Higher Secondary Examination with 55% aggregate.

Kerala Public School (I.C.S.E)
2008
Secondary School Examination with 80% aggregate.

WORK EXPERIENCE

Maropost
(December, 2023- May, 2024)

MMC – Migration to the unified platform form two different products – commerce cloud and marketing cloud apps into the unified application.

HPE (Primus Global)
(August, 2021- December, 2023)

Rocket - Developed an application to proactively fetch the error logs from 'CrowdStrike Falcon® LogScale' using the API's and store the fetched logs in temp database to execute the rules on each of the fetched logs. All the logs that fulfilled the error rules were stored in the database along with the log snippet and the related actions for the resolution triggered to the customers. The total daily log size being over 1PB made it difficult for the cron jobs to be triggered after longer span. So multi-threading was used to get resolution for time and performance complexity.

EpiCenter - Developed hiring portal to create new request for the requirements where it can be accessible for the vendors in order to add the candidate's profiles. Once the profiles are added the email for the screening of the profile gets triggered to the panel.
A requested remains active until a candidate is finalized and the offer letter is rolled out.
Also email trigger for the feedbacks of the interview conducted is sent every 24 hours until the feedback with the outcome is updated.
A remainder email trigger before the scheduled time and update email trigger upon new schedule for the next round is send to the panel and candidate along with the calendar invite.

Notification Manager - Developed an application to notify the users of Green Lake cloud platform in case of outage and for regular updates on the progress of the resolution to it. The emails were triggered to the customers(over 1 million) of the affected region with regular updates until resolved.

HPEcare- Developed guides module with the role-based access for creation and edition of the guides. Added request module for the general users where they can request for a new guide as per the requirement and will receive updates on the progress of the same till it is created and published.
Also, feedback module was developed for the existing guides in order to get the feedback from the portal users.

PERSONAL INFORMATION

Date of Birth : 19/06/1992
Father's Name : Jagdish Prasad
Gender : Male
Marital Status : Single
Nationality : Indian
Languages : English & Hindi

Chetu India
(October, 2020-August, 2021)

Real Estate- Developed new features along with the changes to existing features as per the requirements. Maintained documentation for existing codes and all the new changes and features added. Upgrade of application's rails version from 4 to 5. Deployed the migrated application to AWS.

Tailwebs Technology
(February, 2017- October, 2020)

Lovebirds & Kunal Rawal- Set up on Shopify with theme implementation and customization as per the client's requirement along with PayUbiz integration for checkout payments.
