Summary

Experienced Front-End Developer with a passion for creating visually appealing and user-friendly website processes to accomplish customer targets and promote company loyalty.

I have expertise in HTML, CSS, JavaScript, and React and have successfully delivered projects for clients in various industries.

My strong attention to detail to translate designs into code, and ability to communicate effectively with clients and team members make me an asset to any project.

Let’s work together to bring your vision to life.

Experience

Fullstack Engineer

Strategic future AI

April 2024 - Nov 2024 (8 months)

Developed a fully functional Kanban Board using the **asseinfo/react-kanban** library, allowing users to drag and drop tasks across different sections. Integrated GET, PUT, DELETE, and POST requests to enable real-time data communication with backend servers. Built the backend server using Node.js and Express, developing various APIs to interact with both the Dashboard page and Kanban Board. Implemented a secure and responsive user authentication page using React and Material UI, ensuring a smooth login experience across devices. Link https://hannaprodigy.com/
