SABARIESH

LinkedIn URL: https://www.linkedin.com/in/sabariesh-ayyasamy/
Email : sabariayyasamy20@gmail.com
Phone Number: +91 9677535207

Highly accomplished IT professional with 6+ years of experience in full-stack software development, encompassing analysis, design, development, testing, and implementation.

Technical expertise includes:

- JavaScript frameworks: React, Angular, AngularJS, Node.js, Next.js
- Frontend development: HTML5, CSS3, CSS4, SCSS, Bootstrap, Angular Material, Prime NG, MUI CSS
- Databases: MS SQL, MY SQL, MongoDB
- Design tools: Photoshop, Adobe XD, Figma

Adept at prioritizing tasks, working independently, and collaboratively as part of a team, driving projects forward with efficiency and precision.

TECHNICAL SKILLS SUMMARY

JS Framework: React, Angular, AngularJS,Node.js,JavaScript, jQuery, Next js
Programming Skills: .Net core, C# .Net
Framework: .Net Framework 4.5 and .NET Core
Databases: SQL Server 2018, MongoDB, MySQL, PostgreSQL
IDEs: Visual studio, SQL Server, Visual studio code
Tool sets: SQL Server Management Studio, NoSQL Booster, Jenkins, Angular E2E, and Drobox
Deployment: IIS
Project Management Tools: Jira, Air Table
Source Control: SVN, Git and Bit bucket

CAREER HISTORY

Senior Software Engineer | Avelator Solutions India Pvt Ltd
May 2023 – Present (**1 years, 10 months**)
Senior Software Engineer | CG-Vak Software & Exports Ltd
April 2022 – March 2023 (**0 years, 11 months, 30 days**)
Junior Software Engineer | Value Soft Solution
May 2018 – March 2022 (**3 years, 11 months**)

PROJECT SUMMARY

WEB & MOBILE APPLICATIONS

Company: Avelator solution india pvt ltd

Duration: May 2024 to Jan 2025

Environment: Angular, react, nodejs, mysql, Material UI design

The Application:

This application is tell us a hospital management like a doctor and patient its include a vendor's like a lab, pharmacy, physio B2B application

1. The admin will create a sales vendors
2. Sales vendor will create a doctors, and other vendor
3. Vendor's will accumulate the task and advertisement, posts
4. The patient will contact a doctor, the doctor will advise the lab, pharmacy **Role:**

- UI corrections and UI implementations
- Frontend business rules
- Backend algorithm and logics to connect the data based handling the SQL database.
- Team handling
- Involved in application module-based structure implementation
- Involved in Client Support & Implement the new UI content suggestions

WEB APPLICATION

Company: CG-vak Software & Exports Ltd

Duration: April 2022 to April 2024

Environment: React Js,

The Application:

The application is a Progressive Web Application (PWA) developed for Web, Android, iOS, and Windows platforms. It utilizes React.js for both frontend and backend development, while Magneto is used for the store development with a MySQL database backend. The primary goal of the application is to promote a plastic-free nation.

Role:

- Responsive Frontend UI design.
- Integrated the **Plastic Footprint Calculator.**
- Created and managed the **Redux store.**

- Integrated **APIs** for seamless data communication.
- Conducted **unit testing** to ensure functionality and reliability.

EOS Angular to Angular migration

Company: Value soft solution

Duration: Aug 2021 to Mar 2022

Environment: Angular, AngularJS, Ng prime

The Application:

This application is developed in Angular JS by the set of 16 modules with multiple Business rules. The main Task is to migrate the Application to Angular 13 with same Business Rules. Each Module Run like individual Based on the Client Requirement

Required modules will be merged on deployment. Because of security purpose rest of the Modules, strictly not come in production

Role:

- Creating the latest angular architecture based on the old application
- While Hosting Required Application will be merged and run as a single Application.
- Creating a common library file to use each application
- Performance tuning
- Responsible UI designs.

Web Application

Company: Value soft solution

Duration: Apr 2021 to Jul 2021

Environment: React Js, Typescript Back end, .net core 2.1 API, MSSQL, **and**

The Application:

This application is used to get home loan and credit interest calculation for the Bajaj finance it's a banking website,

Role:

- Full stack development of code a cloud native multitenant SaaS platform
- Screen / user function design for energy market UI.
- Work with the core product team to create new product components and improvements.
- Engage in code-reviews, planning, design and technical discussions
- Work in an agile development environment with a delivery focus to achieve team goals within sprint timeframes

JOB PORTAL APPLICATION

Company: Value soft solution

Duration: Oct 2020 to Apr 2021

Environment: React, Bootstrap4, C# .net core / MS SQL, Jenkins, Razor pay split and CSC payment, SMTP Client.

The Application:

The Job Category C & Category D related notifications are linked with this website.

1. The candidates can register them self with the portal and start applying by submitting the required information and documents.
2. Applied candidate will be validated with Email and Mobile SMS verification based.
3. Job category, State, cast, age based multiple sections will be enabled and disabled while capturing the data from the candidates.
4. This portal is integrated with pay split payment and payment gateways.
5. The application is designed and developed to handle multiple Jobs.
6. Day wise and category-based candidate registrations summary will be brought to Dashboard through windows service.
7. CI CD is implemented for this Job portal to automate the build and deployment using Jenkins.
8. Each hall ticket will carry the predefined candidate data in a QR code, which will be scanned at examination center for verification.

Role:

- Full Project UI / UX with Responsive design
- Designing the React pages and data bindings
- Implemented all page's front-end validations with the given business rules
- Implemented candidate's document uploading functionality with server-side storage.
- Developed template-based Acknowledgement generation
- Candidate verification card and Hall ticket generations
- Admin Dashboard
- Handling the SQL database.
- Involved in application module-based structure implementation
- Involved in Department Support & Implement the new UI content suggestions.

Web Application

Company: Value soft solution

Duration: Apr 2020 to Oct 2020

Environment: React, Redux, C# .Net Core, NodeJS, SQL DB, Mongo DB

The Application:

This is an internal platform, which works like a Low code. This platform allows users to develop web applications with Visual interface. It also provides predefined category-based Templates, which helps to get predefined design and structures. This platform also lists the readily available integrations, which allows applications to include for its easy implementations.

Role:

- Project UI / UX with Responsive design.
- Designing the React pages and data bindings.
- Cross platform supporting Graphical user interface integration
- Adding multiple UI controls along with its required Dynamic validation

Web Application

Company: Value soft solution

Duration: Mar 2020 to Apr 2020

Environment: C# .Net Core MVC, JQuery, MS SQL DB.

The Application:

This is a simple application to conduct the cultural event for the tea, and music party's as per the client requirement to develop the application.

Role:

- Project UI / UX with Responsive design.
- Designing the C# .Net core MVC application structure
- Designing the MS SQL Database
- File uploading and storing the responsive file to DB.
- Implemented the JQuery Lazy loading concept.
- Implemented Gmail integration.

Athlete Sports Analytics

Company: Value soft solution

Duration: Nove 2019 to Mar 2020

Environment: Angular, HTML5, CSS3

The Application:

This application is based on sports analytics to predict and deploy the university games statistics

Role:

- Project UI / UX with Responsive design.
- Angular aggregate function to fetching the bulk data and UI binding
- Formula based on the UI validations.
- Interactive to client.

Web Application

Company: Value soft solution

Duration: Jun 2019 to Nov 2019

Environment: Angular 6, .net core 2.1 API, .net framework 4.5 UI, MSSQL, **The Application:** This application is used to get claims (death, disability, provident found, health and family and education) for unorganized beneficiaries Government. The wage earned that also includes a self-employed person who is in the unorganized sector as mentioned under part A and part B of the schedule under the Government unorganized sector workers.

The schedule may also include any other group of workers as may be notified in the official gazette by the government from time to time.

Role:

- UI side Angular performance issue contributed.
- Handling Database, API, and UI, fixing errors and new implementations in Code based on agile methodology.
- Claims reapply, department module, inspector board treasurer, service provider, CEO, role-based function.

ARCHITECT DEVELOPMENT

Company: Value soft solution

Duration: May 2018 to Jun 2019

Environment: C#.net Web API, React, SQL Server, LINQ, Dapper, HTML5, CSS3, MUI

The Application:
This Application is used for delivers end-to-end visibility and transparency into property build or renovation projects. They aim to be the ecosystem that connects property owners with Architects, interior designers and construction related professionals at every stage of the process.

This project will support for has B2C (Individual) and B2B (Enterprise subscription) users. Subscription based centralized document storage access with permissions based will be assigned to the users. Chart is one of the key functionalities, which helps to create, maintain, and track the tasks. Each Task priority-based system will be updating the chart with different color. Auto remainders and notifications are linked with each activity.

3D Viewer is a 2D Design and its output can be viewed in 3D Mode. The subscribed users can design building with predefined category-based items with visual drag and drop functionality. It allows subscribed users to design their own building and interiors in 2D mode and the same can be viewed in 3D mode.

Role:

- Responsible Website
- Daily Work Tracker
- Gantt chart integration
- Stripe and xero payment integration
- Factory pattern-based frontend logic

- Re-organizing code for reusable
- Multiple user communication using WebRTC
- Involved in developing the Document storage functionality.
- Client Support & Implement the new enhancement
- Contributed design related in 3D Viewer application.
- Involved in developing Admin pagesto Mange Category and interior product management screens for 3D Viewer.

Customer Technical support
