Harikrishnan M

SOFTWARE ENGINEER

Profile

I am an experienced Full Stack Developer with a strong background in web development. I have been working as a Full Stack Developer at Zolvit Formerly Vakilsearch since April 2020. In this role, I have been responsible for developing and maintaining web applications, implementing new features, and ensuring the overall functionality and performance of the applications. I am passionate about coding and always strive to stay updated with the latest technologies and industry trends. I am excited to continue my career as a Full Stack Developer and contribute to the success of future projects.

Employment History (5 years)

MERN Stack Developer, Zolvit Formerly Vakilsearch

APRIL 2020 — PRESENT

1. Customer Web Application – ZOLVIT

Links: zolvit.com , vakilsearch.com, grc.vakilsearch.com

Role: Full-Stack Developer

- Developed a user-friendly, responsive web application to streamline e-commerce transactions.
- Designed and implemented frontend architecture using **React.js**, **Next.js**, and backend services with **Node.js** and **TypeScript**.
- Integrated and customized payment gateways like **PayU** and **Cashfree** to optimize checkout flows and enhance the user experience.
- Ensured application responsiveness and cross-platform compatibility.
- Collaborated with UI/UX designers to create intuitive interfaces and seamless interactions

2. **CRM for Internal Agents**

Links: crm.vakilsearch.com

Role: Full-Stack Developer

- Designed and developed a scalable CRM platform to manage customer data and automate internal workflows.
- Built robust backend services using **Node.js**, **TypeScript**, and **MySQL**.
- Integrated tools like **Google Analytics**, **Mixpanel**, and **MoEngage** to track user behavior and performance.
- Developed frontend dashboards using **React.js** for efficient agent workflows.
- Optimized MySQL queries for fast, reliable data retrieval.

3. Microservices with MongoDB and Node.js

Role: Full-Stack Developer

- Developed RESTful microservices using **Node.js**, **Express.js**, and **TypeScript** following **SOLID principles**.
- Utilized **MongoDB** for efficient data management.
- Integrated **RabbitMQ** and **Redis** for real-time processing, notifications, and messaging queues.
- Built secured API gateways and authentication mechanisms.
- Created lightweight admin panels with **React.js** for internal monitoring.

4. Subscription-Based Billing Platform

Role: Full-Stack Developer

- Built a dynamic web app using **React.js** and **Node.js** to manage subscriptions and recurring payments.
- Integrated payment providers like **Razorpay** and **Stripe** to handle automatic billing and payment retries.
- Designed flexible plans, discount logic, and invoice generation modules.
- Ensured PCI-compliance and secure payment workflows.

5. **Merchant Dashboard & Transaction Platform – HodaPay**

links: haodapay.com

Role: Full-Stack Developer

- Developed and maintained a full-featured **merchant dashboard** for **HodaPay**, a digital payment gateway provider.
- Built responsive and dynamic UI components using **React.js** to monitor live transactions, refunds, and settlements.
- Developed backend services in **Node.js** and **TypeScript** to support APIs for transaction status, reconciliation, and payout scheduling.
- Integrated **webhooks**, real-time data updates using **Socket.io**, and alert mechanisms for high-value transactions.
- Worked closely with product and QA teams to ensure **PCI-compliant** payment flows and secure customer data handling.
- Implemented complex filtering, data export (CSV, Excel), and role-based access for merchants and admins.
