Synopsis

- Over all 6+ years of extensive work experience in IT industry. Area of expertise spans from front-end development using Angular and JavaScript to full-stack solutions with Python for both front-end and back-end, covering web applications and web services integration.
- Technology stack spans from front-end development with HTML, CSS, SCSS, Bootstrap, Vue.js, Angular, and JavaScript, to back-end development using Python frameworks like Django, DRF, FastAPI, Flask, and Web API integration, among other modern web technologies.
- Senior Software Developer with strong experience base in HTML, CSS, SCSS, Bootstrap, Vue.js, Angular, CSS3, Javascript, SQL Server, Node.js, Web api, Python.
- Having Knoweldge in Ionic, Xamarin, .Net
- Hands on experience in building applications using IPC.
- Full stack developer with a passion for software development especially with agile test-driven development (TDD) with Angular and VueJs.
- Expert in executing enterprise applications, with leadership and mentoring experience.
- Expert in full software development life cycle (SDLC) starting from requirement to release and maintenance. Expertise includes Waterfall model, Agile implementation in SCRUM and KANBAD approach.
- Experience in conducting daily standup and refinement meetings and creating tollgates as scrum master.
- Experience in working with cross technical and functional teams and meeting the client timelines.
- Excellent capability to explore, learn and understand new business domains and technology.
- Possess strong competencies needed to analyze problems, respond to changing needs, and able keep good relationship with peers and clients.
- Excellent communication skills, interpersonal skills, technical expertise, ability to work independently or within a team environment with diverse backgrounds.
- Proficiency in leading distributed teams with varied culture and skills of interest.

Work Experience

✓ Worked with **Vnv Logixpace Pvt Ltd, Hyderabad** from July 2019 to Til date.

Qualification

✓ B.Tech from Jayamukhi Institute of Technological Sciences affiliated to JNTU Hyderabad(2015-2019)

Technical Skills

- Programming Skills : HTML, CSS, SCSS, CSS3, XML, JavaScript, Angular, VueJs, Django,Django Rest Framework, Flask, FastApi , Python, Ionic, Xamarin, .Net
- Databases : SQLite, MySQL and PostgreSQL
- Operating Systems : Windows
- IDEs/Tools : Visual Studio Code, GitLab, Taiga

Work Experience

- **FileMickey** (Product): Sr.Software Developer(Python),(started in Apr-2021), **Oct 2022 - Til-date**
- **VNV Website** (Project) : Jr.Software Developer(Angular), **Jun 2022 - Sep 2022**
- **Mobile App** (project) : Jr.Software Developer(Ionic), **Mar 2022 - May 2022**
- **Mobile App** (Project) : Jr.Software Developer(Xamarin), **Jan 2022 - Feb 2022**
- **Sky Routes** (Product) : Software Associate(Angular), **Oct 2020 - Dec 2021**

- **Syyclops Web Application** (Project) : Software Associate(Angular), **Mar 2020 - Sep 2020**
- **LimpoHub** (Product) - Trainee Analyst(Html), **Jul 2019 – Feb 2020**

FileMickey (Pdf Compressor)

Client: Vnv Logixpace Pvt Ltd
Period: Oct 2022 - Til Date
Role: Sr.Software Developer
Technologies: Django, IPC, FastApi, Python, PostgreSQL, SQLite, HTML, CSS, JavaScript, Vue.js, Bulma, Milligram, Bootstrap
Team Size: 4

Product Summary:

Application intended to reduce the expenses incurred by an enterprise due to huge amount of data being stored.
Features includes file compression, file conversion, merger and etc.
Executed in multiple delivery models to cater diverse needs of customer.
Implemented in robust logging mechanism to trace out and give immediate fix followed by full blown RCA and fix against it.
Followed Agile principal by using SCRUM and KANBAN methodologies for quick and accurate deliverable

Responsibilities:

- Designed and implemented user interfaces using Vue.js, ensuring responsiveness and enhanced user experiences.
- Styled applications with CSS frameworks like Milligram and Bulma to maintain consistent and attractive layouts.
- Integrated Jinja templates for dynamic content rendering, enhancing flexibility and interactivity.
- Developed and maintained server-side logic using FastAPI, optimizing for high performance and scalability.
- Conducted thorough testing for Api's in FastApi using Pytest to ensure functionality, performance, and reliability.
- Managed data storage and retrieval with PostgreSQL, leveraging SQLAlchemy ORM for efficient database interactions.
- Implemented database migrations and version control with Alembic, ensuring data integrity and smooth updates.
- Collaborated with UX/UI designers to discuss requirements, translate wireframes into functional components, and ensure seamless integration with back-end services.
- Developed and maintained RESTful APIs with Django and FastAPI, supporting front-end functionality and enhancing system performance.
- Understanding the requirements and coming up with best suitable approach that can be considered.
- Prepared project charter and product backlog and created user stories.
- Helped team in performing the root cause analysis and delivering the work quick fixes.
- Responsible for execution and delivery of features on increment basis.
- Responsible for coming with flow charts as and when necessary.
- Played scrum master role for smooth execution
- Monitoring system performance and coordinating software upgrades

Vnv Logixpace Website

Client: VNV Logixpace Pvt Ltd
Period: Jun 2022 – Sep 2022
Role: Jr.Software Developer
Technologies: Angular, JavaScript

Team Size: 2

Project Summary:

VNV Logixpace specializes in innovative website design, showcasing a diverse portfolio of completed projects and products. Our expertise spans from sleek, responsive websites to complex e-commerce platforms. We deliver customized digital solutions, enhancing user experience and driving business growth.

Responsibilities:

- Developed and maintained responsive web applications using Angular and JavaScript, ensuring optimal performance across various devices and browsers.
- Collaborated with UX/UI designers to implement user-friendly interfaces, adhering to design specifications and improving overall user experience.
- Integrated RESTful API's to dynamically fetch and display data, enhancing application interactivity and real-time updates.
- Utilized Angular services, directives, and components to create modular and maintainable code, facilitating ease of updates and scalability.
- Conducted thorough testing and debugging of front-end code.
-
- Worked closely with back-end developers to align front-end functionality with server-side logic, achieving seamless end-to-end integration.
- Implemented state management solutions, such as NgRx, to manage application state efficiently and improve performance.
- Participated in code reviews and agile development processes, contributing to continuous improvement and knowledge sharing within the development team.

SkyRoutes Web Application

Client: Ghagane Aviation Pvt Ltd (Pravahya)
Period: Aug 2020 - Dec 2021
Role: Jr.Software Developer
Team Size: 3

Product Summary:

SkyRoutes offers seamless in-flight connectivity and personalized travel experiences, allowing passengers to stay connected, entertained, and productive while flying. With high-speed internet, exclusive content, and tailored services, SkyRoutes enhances the overall journey for air travelers. Ideal for business and leisure passengers, it transforms air travel into a more enjoyable and efficient experience.

Responsibilities:

- Develop and maintain user interface components using Angular framework to ensure seamless frontend functionality.
- Collaborate with the client through daily calls to gather requirements, provide updates, and address any concerns or feedback.
- Implement new features and enhancements based on discussions with the client to improve user experience and meet business objectives.
- Utilize Angular & Html to enhance interactivity and responsiveness of the front-end applications.
- Conduct regular testing and debugging to ensure optimal performance and identify and resolve any issues or bugs.

- Stay updated with the latest web development trends and best practices to continuously improve the front-end development process.
- Participate in code reviews and provide constructive feedback to maintain code quality and consistency.
- Work closely with back-end developers and other team members to integrate front-end components with back-end systems and ensure seamless end-to-end functionality.

Syyclops Web Application

Client: Syyclops Private ltd (Setty)
Period: Mar 2020 - Sep 2020
Role: Jr.Software Developer
Technologies: Angular, JavaScript, MySql, Web Api, .Net
Team Size: 4

Project Summary:

This application is intended to provide solutions for problems faced during maintenance large community such as university campuses, schools, hospitals and etc.
Application notifies campus facilitators in advance against maintenance activity or improper working of a device and etc.
Along with preventive maintenance, application also provides digital twin view of the building.

Responsibilities:

- Developed and maintained responsive web applications using Angular and JavaScript, ensuring optimal performance across various devices and browsers.
- Collaborated with UX/UI designers to implement user-friendly interfaces, adhering to design specifications and improving overall user experience.
- Responsible for coming with flow charts as and when necessary.
- Utilized Angular services, directives, and components to create modular and maintainable code, facilitating ease of updates and scalability.
- Integrated APIs using Angular to enhance system connectivity and user experience.
- Worked closely with back-end developers to align front-end functionality with server-side logic, achieving seamless end-to-end integration.
- Participated in code reviews and agile development processes, contributing to continuous improvement and knowledge sharing within the development team.

LimpoHub (Cleaning Service)

Client: VNV Logixpace Pvt Ltd
Product: LimpoHub
Period: Jul 2019 – Feb 2021
Role: Software Associate
Team Size: 6

Product Summary:

LimpoHub offers an all-in-one solution for pristine bathrooms and kitchens, simplifying cleaning routines. With specialized formulations, it tackles tough bathroom grime while excelling in kitchen messes. Experience efficiency and shine with LimpoHub's versatile cleaning products.

Responsibilities:

- **Business Analysis:** Collaborated with stakeholders to gather and analyze requirements, translating business needs into technical solutions and user stories for implementation.
- **Information Gathering:** Conducted thorough research to collect, assess, and organize relevant data, facilitating informed decision-making and project planning.
- **Technology Implementation:** Understanding the requirements and coming up with best suitable approach that can be considered. Leveraged HTML, .Net & CSS to develop a site visually appealing interfaces, ensuring seamless user experiences across multiple platforms.
