Professional Summary

Full Stack Engineer with 6+ years of experience delivering enterprise-scale applications using Java, Angular, Node.js and React. Hands-on expertise in cloud platforms (AWS & GCP), responsive UI design, and building high-performance, scalable systems. Proven track record in leading cross-functional teams, architecting cloud-native applications, and driving digital transformation projects including a Google Cloud–based Angular/Java solution.

Technical Skills

Frontend: Angular (2–17), React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, Responsive Web Design
Backend: Java (Spring Boot, Microservices), Node.js, Express.js
Cloud & DevOps: AWS (EC2, Lambda, S3, RDS), GCP (App Engine, Cloud Functions, Firestore), Docker, Kubernetes, Jenkins, GitHub Actions
Databases: PostgreSQL, MySQL, MongoDB
Architecture & Tools: REST APIs, GraphQL, Event-Driven Systems, System Design, Agile/Scrum, Git, Jira
Testing: JUnit, Jasmine, Karma, Cypress, Jest

Professional Experience

EPAM Systems
Client: Google
Oct 2023 – Present | Hyderabad, India

- **Developed and maintained Angular + Java–based tools** for reviewing and processing 3D images used in **Google Earth and Google Maps**.
- Designed and implemented new features in **Angular (frontend)** and **Java Spring Boot (backend)**, ensuring seamless integration with large-scale geospatial datasets.
- Built and optimized **responsive UI components** in Angular for visualization and interactive 3D image review.

- Managed **release cycles**: preparing builds, writing unit/integration tests, and deploying new releases to production using **CI/CD pipelines**.
- Monitored and maintained running services, **diagnosing and fixing runtime issues** in both Angular and Java backend modules.
- Collaborated across multiple **Geo product sub-projects**, handling maintenance, bug fixing, and feature enhancements.
- Conducted **code reviews, mentoring, and knowledge-sharing sessions** to improve overall code quality and team productivity.

EPAM Systems
Client: Canadian Tire Corporation
Jun 2022 – Oct 2023 | Hyderabad, India

- Optimized **Angular components and Java backend services**, reducing application load time by **30%** and improving overall responsiveness.
- Refactored critical UI modules and backend APIs, resulting in **25% faster data rendering** and smoother user interactions.
- Identified and fixed performance bottlenecks in the existing codebase, leading to **40% reduction in runtime errors** and improved system stability.
- Mentored junior developers and introduced **best practices in Angular and Java**, improving team productivity and code quality across projects.

EPAM Systems
Client: Canadian Tire Corporation
Mar 2021 – Jun 2022 | Hyderabad, India

- **Built and optimized key React components** for the Automotive Online Appointment system, improving booking flow efficiency and reducing user form completion time by **20%**.
- **Integrated APIs with AWS (Lambda, API Gateway, RDS)**, enabling scalable backend operations and ensuring high availability across multiple booking scenarios, including the E-Tires flow.
- Implemented **Redux state management and AWS-based CI/CD pipelines**, improving application reliability and accelerating feature release cycles by **30%**.

Education

Bachelor of Technology (B.Tech), Computer Science & Engineering

CMR Engineering College, JNTU Hyderabad | 2015 – 2019
