estimation, Test Planning, Test Design, Test Execution and Defect Reporting & Tracking.
- Strong Experience in **UX Testing, UI Testing, API Testing, Functional Testing** and **Web Application Testing.**
- Good Experience in **SQL and Data Base Testing** using **MySQL, PG Admin** tools.
- Good experience in **Java Programming**, **Selenium** and **TestNG framework**.
- Experience in **Page Object Model**, **Cross browser testing** and **Test Execution** using **Selenium**
- Well, acquainted with all phases of **Agile testing methodology**, **Sprint Structure, PI Planning, Daily Scrum, Retrospection, SDLC** and **Software Testing Life Cycle (STLC).**
- Strong Experience in **Testlink Test Management tool (**Task Creation, Defect management, requirement planning and other activities.)
- Good experience in managing and **working with multiple organizations/resources in a global workforce environment**.
- I have proven track record with **peer reviews, break throughs, inspections, audits** and well experienced in creating and syndicating detailed **Test metrics.**
- Conducting **root cause analysis** on post release defects and implementing **corrective action** and **process improvements**.
- Managing risks and issues via **effective prioritization, escalation, impact assessment** and **action plan** development.
- Involvement in **Project Planning, Project Road Map Discussions, Business Brain Storming Discussions, Test Estimations, Test strategy implementation, Creation of Test Plans and Test Reports.**
- Fostering team work and communication to achieve project objectives.
- **Self- motivated, highly energetic** and **ethical** in all work-related assignments thus able to immediately contribute to corporate goals and objects.
- Good written, communication, interpersonal skills, proven team player with an analytical mind bent to problem solving and delivering solutions.

PROFESSIONAL EXPERIENCE

Eigital Group — Jul 2023 – Present

Designation: Automation Test Engineer

Company Profile:
Customize our solutions to your business requirements and seamlessly integrate them with your IT processes. Our global, time-tested delivery models and our experienced engineers enable you to achieve more, faster and for less money.Ensure your products and services are what you want them to be and what your customers expect. our AI-led QA services, based on our extensive QA experience and expertise, guarantee your quality, efficiency and peace of mind. Business-driven Quality Engineering As an integrated quality engineering partner, we'll help you achieve business assurance, harness the power of AI and automation, and embrace the culture of quality orchestration across your business, technologies and operations**.**

Key Result Areas:

Enhanced test coverage by 30% through the development of comprehensive **Automated test suites**.

Improved **software reliability** and user satisfaction by identifying and addressing **Critical performance bottlenecks.**

Performed functional, regression, and performance testing on various POS emulator devices.

Analyzed test results and collaborated with the **development** team to debug and fix issues**.**

PROJECTS UNDERTAKEN

Project 1:

Company	**Eigital (Redifing Digital)**
Title	**ETOS (Restaurant Software)**
Team	**Release Team (10)**
Client	Restaurant Company.
Tools	Git hub, Power Automate(Analytic), Selenium Web-driver(java), Coda, Postman, POS, Emulators machine.
Role	Automation Test Engineer
Duration	July 2023 to Present
Description	Conduct comprehensive Testing of software applications on POS emulator devices to ensure seamless functionality and user experience
Responsibilities	• System testing, System Integration testing, Test Reporting, Defect Management, Change Requests of the Application. • Develop and maintain automated test scripts using Selenium Web Driver for testing restaurant POS Systems. • Collaborate with development and QA teams to identify and resolve software defects and Performance issues. • Document and report test results, bugs, and performance issues to stakeholders. • Successfully identified and resolved critical software bugs, enhancing the overall performance of the POS systems Analyzing bugs go through various changes for feature deployment. • Various Reporting methodologies for defect tracking in Jira. • Played a key role in the launch of a new POS software version, ensuring a smooth and bug-free release.

Denovo Group Dec 2021 – Jul 2023

Designation: Software Test Engineer

Company Profile:
Customize our solutions to your business requirements and seamlessly integrate them with your IT processes. Our global, time-tested delivery models and our experienced engineers enable you to achieve more, faster and for less money.Ensure your products and services are what you want them to be and what your customers expect. our AI-led QA services, based on our extensive QA experience and expertise, guarantee your quality, efficiency and peace of mind. Business-driven Quality Engineering As an integrated quality engineering partner, we'll help you achieve business assurance, harness the power of AI and automation, and embrace the culture of quality orchestration across your business, technologies and operations.

Key Result Areas:

- Offering the customers outstanding experiences with expert digital engineering solutions, including DevOps, product engineering, AI & data analytics, digital EdTech, enterprise application engineering services, and more.
- Achieve highest-level compliance with regulations and NERC-CIP standards.
- Boosting efficiency, optimize distribution and enhance customer experience with our unparalleled expertise in real-time operational technology/information technology (OT/IT) implementations.

Project 1:

Company	**Denovo Group**
Title	**Software test engineer**
Team	**QA Team (20)**
Client	Hong kong based.
Tools	Test link , Jira , Cloud Putty,Swagger, Selenium IDE/Web driver, Postman.
Role	Software Test Engineer
Duration	Dec 2021 to Jul 2023

Description Company Title Denovo Lab (Voip Software) Class 4 Fusion is an innovative all-in-one solution capable of integrating all business work flows through a platform. • Routing • Switching • Billing • Client Portal • Vendor Portal • Agent Portal.

Responsibilities

- To Involved in QA Activities Like Test Planning, Requirement Analysis, Creation of Test Trace ability Matrix, Test Case preparation . • Coordination with the sub-platforms, QA Environment team and development team for the Defect fixes and CR's.
- To Performed Exploratory, Ad hoc,Smoke ,Sanity and Regression Testing for release through deploy
- To analyse Bugs through critical thinking for feature Teams.
- Assist various features try explore enhance the unassigned part of testing.
- Preparation of Test Plan, Test Design, Test Execution and Defect Reporting & Tracking.
- To Perform analytic Test cases for the future upgrades.
- Validating API Connections: APIs set up correctly are often the reason why your applications function as expected. And in this technology-driven world, your users expect APIs in your software applications to work 100% of the time. By running API testing automation within your QA practices, your team has a simpler, more convenient way to verify API connections to maintain the product.

Aggregate Intelligence: June 2020 – Dec 2021

Designation: Quality Analyst

Company Profile:
The Aggregate Intelligence database management system is the perfect solution to support your growing business and workshop with powerful yet simple-to-use tools for the everyday workings of your data and advanced measurement and reporting facilities to ensure you have a close eye on exactly how well your business is performing from anywhere in the world.
Aggregate Intelligence has not only been built with data in mind but has been built with Client relation to ensure every feature is exactly what you'll need and more and that the performance reporting tools really do work to get the best from your work force.

Key Result Areas:

- Involved in Preparation of estimates for overall QA team involved in the project, Scrum Planning, Project requirement analysis, Creation of Test Trace ability Matrix, Test Case preparation, System testing, System Integration testing, Database testing, Test Reporting, Defect Management, QA Automation Test Execution Change Requests of the application.
- Coordination with QA Environment team and development/DBA teams for the Defect fixes and CR's.
- Daily Scrum calls, Sprint meetings with the Business team and sending the Daily/Weekly Status Reports on Project Progress.

PROJECTS UNDERTAKEN

Project 1:

Company	**Aggregate Intelligence**
Title	**Fare track (Data Management Software)**
Team	**10**
Client	**Airlines**
Tools	**Bug tracker, Nosql, Postman**
Role	**Quality Analyst**
Duration	**June 2020 to Dec 2021**

Description The data management software helps in organizing the information and services for all the air flights and can be used across all the regions in the country and also provides interaction with other 3rd party applications.

Responsibilities

- Preparation of Test Plan, Test Design, Test Execution and Defect Reporting & Tracking.
- QA Automation test execution of new application changes/existing script maintenance by using Selenium automation tool
- Bug tracker and Defect Management for the application upgrades
- Managing the overall scope of project

- Co-coordinating with Upstream and Downstream applications, development team and all the supporting teams
- Preparation of Estimates for overall QA team involved in the project.
- Weekly and Daily Status Reports on Project Progress
- Weekly and Daily Scrum calls, Sprint meetings, Retrospective meetings with the Business team

Wilco Solutions IT **Nov 2019 – Jul 2020**

Designation: Software Engineer Trainee (Intern)

Company Profile:

Wilco solutions is a global leader in partnering with companies to transform and manage their business by harnessing the power of technology. The Group is guided everyday by its purpose of unleashing human energy through technology for an inclusive and sustainable future. It is a responsible and diverse organization of 1,000 team members in nearly countries. With its strong 20 year heritage and deep industry expertise, Wilco solutions IT is trusted by its clients to address the entire breadth of their business needs, from strategy and design to operations, fueled by the fast evolving and innovative world of cloud, data, AI, connectivity, software, digital engineering and platforms**.**

Key Result Areas:

- Involved in QA Activities Like Test Planning, Requirement Analysis, Creation of Test Trace ability Matrix, Test Case preparation, System testing, System Integration testing, Test Reporting, Defect Management, Change Requests of the application.
- Coordination with the sub-platforms, QA Environment team and development team for the Defect fixes and CR's.
- Weekly and Daily Status meetings with the Business team and sending the Daily/Weekly Status Reports on Project Progress**.**

PROJECTS UNDERTAKEN

Project 1

Company	**Wilco Solutions IT**
Title	**Hospital software Consumer Database**
Team	**5**
Client	**Brinnova hospitals**
Tools	**Test link , Selenium web driver, mySQl , Postman.**
Role	**Software engineer(QA)**
Duration	**Nov 2019 to July 2020**

Description The project deals with storing and maintaining the client's consumer data which is extracted from multiple source systems into Sql database and verifying the same in application UI**.**

Responsibilities

- Preparation of Test Plan, Test Design, Test Execution and Defect Reporting & Tracking.
- Database testing on using PG Admin.
- Test link and Defect Management for the application upgrades
- Weekly and Daily Status Reports on Project Progress
- Weekly and Daily Status meetings with the Business team

EDUCATIONAL CREDENTIALS

2020 Bachelor of Technology in Computer Science from JNT University, Hyderabad, India

Certifications (Naresh IT)

- Selenium
- Java
- Sql

Extra-Curricular Accolades

- Received Appreciation from Whole Team **EIGITAL** Group for dedicated excellence through findings on **Critical bug**s .
- Recipient of '**Innovative Award**' for optimizing the testing effort using innovative tools and techniques in **Aggregate Intelligence**
- Recipient of ' **Great learner award** ' for optimizing the testing effort using innovative tools and techniques in **WilcoSolutionsIT**.
- Recipient of '**Dedicated volunteer of the yea**r' from **Wilco Solutions** outreach team**.**

Declaration

I hereby declare that the above-cited particulars are true to the best of my knowledge and belief.

Date:
Yours Sincerely, Saif Ali .
Place: Hyderabad
