Professional Summary

Dedicated and efficient ETL Developer with 3+ years of experience in Informatica PowerCenter, Oracle, SQL Server. I am adaptable, inquisitive, creative bent of mind.

Work History

Marella Softlabs Private Limited– ETL Developer
Hyderabad, India
06/2019- Current

- Strategically design, develop and migrate Informatica workflows.
- Understanding business requirements, study existing application landscape.
- Adapted quickly to changing project priorities and job specifications through Informatica PowerCenter.
- Designed and developed Informatica mappings and transformation rules to support new data warehouse architecture model.
- Developed complex mappings using Informatica PowerCenter Designer to transform and load data & fined tunings to process millions of input records with estimated throughput.
- Experience in Creating complex mappings using Aggregator, Expression, Joiner, Filter, sorter, Union, Sequence Generator, Connected & Unconnected Lookup, Router, Union and Update Strategy transformations using Informatica Power center designer.
- Having good knowledge on Implementing Slowly Changing Dimensions Type-1 and Type-2.
- Experience in Fact Loading.
- Experience in Un-Connected and Dynamic Lookups.
- Hands on Experience on Dynamic Target File Generation.
- Hands on experience in creating Re-usable objects like Mapplets and Re-usable Transformations.
- Good Experience on Workflow Manager Tool – Task Developer, Workflow Designer.
- Effectively used Informatica parameter files for defining mappings and workflows.
- Proficient in using workflow tasks like Session, Control, Email tasks, Command tasks, Decision tasks & Event wait.
- Knowledge on IICS (Informatica Intelligent Cloud Services).

Project 2: LINCOLN FINANCIALS
Description: Lincoln National Corporation is a Fortune 200 American holding company, which operates multiple insurance and investment management businesses through subsidiary companies.
Duration: ***03/2021- till date***

- Designed and developed transformation rules (business logic) to consolidate (fact/summary) data using Informatica PowerCenter.
- Created various Oracle database objects like Indexes, Tables and views.
- Involved in populating data from flat files, oracle database from landing to ODS (Staging) and into Targets
- Extensively worked on developing Informatica Mapplets, Mappings, Sessions, Worklets and Workflows for data loading.
- Applied slowly changing Dimensions Type I and Type II on business

Core Skills

- Informatica PowerCenter
- IICS
- Oracle Database
- Microsoft SQL Server
- Unix
- Data Warehousing
- Agile Methodologies
- Requirement Analysis

Soft Skills

- Problem Solving
- Team Work
- Adaptability
- Attention to detail

requirements.
- Experience in Fact Loading.
- Parameterized all mapping, session parameters and DB connections.
- Experienced Working on different tasks in Workflow Manager like Sessions, Event wait, E-mail, Command, Assignment, and Scheduling of the workflow.
- Effectively understood session error logs and used debugger to test mapping in DEV in following change procedures and validation.
- Worked on Static, Dynamic and Un-connected lookups.
- Worked with Sql Queries like views, Subqueries, joins etc. where ever needed.
- Used JIRA-Agile project management tool to plan, track and manage progress of the project and also track bugs, tasks and requests.
- Performed Informatica code migration from development to testing environment.
- Worked with the testers closely in determining both medium and high severity defects that would potentially affect the downstream systems before the release of the project and fixed the defects before moving the jobs into production.
- Developed all the mappings according to the design document and mapping specs provided and performed unit testing.
- Excellent problem-solving skills with strong technical background and good interpersonal skills.
- Involved in knowledge sharing and knowledge transfer to the new members of the project & Preparation of knowledge transfer documents

Project 1: Singapore Deposit Insurance Corporation Limited (SDIC)

Description: Singapore Deposit Insurance Corporation Limited (SDIC) administers the Deposit Insurance (DI) Scheme and Policy Owners' Protection (PPF) Scheme in Singapore. SDIC is a company limited by guarantee under the Companies.

Duration: ***07/2019 - 03/2021***

- Analyzed, designed, developed, implemented and maintained moderate to complex mappings and workflows to provide data for Data Warehouse.
- Worked with both flat files and relational tables to extract the data from it and load it into Oracle tables after manipulating the data based on business logic.
- Identified and fixed bottlenecks to tune the complex Informatica mappings for better performance.
- Analyzed the existing mapping logic to determine the reusability of the code.
- Populate the business rules using mapping into the target tables.
- Created the Detailed Technical design documents which have the ETL technical specifications for the given functionality.
- Created mappings using transformations like Source Qualifier, Aggregator, Expression, Lookup, Router, Update Strategy, Joiner, Union and Sorter.
- Done extensive unit testing at various levels of ETL and wrote queries in SQL to ensure loading of the data.
- Implemented slowly changing Dimensions Type-1 and Type-2 approach for loading into the target tables.
- Involved in Performance tuning at various levels including Target, Source, and Mapping.
- Prepared unit test cases to meet the business requirements and performed unit testing of mappings.
