Work Experience

Advisory Technical Services Specialist · IBM

November 2021 - Present

Project: Truist

Truist Financial Corporation is an American bank holding company formed by the merge of two banks Suntrust and BBT.

Tasks and responsibilities:

- Creating mappings and workflows based on mapdocs provided by the design team based on the business requirements and functional specifications.
- Load data to hive database after data manipulations using different transformations.
- Parameterizing the mappings and increasing the re-usability.
- Unit testing of developed mappings.
- Creating design document and unit test document.

Application Development Analyst · Accenture

September 2017 - November 2021

Project: Takeda

Takeda is a research-based global company with its main focus on pharmaceuticals.

Tasks and responsibilities:

- Analyzing the business requirements and functional specification
- Performing data manipulations using transformations like Router, Aggregator, Joiner, Expression, Lookups, Update strategy, and Sequence generator.
- Developing complex mappings in Informatica to load the data from and to various sources.
- Implementing performance tuning logics on targets, sources, and mappings to provide maximum efficiency and performance.
- Parameterizing the mappings and increasing the re-usbality.
- Writing documentations to describe program development, logic, coding, testing, changes and corrections.
- Working closely with business and other teams to assist business with support and provide quick assistance to meet SLAs on deliverables.
- Migrating Workflows in Informatica Powercenter.
