SUMMARY

Software Developer with five years of expertise in web and mobile app development, specializing in the full product lifecycle. Successfully led a team of four engineers to enhance collection processes for a Digital Finance System, resulting in significant operational efficiency improvements. Proficient in Next.js and experienced in building scalable web applications, with a recent focus on Generative AI technologies to elevate user experiences and streamline workflows. Committed to leveraging technical acumen and leadership capabilities to drive innovation in challenging projects.

EDUCATION

April 2017
B.Tech - Electronics and Telecommunication
Konark Institute of Science and Technology (KIST), Bhubaneswar

SKILLS

- JavaScript
- TypeScript

WORK EXPERIENCE

February 2024 - April 2025
Software Engineer UPRIO | Bangaluru

- Created a complete module for a subscription-based payment method, ensuring the solution met market demands, and enhanced the user experience.
- Implemented an interactive chatbot leveraging generative AI technology.
- Resolved complex issues related to software applications quickly and effectively, managing priorities to meet business and customer needs.
- Analyzed product data and user feedback to inform feature enhancements, helping drive product roadmap decisions, and improve user engagement.

July 2023 - February 2024
Software Developer Codosphere | Bangaluru
• Developed a **module for Loan Origination and Fulfillment System**, enabling seamless loan application processing and approvals.
• Developed a **mobile app for Loan Origination**, improving accessibility and streamlining the loan application process for customers.
• Acted as a **Solution Engineer**, analyzing business requirements, designing scalable and efficient solutions, and ensuring seamless integration with existing systems.
• Collaborated with **cross-functional teams** to develop and implement innovative solutions, improving operational efficiency and customer experience.

January 2022 - July 2023
Software Developer Byju's (Think & Learn Pvt. Ltd.)
• Designed and developed functionalities for **auto debit (ECS) Collection Management System**, ensuring seamless and automated repayment processing.
• Developed modules to collect EMI repayments online through payment links and tele-calling agents, enhancing customer payment flexibility.
• Built various communication channels (SMS, WhatsApp) for collecting repayments, improving customer engagement, and recovery rates.
• Developed a payment link feature for inbound collections using AWS. **Lambda**, ensuring a scalable and serverless approach.
• Designed and developed backend APIs to support on-field collection. Via a mobile application, streamlining agent workflows.
• Acted as a **Solution Engineer**, collaborating with cross-functional teams to analyze requirements, design scalable solutions, and ensure smooth integrations with existing systems.
• Worked closely with business stakeholders to optimize collection strategies and enhance the user experience.
• Mentored new engineers, and motivated the team by driving best practices, knowledge-sharing sessions, and fostering an innovative culture.

- Next.js
- React.js
- Node.js
- Generative AI
- Project management

ACHIEVEMENTS

- Built Collection Management web application and batch system from scratch.
- Build Backend apis for TL Collect mobile application
- Integrated two NBFC partners into the Loan system.
- Through CMS on an average 100Cr collected monthly.

WEBSITES
