Selva Balakumar

QA AUTOMATION ENGINEER

Experienced QA Engineer with expertise in Selenium automation, Java, and C#. Seeking to leverage skills in manual and automated testing of web and mobile applications, API testing, and performance evaluations. Proficient in utilizing tools like JIRA, Azure DevOps, TestNG, Postman, and JMeter to ensure software quality and reliability. Adept at working in Agile environments, collaborating with cross-functional teams, and contributing to the development of efficient testing frameworks. Passionate about optimizing testing processes, enhancing automation strategies, and ensuring seamless software delivery.

SKILLS

Java
C#
Selenium Automation
Playwright Automation
TestNG Framework
Cucumber Framework
JMeter Performance
Load Testing
Postman API
Swagger API
Rest Assured API
SQL Database
GitLab Version Control
BDD Framework
Hybrid Frameworks
Python

EXPERIENCE

QA Automation Engineer

OneData Software Solutions *Oct 2023 - Present*

- Developed and maintained automated test scripts using Selenium WebDriver with Java in a hybrid framework, ensuring efficient testing of web applications.
- Implemented the Cucumber framework for behavior-driven development (BDD), collaborating with development and business teams to define and automate test scenarios.
- Automated traceability of user stories, acceptance criteria, and test cases by integrating CI/CD pipelines and BDD frameworks.
- Utilized JMeter for performance testing, designing and executing test plans to evaluate system performance under various load conditions, including stress, load, and endurance testing.
- Designed and executed performance testing using JMeter, ensuring application scalability, response times, and system reliability under various load conditions.
- Developed JMeter test scripts for API performance testing, identifying bottlenecks and optimizing system efficiency.
- Conducted ETL testing to validate data extraction, transformation, and loading processes, ensuring data integrity and consistency.
- Performed data validation between different database environments, ensuring accurate data migration and transformation.
- Identified and resolved data discrepancies, improving data reliability across multiple systems.
- Conducted manual testing as needed, including exploratory testing, ad-hoc testing, and regression testing, to ensure software quality.
- Performed mobile application testing (functional, usability, and compatibility) across different operating systems and devices, ensuring quality and reliability.
- Participated in Agile ceremonies such as sprint planning, daily stand-ups, and retrospectives, providing input on testing strategies and progress.
- Identified, reported, and tracked software defects to resolution, ensuring overall product quality.
- Collaborated with developers to reproduce and debug issues, facilitating quick resolution and deployment.
- Documented test cases, test plans, and test results to ensure comprehensive test coverage and traceability.
- Implemented CI/CD pipelines using GitLab, automating build, test, and deployment processes to enhance development efficiency.

- Contributed to writing user stories to accurately capture product requirements.
- Leveraged expertise in QA methodology and Agile frameworks to drive quality throughout the software development lifecycle.
- Engaged in user acceptance testing (UAT) for mobile applications, working with stakeholders to confirm that features met business requirements.
- Managed API requests and collections in Postman, ensuring thorough testing of endpoints and handling various authentication methods.
- Used Swagger for API documentation and testing, leveraging its interactive features to test API endpoints effectively.
- Developed automation for billing services using Playwright with Python, enhancing efficiency and reducing manual effort.

Software Test Engineer

Kasadara Technology Solutions *Jul 2022 - Oct 2023*

- Implemented and maintained a Selenium C# automation framework, streamlining regression testing processes and achieving a 40% reduction in testing time.
- Conducted comprehensive manual testing for web applications, identifying and documenting defects to ensure software quality standards were met.
- Utilized Azure DevOps for bug tracking and collaborated with development teams to prioritize and resolve issues promptly.
- Participated in Agile ceremonies such as daily stand-ups, sprint planning, and retrospectives to facilitate effective communication and achieve sprint goals.
- Conducted post-release and post-implementation testing to validate software functionality and performance.
- Integrated automated tests into CI/CD pipelines using Jenkins, ensuring continuous testing and deployment of software changes.
- Arranged test environments and coordinated with cross-functional teams to ensure smooth testing processes.
- Assisted in the creation and maintenance of test documentation, including test plans, test cases, and test reports.
- Contributed to the continuous improvement of QA processes and methodologies, enhancing overall software quality and efficiency.
- Prepared Automation Test Plans for Service Level Tests, Integration Tests, and UI tests to ensure thorough testing coverage.
- Reviewed product owner acceptance criteria and identified non-functional requirement gaps to address.
- Contributed to release/iteration planning, smoke testing, feature testing, and regression test planning to ensure comprehensive test coverage.
- Developed test plans, test cases, and test scripts based on project requirements and design specifications.
- Conducted manual and automated testing to validate application functionality, usability, and performance.
- Collaborated with cross-functional teams to ensure alignment on project objectives and deliverables.
- Identified and reported defects, tracked their resolution, and verified fixes.
- Utilized Rest Assured for automated API testing, writing and running tests to validate RESTful web services.
- Developed automated test scripts with Rest Assured to verify API functionality, performance, and security.

SoftwareTester Intern

Object Frontier Software *May 2019 - Jul 2019*

- Assisted in writing test cases for client applications, ensuring comprehensive coverage of functional and non-functional requirements.
- Conducted manual testing of software applications to identify defects and inconsistencies in functionality, usability, and performance.
- Participated in test plan and test case reviews, contributing to the improvement of testing processes and methodologies.
- Gained hands-on experience with automation testing tools and frameworks, exploring opportunities to automate repetitive testing tasks.
- Worked closely with senior automation engineers to learn best practices and techniques in automation testing.

- Documented test results and reported issues using project management and bug tracking tools.

EDUCATION

BTech, Computer Science and Engineering
Karunya Institute of Technology and Sciences *Aug 2016 - May 2020*

HSC
Mahatma Montessori School *Apr 2016*

SSLC
Mahatma Montessori School *May 2014*

CERTIFICATION

Software Testing Course
Refinement Software Solutions

Cucumber, Postman, Rest Assured API
Udemy
