EXPERIENCE

AUG 2023 - PRESENT

UI Designer, Lollypop Design Studio

Chennai, Tamilnadu

With **3+ Year Experience** I have worked on **17+ projects** across **10+ domains**, including Banking, Fashion, AI in Healthcare, Agriculture, Education, high-resolution dashboards for Barco screens (17,280 x 9,720), Cybersecurity dashboards, and Marketing websites. While managing multiple projects simultaneously, I ensured seamless client communication and alignment. Additionally, I independently designed a website for **our CEO**, demonstrating my ability to take on **critical responsibilities.**

I took the initiative to launch **POPTOPICS**, a series that shares valuable UX tips to enhance industry knowledge and engagement. I also collaborated with the sales team to refine **Project estimates** and gather client requirements, ensuring smooth execution and alignment with business goals.
Working closely with developers, I played a key role in delivering high-quality implementations on time.

Beyond project execution, I explored innovative design solutions, **creating two VR Popshots**—one focused on **Spatial Computing** and another on **Phone Navigation in VR**—both featured on Lollypop's social media. Additionally, I designed the concept, micro-interactions, and visual design for a **Smart AI Assistant**, now live on the Lollypop website, enhancing user engagement and experience.

JUNE 2022 - AUG 2023

Associate UI Designer, Lollypop Design Studio

Chennai, Tamilnadu

As an Associate UI Designer, I collaborated with UX teams, **contributed to key UX decisions**, and **engaged directly with clients** to present designs and secure approvals. I worked on projects for major brands like Zudio, Unilever, Stanza Living, Shubra Ranjan, and Isthara, crafting user-centric interfaces that balanced business goals and user needs.

I actively shared design knowledge through sessions at **Let's Talk Design on components, auto layouts, color theory, and Framer**. I also explored branding, Designing Sticker & Creating presentation for the whole **Design Atti event** and **participated in a 24-hour Designathon Event**, handling research, UI design, animation, and presentations under tight deadlines.

To foster continuous learning, I **initiated Design Chronicle**, an internal platform for designers to exchange industry trends, innovative ideas, and problem-solving strategies, enhancing collaboration and growth.

BRANDS WORKED

ZUDIO • NEOM • REYA AI • ISTHARA • APPRO • ASATO • STANZA LIVING • SHUBHRA RANJAN • KOTAK MF • SBI LIFE • AGRI ADAPT • NDRK • USHOP - UNILEVER • CYBER MINDER • LOLLYPOP SMART AI ASSISTANT • COWRKS
