AMIT SAINI

amitsaini014@gmail.com | +91-9052108500 | 10 Years 5 Months

I have over 10 years of diverse experience as a passionate technologist, effective communicator, and strong team player. Throughout my career, I have successfully turned around critical assignments and built a solid track record of delivering excellence. My expertise includes hands-on experience in Web Applications, UI and Mobile App Development, as well as proficiency in Object Oriented Technologies for both client-side and server-side scripting development.

EXPERIENCE:

Senior Software Engineer
EPAM Systems | Dec-2020 to present

As a Senior Software Engineer in the Digital Experience Practice (DEP) domain, I collaborate with multidisciplinary teams of consultants, designers, architects, and engineers to deliver innovative, competitive, and disruptive technology solutions. I specialize in providing end-to-end solutions across Front-end & back-end, Mobile (Native & Cross-platform). My approach combines strong engineering expertise with a start-up mindset, emphasizing agility, scalability, and seamless integration. I am committed to delivering high-quality, best-in-class solutions that enable clients to stay competitive in an ever-evolving digital landscape.

Associate – Technology
Cognizant Technology Solutions | April-2015 to Dec-2020

Core team member of the Immersive Practice specializing in the Web Applications, UI, Mobile App development, Object Oriented Technologies on client-side/ server-side scripting development. Part of the development of prototypes and research project in next generation technologies. Programming solutions that solve the business problem and help businesses integrate latest tech in their business model. Won awards and recognition for the contribution to the team.

Engineer Intern
Open Text Technologies | Dec-2014 to Jan-2015

Worked in Research and Development domain and contribute to develop the connectors to connect repositories of Enterprise Content Management System like Open Text Content Server, Documentum, File Net and SharePoint etc. to Box, Google Drive, Dropbox etc.

EDUCATION:

- Master of Computer Application (MCA) with 85.20% in 2014 from Technocrats Institute of Technology.
- B.Sc. (Honors) Computer Science with 71.79% in 2011 from Institute for Excellence in Higher Education.

PROFESSIONAL TECHNICAL SKILLS:

FUNCTIONAL SKILLS

- Client interaction and management
- S/W development life cycle methodologies AGILE, SCRUM, SDLC
- Project requirements gathering, functional specifications, system study, analysis, design, development
- Implementing projects, scaffolding, unit testing
- Release Management
- Project maintenance

TECHNICAL SKILLS

• Technologies	- JavaScript, Angular, Typescript, HTML, CSS, Ionic, REST, Bootstrap, SASS/LESS, Webpack, Nodejs, Karma, Jasmine, Jest, Playwright, React
• Database	- Mongo DB
• AST	- SonarQube, Checkmarx
• IDE's	- Visual studio Code, IntelliJ IDEA
• Version Controls	- GIT, Bitbucket, Gitlab
• Operating System	- Mac, Windows
• Cloud	- AWS
• AI	- GitHub copilot, Qodo

PROJECTS EXPERIENCE:

UKG (Ultimate Kronos Group): **[Duration] Jan-2025 to present**

Ultimate Kronos Group is a global provider of human capital management (HCM) and workforce management solutions.

Works on the Timekeeping WFM Modules

- Designed and developed interactive homepage cards/tiles to provide quick access to complex timekeeping workflows, improving usability and reducing navigation time for end-users.

- Integrated Highcharts visualizations to display employee time, schedules, and KPI metrics, enabling quick insights and data-driven decision-making for managers and employees.
- Leveraged existing services and built Node.js services to handle core timekeeping functions such as data retrieval systems.
- Contributed to the modern experience redesign of the timekeeping module, aligning with UX best practices and enhancing accessibility, performance, and user engagement.

Technologies Used: Angular, Nodejs, JEST, Playwright, GitHub copilot, Jenkins, SonarQube, GitHub, Jira **Team Size – 10**

Role: As a Senior Developer my responsibilities were to**:**

- Collaborated with client stakeholders, architects, and cross-functional teams in an Agile/Scrum environment to deliver scalable and maintainable solutions.
- Actively contributed to research initiatives, peer code reviews, and knowledge-sharing sessions, fostering team growth and maintaining coding best practices.
- Demonstrated strong prioritization and ownership, consistently delivering well-tested, production-ready code on or ahead of deadlines.

London Stock Exchange Group: **[Duration] Sep-2022 to Dec-2024 (28 months)**

I have worked on the implementation and support of various projects, including:

1. **I&A Banking**: Developed and supported the CPD (China Price Discovery) Interbank page, which features advanced bond filtering, broker selection for quote/trade prices, and integration with CFETS and X-bond for real-time pricing.
2. **EFNP (Equity Foreign Net Positions)**: Designed and implemented a system to monitor equity net positions across 10 international stock exchanges in Asia. The system tracks data with flexible time views (daily, weekly, monthly, etc.) and provides accurate, real-time position monitoring.
3. **IFDI (Islamic Finance Development Indicator)**: Contributed to the development of a composite index that tracks the growth of the Islamic finance industry across 131 countries. The IFDI measures performance in areas such as financial performance, governance, knowledge, sustainability, and awareness.
4. **IFL (Islamic Finance Library)**: Developed an app that allows users to search and browse Refinitiv's library of Islamic finance documents, including fatwa, standards, and research. The app also provides detailed profiles of Shariah scholars, highlighting their contributions and involvement in Islamic finance.

Technologies Used: Angular, React, JEST, Graph Ql, SonarQube, Gilab, Jira **Team Size – 6**

Role: As a Senior Developer my responsibilities were to**:**

- Implemented multiple features across various applications, ensuring high-quality delivery.
- Proficient in logical problem-solving, research, debugging, and front-end web technologies.
- Actively contributed to research initiatives, peer code reviews, and knowledge-sharing sessions to foster team growth.
- Demonstrated strong prioritization skills, consistently delivering unit-tested code on or ahead of deadlines.
- Recognized for quick decision-making and delivering impactful results in critical project scenarios.

Verifone Holdings: **[Duration] Jan-2020 to Aug-2022 (31 months)**

The Common Portal is a wrapper concept to offer one single entry to Verifone Customers to access all the applications that are being built in the Greenbox as a part of the Verifone Cloud Services. It's a reporting portal where merchants can view their transactions, settlement information, manage users, configure entities, etc.

Technologies Used: Angular, Typescript, JEST, Graph Ql, SonarQube, Bitbucket, Jira **Team Size – 8**

Role: As a Senior Developer my responsibilities were to**:**

- Worked on the Enhancement of the features and modules.
- Actively participating in Agile Scrum meetings including Grooming sessions, Stand up calls and Retrospective, Refinement meetings.
- I worked as a back-up team leader.
- Worked on release-management activities, Git code merge and pull request reviews.
- Providing Knowledge Transfer sessions to new joiners also having brainstorming sessions within team on new IT skills.
- Worked on creating utilities and minimizing time for product shipment.
- Active participation in the whole development process.
- Active communication with the stakeholders and colleagues, discussing product functionality and design.

Cognizant – Play Application: **[Duration] Oct-2020 to Dec-2020 (3 months)**

Application is a supercharged engineering platform for developing robust, modular & secure applications reasonably fast. Play is a CLI meta-framework of templates, components & intelligent tools that augment the development process.

Technologies Used – Nodejs, JavaScript, Typescript, Angular. **Team Size - 5**

Role: As a Senior Developer my responsibilities were to**:**

- Responsible for creating the backend of the application.
- Responsible for working on some CLI modules and integrate to backend.

Advisor To Advisor App: **[Duration] Oct-2019 to Sep-2020 (12 months)**

This is Advisor to Advisor offline App which is used by FT Advisors while they are on fields, features contain like what FT thinks, review their products, save portfolio, send data to client, backup of all history etc.

Technologies Used – Ionic, Angular, HTML, CSS, Karma **Team Size - 5**

Role: As a Senior Developer my responsibilities were to**:**

- Responsible to creating scaffolding, initial setup of project, setup of SQLite, firebase etc. and Git to manage version in development.
- Involved in daily SCRUM meetings to keep track of the ongoing project status and issues.

FT Mobile App: **[Duration] March-2017 to Aug-2018 (18 months)**

The hybrid mobile application is a part of financial organization digital ecosystem project. The mobile application will be compatible for iOS and Android devices. It is similar to web application in case of role-based login and modules.

Technologies Used – Ionic, Angular, HTML, CSS, Gulp. **Team Size - 16**

Role: As a Senior Developer my responsibilities were to**:**

- Responsible for design scaffolding for project and Git to manage version in development.
- Responsible for native look & feel and provide the build for IOS and Android devices.

FTI Web Application: **[Duration] Sep-2016 to Feb-2017 (6 months)**

The responsive web application will act as a new digital eco system for Financial Investment customers. The application consists of role-based modules and sub applications. For e.g. guest, distributors and investors.

The application has user base of over 1 million.

Technologies Used – HTML5, JavaScript, Angular, Bootstrap, Node JS, Git, Bitbucket, karma and Restful WEB APIs.

Role: As a Developer my responsibilities were to**:** **Team Size - 22**

- Understanding and gathering project/module requirements.
- Development of reusable, testable UI modules and components.

Cognizant - Angular Component Library: **[Duration] May-2016 to Aug-2016 (4 months)**

It is an Angular Design Pattern Component Library. It helps in building websites faster, cleaner and smarter. Component Library is built by developers, of the developers and for the developers. Component Library power is in its extensibility. It allows developers to grow the library.

Technologies Used – Angular, HTML5, CSS3, Gulp, karma and jasmine

Role: As a Developer my responsibilities were to**:** **Team Size - 4**

- Developed scaffolding with engineering which gives you extended the component library into higher versions.
- Developed backend for Component Library using Nodejs and Express**.**

Health Application – Web Application **[Duration] Jan-2016 to April-2016 (4 months)**

The objective of this project is to develop an application for the employees to track the Power and Water equipment's health of over the globe. A dashboard application with different sections for individual departments.

Technologies Used – HTML, CSS, JavaScript, Angular **Team Size - 12**

Role: As a Developer my responsibilities were to**:**

- Development of reusable, testable UI modules and components.
- Working with UX team on Visualization of UX workflows.

CNO-Mobile App: **[Duration] May-2015 to Dec-2015 (8 months)**

This app provides insurance benefits solutions and markets voluntary insurance products. The mobile application helps to efficiently for agents to follow up the customers through maps, taking appointments, sales policies etc.

Technologies Used – Ionic1, AngularJS, HTML, CSS.

Role: As a Developer my responsibilities were to**:** **Team Size - 25**

- Responsible for native look & feel and provide builds for IOS devices.
- Analyzing the code and fixing bugs.

Place: Bhopal **AMIT SAINI**
