Objective

To apply my technical expertise in delivering innovative solutions and contribute effectively in a challenging and dynamic environment.

Education

- **St.joseph matriculation higher secondary school** 2014
  SSLC
- **Scott christian higher secondary school** 2016
  HSC
- **MET engineering college** 2016 - 2020
  Mechanical engineering/BE

Experience

- **OVERALL SOFTWARE EXPERIENCE** Dec 2020 - Till date
- **Carmatec IT Solutions PVT LTD** July 2024 - Till date
  Senior Frontend Developer

  - **Travel/Vacation Planner - Responsive Web App Development**

    - Led a team in developing the project from scratch, converting Figma designs into scalable and reusable Next.js components.
    - Implemented responsive web design principles using SASS, ensuring seamless user experiences across devices.
    - Integrated APIs using fetch for real-time data retrieval and displayed information dynamically.
    - Focused on maintaining clean, modular, and scalable code architecture for improved maintainability and performance.
    - Collaborated with the design and backend teams to ensure alignment between UI/UX design and functionality.
    - Optimized application performance by employing efficient state management and minimizing API call overhead.
    - Conducted thorough testing and debugging to ensure cross-browser compatibility and responsiveness.
    - The project will be adaptive for any BDO screen language.

  - **E-commerce Platform - Web Development**

    - Built a fully functional e-commerce web application from scratch, converting Figma designs into pixel-perfect web pages.
    - Completed the design and implementation of user-friendly interfaces for the dashboard, optimizing usability and efficiency.
    - Integrated real-time data visualization features into the dashboard, providing actionable insights and enhancing decision-making capabilities for users.
    - Developed the web application with full-screen responsiveness, ensuring optimal performance and display on all device sizes.
    - Contributed to the multilingual development of the platform, initially creating the application in English and then adapting it to French.
    - Handson experience with the complete project and the Dashboard of the project.

○ **Admin Panel Development for Notepad Notification App**

- Designed and developed the UI from scratch, ensuring a user-friendly and visually appealing interface.
- Integrated dashboard with interactive graphs for real-time data visualization and analytics.
- Implemented report generation features, providing detailed insights and summaries.
- Developed settings and configuration modules to allow customization and user preferences.
- Ensured seamless API integrations for smooth communication between frontend and backend.

○ **Movie Ticket Booking App**

- Enhanced the UI design to improve the overall look and feel of the application.
- Worked on UI improvements for the payment gateway, ensuring a smooth and user-friendly checkout experience.
- Optimized user interface elements for better accessibility and responsiveness.
- Improved navigation flow and user interactions to enhance the booking experience.
- Collaborated with the team to implement UI/UX best practices for better usability.

- **SUN TV Network Limited** Feb 2023 - May 2024
  React.JS developer

○ **Sun NXT - OTT**

- My part in Sun NXT IS leading the web team for the project with new implementations and other live bug fixing.
- Spearheaded the successful integration of advertising solutions with in the video player.
- Successfully implemented SEO changes for better optimisation with Google.
- Canonical tag changes for better dealing with the duplicate content.
- Successfully introduced and implemented a new content category on OTT.
- Diagnosed and resolved a critical live tv player issue ensuring uninterrupted streaming for users.
- Implemented the addition of a new blog in the existing OTT platform, contributing to improved content organisation and user engagement.
- Monitored user analysis to access the impact of EPG highlighting on user engagement and content delivery.
- Integration of web to Android Deeplinking functionality to navigate users from web browsers to Android app.
- Successfully led the update of GDPR policy ensuring compliance with the latest data protection regulations.
- Detected a correction issues in the highlighting index, significantly improving the accuracy and effectiveness of the highlighting features.
- Successfully introduced new tags in user engagement for more tracking with in the application.
- Implemented in live with the .text files enhancing transparency and control over programming advertising on the website.
- Resolved various QA BUGS in collaboration with the QA Team ensuring more robust and reliable software product.
- Worked with UI changes.
- Updated the GDPR policy in the project and launched the project in live successfully.
- Content scaling issue fixture in the frame of the player has been done and successfully launched live.

○ **Sun Direct GO - OTT**

- Completely changing the UI with functionality changes.
- Fixing bugs, new features Integration and over-all handling the project.
- Working with DRM integration with the video player to avoid content leakage.
- Customer tracking SDKs integration with the video player to track the user activity.
- Live TV UI screen changes as per the TV UI
- Successfully integrated the UI of webOS TV to the website.
- Deep linking from mobile to Android App and IOS app.
- Routing or Navigation to the PlayStore / AppStore has be done successfully to the project in the front-end.

- Complete project UI has been worked/ Modified upto time to time updates.

- **Sun News Web App**

  - Developed the application from scratch using React.js, ensuring a scalable and maintainable codebase.
  - Designed and implemented a dynamic and user-friendly interface, prioritizing usability and responsiveness.
  - Integrated the user interface with URL's to enable seamless and efficient data interaction.
  - Collaborated with designers to ensure the UI/UX design aligned with project requirements and provided an intuitive user experience.
  - Worked closely with backend developers to integrate and optimize the web app.

- **SunNXT - LG TV App (WebOS APP DEVELOPER)**

  - Actively debugged the project, identifying and resolving issues to improve overall functionality and performance.
  - Continuously expanded knowledge of the project, contributing by adding new features and enhancing existing functionalities.

- **MAN ENGINEERED SYSTEMS** Dec 2020 - Nov 2022
  React.js - Software developer

  - **Company Product (EV & Engineering Services Platform)**

    - Developed and maintained a static website using React.js to showcase the company's EV products and engineering services.
    - Built reusable React components to ensure scalability and maintainability.
    - Optimized website performance for faster load times and improved SEO.
    - Implemented React Router for smooth navigation and a dynamic user experience.

  - **E-commerce Footer Design**

    - Designed and developed a responsive and user-friendly footer section for an e-commerce platform.
    - Implemented multiple sections including quick links, contact details, social media icons, and newsletter signup.
    - Ensured accessibility and cross-browser compatibility for a seamless experience.
    - Used CSS Flexbox/Grid for layout and responsiveness.

  - **Civil Engineering Web Application**

    - Developed a data-driven web application for managing civil engineering product details.
    - Implemented CRUD (Create, Read, Update, Delete) operations to allow users to modify and manage product data efficiently.
    - Ensured seamless data handling and state management using React and relevant libraries.
    - Integrated form validation and user authentication for secure data modifications.
    - Worked closely with backend developers to integrate APIs for dynamic data retrieval and updates.

HTML

- With extensive experience ability to create high quality HTML files based on latest HTML5 standard.
- Ability to understand any advanced hyperlinked index.html.
- Ability to Code the entire HTML, CSS and JS site from end to end.

CSS

- Experienced in creating web applications and app layouts that match designer visions at a range of

screen resolutions.
    - With extensive experience in HTML5 and CSS3 coding to offer responsive websites layout to modern browsers and mobile devices.
    - With CSS 3, leveraging best practices and modifications of existing CSS files to enhance the user experience.
    - With extensive experience ability to blend CSS and JS techniques to bring out the required results.

- JAVASCRIPT

    - Experience with advanced javascript concepts including prototype object class based and familiar with JSON and other API's and REST Operations.
    - Experienced in integrating 3rd party scripting libraries and integrations.
    - Worked with developers and designers for interactive web design, developing widgets and external data services or case API management and CRUD operations for internal APP and other responsive web projects.
    - Experienced in handling javascript for better user experience

- React.JS

    - Responsible for React UI and architecture.
    - Experienced with working in both class and functional components.
    - Experienced with Building components, Node packages, React-Router-Dom, including Tree, Slide-View and overall boilerplate.
    - Implemented stable React components and stand-alone functions to be added to any future pages.
    - Experienced with hooks concepts in functional components.
    - Experienced with react based modules like REACT-ROUTER-DOM and other required modules as per the project needs.

Programming Languages

- HTML
- CSS
- Bootstrap
- CSS Templates
- SCSS
- Javascript
- React.JS
- Next.JS

Languages

- Tamil
- English
- Hindi
- Urdu
- Malayalam

Skills

- Verbal and communication skills on various human languages.
- Knowledged and Experienced with various programming languages.
- Adept at writing clear and concise technical documentation for projects.
- Understanding the concepts and providing KT for the team.
- Ability to collaborate with UX/UI designers for a user-centric approach to software design.
- Experience with version control systems such as Git for collaborative coding.
- Team management.
- Familiar with JSON and other API's, REST and CRUD Operations and 3rd party script integrations.

Seminar

- Presented a seminar on the mechanics and differences between two-stroke and four-stroke engines.
- Attended a workshop on 3D printing technologies.
- Completed a project on designing and developing a shaft bicycle.
- Conducted a project on using a mixture of potassium nitrate (KNO_3) with tricalcium silicate for managing room temperature.

Tools

- VS code
- WebOS SDK / Emulators / Simulators
- GitHub
- Google Sheets
- Microsoft Excel sheets
- Microsoft office

Declaration

- I solemnly declare that all the above information is correct to the best of my knowledge
