Professional Summary

Quality Engineer with 2.5 years of experience ensuring end-to-end product quality across mobile, web, and API platforms. Strong foundation in manual testing and growing expertise in automation using **Playwright**. Skilled in designing real-user scenarios, executing regression and compatibility tests, and contributing to test automation maintenance. Passionate about delivering seamless user experiences through collaboration and detail-oriented testing.

Technical Skills

• Manual Testing – Functional, Regression, UI, Compatibility, End-to-End
• Automation – Playwright (TypeScript basics), Smoke and Regression Scripts
• API Testing – Postman, Swagger
• Performance Testing – JMeter
• Tools – Azure DevOps, Agile Methodologies

Professional Experience

Keka — Quality Engineer | Jan 2023 – Present

• Performed functional, UI, and regression testing for Keka Mobile App and Keka LMS from project initiation through release.
• Designed and executed detailed test cases ensuring coverage of real-world user flows across devices and browsers.
• Conducted API testing using Postman to verify endpoints, payloads, and integrations with internal systems.
• Assisted in developing and maintaining Playwright-based automated test suites, including smoke and regression scenarios.
• Ran automation test suites regularly and collaborated with developers to identify root causes of test failures.
• Participated in Agile ceremonies (sprint planning, reviews, retrospectives) and actively contributed to release quality discussions.
• Performed performance testing using JMeter to measure and optimize response times.
• Documented defects with clear reproduction steps and supported quick turnaround validation of fixes.

Projects

Keka Mobile App

• Tested core modules including attendance, leaves, payroll view, and approvals.
• Validated UI consistency and responsiveness across Android and iOS builds.
• Designed real-user test cases covering employee journeys and performed exploratory testing.
• Coordinated with developers to reproduce and resolve issues quickly during release cycles.

Keka LMS (Learning Management System)

• Validated LMS features including course creation, assignment workflows, and progress tracking.
• Conducted both functional and API testing to ensure seamless integration between modules.
• Supported automation coverage by identifying repetitive test scenarios suitable for Playwright scripts.

Education

Gayatri Vidya Parishad College of Engineering — Graduated 2023

Additional Information
• Detail-oriented with a keen eye for UI/UX inconsistencies and edge cases.
• Good understanding of automation principles and eager to expand in this area.
• Strong collaboration skills and ownership mindset within agile environments.
