EDUCATION

Indian Institute of Information Technology, Nagpur, India 2021-25

Bachelor of Technology, Computer Science & Engineering CGPA:7.1

EXPERIENCE

Data Science – (training +Project) May 2024-July 2025

Unified Mentor- (Remote)

- Participating in comprehensive training sessions to enhance skills in data science.Working on practical projects to apply theoretical knowledge in real-world scenarios.Collaborating with a team of professionals to develop solutions and improve workflows.
- Learning and utilizing tools and technologies such as Python, PowerBI, SQL,Data Visualization techniques.
- And also worked on projects like predictive model for crop production Analysis, Entertainer Data Analysis and Heart Disease Diagnostic Analysis.

AI & Data Science (Intern) June 2024 – August 2024

Coding Junior **-** **(**Remote**)**

- Engaged in fine-tuning large language models (LLMs) to improve performance and accuracy.Collaborated with a team to develop and implement strategies for enhancing model outputs.
- Utilized tools and frameworks such as TensorFlow, Hugging Face Transformers,
- Contributed to research and development efforts by experimenting with various model architectures and hyperparameters.

PROJECTS

- **NewsIQ web Application(Final year):** Developed comprehensive news application featuring News Summarization, NewsQA, and Fake News Detection. Implemented functionalities using fine-tuned transformer models for NLP tasks and integrated real-time news updates via APIs. Ensured high performance and accuracy in predictions and summarization**.**(Python, PyTorch, Transformer models , flask , NewsAPIs.)(Github Link)

- **Skin Lesion Cancer Classification(Academic):** Developed a model to classify skin lesions using MNIST 10000 image data.Achieved 97% accuracy using different techniques and hyperparameters in classifying skin lesions; developed a user-friendly interface for dermatologists to use in clinical settings. (Python, TensorFlow, Over Sampling, Transfer Learning)(Github Link)

- **Medical Chatbot:** Developed a chatbot to assist users with medical inquiries and provide health-related information. Integrated Pinecone Vector Database for efficient storage and retrieval of medical information. Deployed the chatbot on a web platform using Flask.(Python, LangChain,Pinecone VectorDB,Flask,HuggingFaceLlama2 model). (Github Link)

SKILLS

- **Technical Skills** Machine Learning (ML), Deep Learning (DL), Natural Language Processing (NLP), Generative AI (GenAI), SQL, Statistics
- **Frame works & tools** Numpy, Pandas, Matplotlib, Seaborn, Tensorflow, Scikit learn, Langchain, Power BI, Vector DataBase, RAG System
- **AWS Skills** AWS EC2, S3, Deployment **Programming Languages** C++, C, Python

EXTRA-CURRICULAR ACTIVITIES

- Solving DSA Problems on : Leetcode, Coding Ninjas,
