Senior Frontend Engineer

Throughout my extensive 13-year journey in web development, I have honed expertise in a wide range of programming languages, frameworks, and JavaScript libraries. As a senior front-end developer, I am dedicated to delivering exceptional user experiences through well-designed and scalable websites and applications. My logical, results-oriented approach, combined with a calm and composed demeanor, enables me to effectively address complex challenges. I am proficient in HTML5, CSS3, JavaScript, React.js, Next.js, Node.js, Bootstrap, and Tailwind, and have a strong foundation in modern web development practices.

Summary

Professional Summary

- Strong knowledge of the *Software Development Life Cycle (SDLC)* process
- Highly skilled in JavaScript with extensive experience in creating dynamic, responsive, and user-focused web applications.
- Proficient in CSS frameworks like Bootstrap, Foundation, and Tailwind, with a solid foundation in responsive web design principles
- Strong in building single-page and *responsive applications*
- Integrating third-party APIs with new and existing web applications
- An organized, detail-oriented, and passionate engineer, who can accomplish *multiple tasks at ease, without compromising on quality.*
- Skilled at applying accessibility (ADA) best practices to web development
- Having a good experience with *Model View Controller (MVC) and REST architecture*
- Strong knowledge of UNIX-based operating systems like *Ubuntu, Mac OS X, and Windows*
- Having a good experience in *Agile practices, sprints, stand-ups, and retrospectives meetings*
- Having good experience setting up and maintaining *Amazon Web Services* applications
- Extensively worked with Version Control Systems like *GIT*
- Excellent in problem solving, and exploring new technologies
- *Quick learner* and excellent Team Player and ability to meet tight deadlines
- Having good experience with *TDD and BDD*
- Self-motivated worker with a strong focus on business goals

Education

M.sc Information Technology from University of Madras

2012 - 2014 — Chennai, India

B.sc Software Applications from University of Madras

2008 - 2011 — Chennai, India

Accomplishments

- Appreciated by clients for finishing the job clean within a strict deadline
- Recognized for skilled in problem-solving and exploring new technologies by the team lead and manager
- I have promoted to Technical Lead 1 in the month of October 2023

Skills

Front End

- React JS
- Next JS
- JavaScript
- ECMAScript
- HTML5
- CSS3 (SCSS, SASS, LESS)
- Responsive Design (Bootstrap, Materialize, Tailwind)
- Typescript
- Storybook
- GraphQL
- Vue JS
- Angular
- React Native

Back End

- Node JS
- Express JS
- Ruby
- Ruby on Rails
- Python

DevOps

- Terraform
- GitHub Actions
- Jenkins
- Docker
- CircleCI
- SonarQube
- A/B Testing Tools
- Capistrano
- S3
- Amazon EC2
- Apache
- Nginx

Work Experience

Technical Lead 1 at Photon Interactive Private Limited

February 2019 to till date — Chennai, India

- Responsible for front-end design and functionality development from concept to completion or from wireframes to live web applications
- Developed and maintained web applications using React JS, Next JS, Typescript, Vue JS, Node JS, and Angular
- Used SASS variables, mixins, and functions to build a CSS pattern library that's very easy to configure according to the UI requirements
- Created UI components in Storybook JS & Implemented multi-language support
- Created Restful APIs using Node JS and Express JS and secured it using JWT
- Initiated a secure API call when the user inputs credit card information, utilizing Crypto JS
- Applied accessibility (ADA) to web development and tested with NVDA and VoiceOver
- Worked heavily on CSS3 and SASS layout for DOM manipulation and functions
- Actively involved in Story review discussions and Sprint planning meetings
- Reviewed code and provided feedback to the team members
- Documented effective and replicable methods for extracting data and organizing data sources
- Utilized Lerna for managing modules and creating a mono repo
- Used Ubuntu, Mac, and Windows operating systems for development and deployment
- Responsible for maintaining 80% code coverage, integration tests, and SonarQube checks on every new feature and changes implemented
- Extensively worked with Jest, Mocha, React-testing-library, Enzyme, and WebdriverIO
- Implemented integration of both back-end application APIs and third-party APIs with the applications, and performed validation using Postman
- Utilized JIRA, Confluence, and Azure Boards as integral tools for project management
- Supported recruitment and interviewing processes

Senior Software Engineer at Tender Software India Pvt Ltd

April 2018 to January 2019 — Chennai, India

- Developed Mobile applications using React Native and Redux
- Communicated with the client to understand the requirements and provide the best solution
- Responsible for completing the tickets assigned in the sprint and delivering features on time
- Responsible for developing design changes if required and utilized Bootstrap for responsive design
- Developed and maintained web applications using HTML5, CSS3, Sass, JQuery, Haml Template, CoffeeScript, and Ruby on Rails
- Utilized MySQL for database management
- Used Ubuntu operating system for development and deployment
- Responsible for writing test cases using Jest, Enzyme, RSpec, Capybara, and Cucumber
- Utilized Jira as integral tools for project management
- Deployed applications on Linode server using Capistrano

Databases

- Postgresql
- MySQL
- MongoDB
- Firebase

Testing

- Jest
- Mocha
- Enzyme
- Chai
- React Testing Library
- WebdriverIO
- Rspec
- Cucumber
- Capybara

Version Controller

- GIT

Platform

- Linux (Ubuntu)
- Mac
- Windows

Languages

- Tamil (Native)
- English (Fluent)

Interests

Music | Race Games | Animated Movies | Sci-fi Movies

Lead Engineer at ITBeeZone Business Solutions

November 2015 to March 2018 Chennai, India

- Responsible for back-end functionality development from concept to completion or from wireframes to live web applications
- Responsible for developing responsive web applications using React JS, Angular, Bootstrap, Node JS, Ruby on Rails, HTML5, CSS3, jQuery and JavaScript
- Created Restful APIs using Node JS, Express JS, and Ruby on Rails
- Implemented multi-language support for the application using i18n, Rails-i18n, and React-intl
- Integrated payment gateways like Stripe, PayPal, and Razorpay with the applications
- Performed code review (pull request review)
- Actively involved in Story review discussions and Sprint planning meetings
- Used SASS variables, mixins, and functions to build a CSS pattern library that's very easy to configure according to the UI requirements
- Worked heavily on CSS3 and SASS layout for DOM manipulation and functions
- Recommended approaches for UI/UX considering time to market
- Performed software installations and upgrades on Mac or Windows operating systems
- Proficient in utilizing ESLint to maintain code quality and adhere to coding standards
- Mentor junior developers
- Documented effective and replicable methods for extracting data and organizing data sources
- Used Ubuntu, Mac, and Windows operating systems for development and deployment
- Extensively worked with Jest, Mocha, Enzyme, Chai, Istanbul, React-testing-library, RSpec, Capybara, Cucumber, and WebdriverIO
- Implemented integration of both back-end application APIs and third-party APIs with the applications, and performed validation using Postman
- Utilized JIRA and Confluence as integral tools for project management

Lead Engineer at Optisol Business Solutions

June 2014 to August 2015 Chennai, India

- Responsible for completing the tickets assigned in the sprint and delivering features on time
- Responsible for developing design changes if required and utilized Bootstrap for responsive design
- Developed and maintained web applications using HTML5, CSS3, Sass, jQuery, Haml Template, CoffeeScript, and Ruby on Rails
- Utilized MySQL for database management
- Used Ubuntu operating system for development and deployment
- Responsible for writing test cases using RSpec, Capybara, and Cucumber
- Utilized Jira as integral tools for project management
- Improved the application performance by optimizing the database queries and caching the data
- Deployed applications on AWS using Jenkins

Software developer at Evvolutions Technologies Pvt Ltd

June 2013 to June 2014 Chennai, India

- Responsible for back-end functionality development from wireframes to live web applications
- Responsible for integrating responsive HTML Design into Ruby on Rails application
- Utilized Postgres for database management
- Applied SSL encryption to the application to secure the data transmission between the client and server
- Implemented multi-language support for the application using i18n and rails-i18n
- Used SASS variables, mixins, and functions to build a CSS pattern library
- Performed software installations and upgrades on the Local and Server
- Actively involved in Story review discussions and Sprint planning meetings
- Used Ubuntu operating system for development and deployment
- Responsible for writing test cases using RSpec, Capybara, and Cucumber
- Utilized Trello as integral tool for project management
- Improved the application performance by optimizing the database queries and caching the data
- Deployed on AWS using Capistrano and Docker

Ruby on Rails developer at Shriram IT Solution Pvt Ltd

May 2011 to June 2013 Chennai, India

- Responsible for back-end functionality development from concept to completion or from wireframes to live web applications
- Responsible for developing responsive web applications using Ruby on Rails, HTML5, CSS3, and JavaScript
- Developed and maintained web applications using HTML5, CSS3, Sass, jQuery, Haml Template, CoffeeScript, and Ruby on Rails
- Utilized Postgres, MySQL, and MongoDB for database management
- Applied SSL encryption to the application to secure the data transmission between the client and server
- Migrated an application from Rails 2 to Rails 3, and Rails 3 to Rails 5
- Implemented multi-language support for the application using i18n and rails-i18n
- Used SASS variables, mixins, and functions to build a CSS pattern library that's very easy to configure according to the UI requirements
- Worked heavily on CSS3 and SASS layout for DOM manipulation and functions
- Performed software installations and upgrades on Local and Server
- Actively involved in Story review discussions and Sprint planning meetings
- Used Ubuntu operating system for development and deployment
- Responsible for writing test cases using RSpec, Capybara, and Cucumber
- Utilized Basecamp, GitHub issues, and Trello as integral tools for project management
- Improved the application performance by optimizing the database queries and caching the data
- Deployed on AWS, Linode, Digital Ocean, Heroku using Capistrano and Docker
