Selva Balakumar

QA AUTOMATION ENGINEER

Experienced QA Engineer with expertise in Selenium automation, Java, and C#. Skilled in manual and automated testing of web and mobile applications, API testing, and performance evaluations. Proficient in utilizing tools like JIRA, Azure DevOps, TestNG, Postman, and JMeter. Adept at collaborating in Agile environments, ensuring quality throughout the software lifecycle, and contributing to the development of robust testing frameworks.

SKILLS

Java
C#
Selenium Automation
Playwright Automation
TestNG Framework
Cucumber Framework
JMeter Performance
Load Testing
Postman API
Swagger API
Rest Assured API
SQL Database
GitLab Version Control
BDD Framework
Hybrid Frameworks
Python

EXPERIENCE

QA Automation Engineer

OneData Software Solutions *Oct 2023 - Present*

- Developed and maintained automated test scripts using Selenium WebDriver with Java in a hybrid framework, ensuring efficient testing of web applications.
- Implemented the Cucumber framework for behavior-driven development, collaborating with development and business teams to define and automate test scenarios.
- Supported automating traceability of Stories, Acceptance Criteria, and Test cases through the integration of CI and BDD frameworks and tools.
- Utilized JMeter for performance testing, designing and executing test plans to evaluate system performance under various load conditions.
- Performed manual testing as needed, including exploratory testing, ad-hoc testing, and regression testing to ensure software quality.
- Participated in sprint planning, daily stand-ups, and retrospective meetings, providing input on testing strategies and progress.
- Identified and reported software defects, tracked their resolution through to closure, and ensured overall product quality.
- Worked closely with developers to reproduce and debug issues, facilitating quick resolution and deployment.
- Documented test cases, test plans, and test results, ensuring comprehensive test coverage and traceability.
- Implemented CI/CD pipelines using GitLab, automating the build, test, and deployment processes to enhance development efficiency.
- Conducted manual testing for mobile applications, including functional, usability, and compatibility testing, ensuring the quality and reliability of mobile applications across different operating systems and devices.
- Contributed to the writing of user stories to capture product requirements accurately.
- Utilized expertise in QA methodology and Agile frameworks to drive quality throughout the software development lifecycle.
- Engaged in user acceptance testing (UAT) for mobile applications, working with stakeholders to confirm that mobile app features meet business requirements.
- Designed and executed performance test plans for E-commerce, including stress, load, and endurance testing to evaluate system performance under various conditions.
- Configured JMeter to simulate multiple users and generate substantial load, assessing application scalability and responsiveness.
- Analyzed JMeter test results to identify performance bottlenecks, providing detailed reports and actionable recommendations for optimization.
- Managed API requests and collections in Postman, ensuring thorough testing of endpoints and handling various authentication methods.

- Applied Swagger for API documentation and testing, using its interactive features to test API endpoints.
- Developed automation for billing services using Playwright with Python, enhancing efficiency and reducing manual efforts.

Software Test Engineer

Kasadara Technology Solutions *Jul 2022 - Oct 2023*

- mplemented and maintained Selenium C# automation framework to streamline regression testing processes, achieving a 40% reduction in testing time.
- Conducted comprehensive manual testing for web applications, identifying and documenting defects to ensure software quality standards were met.
- Utilized Azure DevOps for bug tracking and collaborated with development teams to prioritize and resolve issues promptly.
- Participated in daily stand-ups, sprint planning, and retrospective meetings to facilitate effective communication and achieve sprint goals.
- Conducted post-release and post-implementation testing to validate software functionality and performance.
- Integrated automated tests into CI/CD pipelines using Jenkins, ensuring continuous testing and deployment of software changes.
- Arranged test environments and coordinated with cross-functional teams to ensure smooth testing processes.
- Assisted in the creation and maintenance of test documentation, including test plans, test cases, and test reports.
- Contributed to the continuous improvement of QA processes and methodologies, enhancing overall software quality and efficiency.
- Prepared Automation Test Plans for Service Level Tests, Integration Tests, and UI tests to ensure thorough testing coverage.
- Reviewed product owner acceptance criteria and identified non-functional requirement gaps to address.
- Contributed to release/iteration planning, smoke testing, feature testing, and regression test planning to ensure comprehensive test coverage.
- Developed test plans, test cases, and test scripts based on project requirements and design specifications.
- Conducted manual and automated testing to validate application functionality, usability, and performance.
- Collaborated with cross-functional teams to ensure alignment on project objectives and deliverables.
- Contributed to the improvement of testing processes and methodologies, driving efficiency and quality across projects.
- Identified and reported defects, tracked their resolution, and verified fixes.
- Utilized Rest Assured for automated API testing, writing and running tests to validate RESTful web services.
- Developed automated test scripts with Rest Assured to verify API functionality, performance, and security.

SoftwareTester Intern

Object Frontier Software *May 2019 - Jul 2019*

- Assisted in writing test cases for client applications, ensuring comprehensive coverage of functional and non-functional requirements.
- Conducted manual testing of software applications to identify defects and inconsistencies in functionality, usability, and performance.
- Participated in test plan and test case reviews, contributing to the improvement of testing processes and methodologies.
- Gained hands-on experience with automation testing tools and frameworks, exploring opportunities to automate repetitive testing tasks.
- Worked closely with senior automation engineers to learn best practices and techniques in automation testing.
- Documented test results and reported issues using project management and bug tracking tools.

EDUCATION

BTech, Computer Science and Engineering

Karunya Institute of Technology and Sciences *Aug 2016 - May 2020*

HSC

Mahatma Montessori School *Apr 2016*

SSLC

Mahatma Montessori School *May 2014*

CERTIFICATION
