PROFESSIONAL EXPERIENCE

Python Developer

BRIO TECHNOLOGIES PVT LTD, HYDERABAD. 2018-Present

I have 2+ years of experience in Python development. I worked on both back end and front end web application development.

Projects :

- Project name : CP (Customer Portal for Brio)
- Team Size : 2
- Responsibilities :
  1. Designed and developed front end and back end programming.
  2. Error handling and bug fixes.
- Description: Brio is a third party company of Google and Micro Soft. Brio sales Google's G-suite and Micro Soft's Azure products to the customers through CP web application. We can create Quotations, Proforma Invoices and also generate invoices for orders through this website. Customers can make payment through CP for those products.
- Project name: Solo
- Team Size: 2
- Responsibilities :
  1. Designed and developed front end and back end programming.
  2. Error handling and bug fixes.
- Description: Solo is a third party authentication web application in between Gmail and companies (Customers). Here customers can create Groups, rules and policies for that groups for secure authentication.
- Project Name: Contact Center (For Brio)
- Team Size : 2
- Responsibilities :
  1. Designed and developed front end and back end programming.
  2. Error handling and bug fixes.
- Description: Contact center web application is for sales and support team of our company. Here we can get contact details of other companies through API. We can create company contact details for future reference in this contact centre application.

Embedded Engineer (Python)

TRY LOGIC SOFT SOLUTIONS AP PVT LTD. 2016-2017

I worked as an Embedded engineer with 1.3 years of experience on embedded projects development. I have worked on academic projects for B.Tech and M.tech projects and also Raspberry Pi with IoT based projects.
