Address : 39, shanmuganagar, thiruppuvanam, sivagangai - 630611

EDUCATION

Masters in Mathematics
Alagappa University

PERSONAL PROFILE

I am a passionate Software Test Engineer with a strong background in mathematics and hands-on experience in software testing, automation, and DevOps practices. I have a keen eye for detail and excel in identifying software issues, implementing test strategies, and ensuring high-quality software delivery. I am adaptable, quick to learn, and enjoy collaborating with crossfunctional teams to solve complex problems. I aim to contribute to the growth and success of an organization by leveraging my skills in testing, automation, and cloud technologies.

SKILLS

Software Testing: Playwright (for automated testing) ,Manual testing methodologies.

Accessibility Testing: Proficient in ensuring WCAG compliance using tools like NVDA.

Programming & Scripting: Core Java (for writing test scripts and automation).

Databases: MySQL (database management and testing), **Oracle SQL** (advanced database management and query optimization).

Version Control: Git, GitHub

Cloud Computing: AWS (Amazon Web Services): EC2, RDS, S3, VPC (basic knowledge)

Operating Systems: Linux,Windows

Technical Skills : Software Development Life Cycle (SDLC), Software Testing Life Cycle (STLC)

Tools : Jira , Postman , J Meter

ACHIEVEMENTS

Participated in National Level Science Exhibition and Project Competition at Delhi 2013

WORK EXPERIENCE

Testing Engineer

MARCH 2023 - TILL DATE

Project : Worked on a beverage delivery management system that enables customers to place orders specifying quantities. Implemented features for tracking customer orders, creating delivery notes, and coordinating delivery routes to ensure efficient order fulfillment.

Joint Supplier Registration System (JSRS) – Oman.
Conducted end-to-end testing of the Contract Management System (CMS) workflow, ensuring seamless functionality. Validated the operator's ability to create projects, tenders, purchase orders, and contracts while mapping suppliers.

Automation Test | JSRS Oman Project :

Developed and maintained automation scripts using Playwright to test the Joint Supplier Registration System (JSRS).
Wrote scripts to validate the Contract Management System and ensure proper functionality of specific scenarios.
Followed detailed steps to execute test cases, validate results, and identify potential issues, ensuring high-quality and reliable software delivery.

- Conducted automated and manual testing of web applications using Playwright to ensure optimal performance.
- Developed and executed comprehensive test scripts in Core Java to verify software functionality and reliability.
- Designed and maintained test cases based on functional specifications and user requirements.
- Performed regression, integration, and system testing to identify and document defects, ensuring high-quality software delivery..
- Executed database testing using MySQL, including writing and running SQL queries for data validation and integrity checks..
- Created detailed bug reports and communicated findings effectively to development teams.
- Assisted in training junior team members on testing tools and methodologies, fostering a culture of continuous improvement.
