Aniruddh Siddh

Aiming towards career augmentation in an environment where, I can utilize my efficiency, knowledge and competency for completing challenging assignments and can prove myself as an asset of organization.

Professional Forte

- An astute **software developer** with exposure of **Core Java, J2EE, Spring, Spring Boot, Micro Services, Restful web services, Apache Kafka, EJB, Couchbase, MongoDb, Oracle DB, JPA, Data structures and Algorithms, Maven, Jenkins, CI/CD, GIT, JIRA, Agile, UNIX.**
- **5+ years of** software Development experience in product companies.
- **Master's** and **Bachelor's** degree with **honours** in **Computer Engineering**.
- Successfully completed several enterprise level projects of different sizes and requirements.
- Strong involvement in software development and interest transfers directly into practices.
- Good team player with excellent work history as regards with work ethics, dependability and willingness to go an extra mile.

Professional Experience

- **Morgan Stanley** **Oct 2018**
- **TIAA** **Jan 2018 to Sept 2018**
- **Amdocs Development Centre India LLP.** **Aug 2015 to Dec 2017**

Achievements

- **GATE** exam cleared in 2012
- **UGC NET** cleared in Dec 2014

Attainments:

- Managed multiple project tasks with changing priorities and set deadlines.
- Handled interpersonal skills, self-motivation, and quick adaptation to new applications Designed and developed new user friendly interfaces.

Skill Set

Operating System	**:** Win XP, Vista, Win 7, Win 8, Win 2000, UNIX, Ubuntu.
Technologies	**:** Java, J2EE, Spring, Spring Boot, JPA, Microservcies, Restful services, Apache Kafka, JPA, Web services, JUnit, Maven, perforce, Git, Docker.
Languages	**:** C, C++, Java, Angular.
Databases	**:** Oracle, Couchbase, MongoDB, neo4j.
Scripting Languages	**:** Shell scripting.
Development IDE	**:** Eclipse.
Framework	**:** Spring, Spring Boot.

Projects Handled

1. Title: **Proteus** **Team Size:** 4
Environment: Java, Spring Framework, c#, Angular, REST, Sybase Db, Mongo DB.
Organization: Morgan Stanley
Role: Manager
Description: Proteus is a lifecycle management tool for equity swaps trading cycle.It is designed to bring consensus among stakeholders on client pricing. It captures pricing and business conversation between parties and helps having correct pricing in system.
Responsibilities: Worked as individual contributor for understanding traders requirement and deliver new changes to system. Responsible for end to end delivery of new features and requirements including frontend, backend and deployment.

2. Title: **FileHub** **Team Size:** 20
Environment: Java, Spring Framework, REST, Microservcies, Neo4j graph DB, Mongo DB, Docker.
Organization: TIAA GBS
Role: Analyst
Description: Retirement and financial services platform for handling remittance and census files from different client institutions contains participant data, plan data and contribution data. Handling transformation to files to appropriate format, performing workarounds, validation on fields based on business needs and workaround/modification.
Responsibilities: Worked on different modules of FileHub system like validation, workarounds,

involved in sprint release and deployment. Created BOT to handle thousands of files stuck in system with non-terminal state there by reducing man power and time to clear stuck files. I worked on creating a new transformation engine which uses different microservices to convert files from one custom format to other using models from Neo4j with some high level validations.

3. Title: **Configure Product Quote** **Team Size:** 40
Environment: Microservcies, Rest API, JAVA, Spring, Spring Boot, Apache Kafka, JPA, Couchbase
Organization: Amdocs Development Centre India Pvt. Ltd.
Role: Software Developer Experienced
Description: Configure Price Quote (CPQ) software is a sales tool designed to help companies produce accurate and highly configured quotes making all of the complex product, pricing, and business rules centralized, automatic and available in real-time.
Responsibilities: As part of core development team, I worked on different micro services and owner of "charge-distribution" micro service which associate billing arrangement to different products and sites. Work requires implementing different rest services as per business logic, communicating with other services and publishing and receiving data from Kafka channels and writing JUnit. I managed multiple project tasks with changing priorities and set deadlines.

4. Title: **Segmentation** **Team Size:** 20
Environment: Core Java, EJB, Oracle, Couchbase
Organization: Amdocs Development Centre India Pvt. Ltd.
Role: Software Developer
Description: Segmentation projects is developed for horizontal scaling of OMS system, with increase in number of customers and order data there is need to split OMS into different segments to reduce load and increase performance of OMS system. It provides ability to split the account population to segments that are strange to each other while maintaining full visibility to the consumers.
In segmentation functionality we have multiple segments with each segment has its own DB which are divided based on the sequence of order, assigned product id etc. We have to store data in particular segment based on customer id and fetch the data from multi segment based on search parameter.
Responsibilities: Here I worked as software developer in core R&D team and was involved in full development life cycle of project. Implementing routing logic, proxy all web service calls, routing input web service calls to correct segment, communicating with other systems, adding monitoring functionality and writing JUnit.

5. Title: **Amdocs Ordering Management System** **Team Size:** 30
Environment: Core Java, Oracle, Rest API
Organization: Amdocs Development Centre India Pvt. Ltd.
Role: Software Developer
Description: OMS is an order management system that is used to automate the process of order capture, negotiation delivery and completion process for telecom products. It can be integrated flawlessly with Billing, provisioning system.
Responsibilities: I contribute in core R&D team which takes enhancements, fixes for this product across all the versions. Work is mainly based on Core Java, EJB and Oracle SQL and uses multiple Amdocs proprietary frameworks like APM, AIF, ASCF which are all Java based framework.

Education

- **M.E.** in Computer Science from SGSITS Indore with **7.91 CGPA**
- **B.Tech** in Computer Science and Engineering with **74%** from LIET Alwar.
- Higher Secondary school education (**H.S.C**.) with First Class (**73%**) from HPS Alwar.
- Secondary School Education (**S.S.C.**) with first class (**71%**) from HPS Alwar.
