OBJECTIVE

Experienced software developer with 5 years of hands-on expertise in building strong focus on developing an efficient product with a proven track record of delivering efficient, high-quality solutions that drive company growth and implementing best practices in software development. Looking for an opportunity to grow in software development where I can learn new skills and expand my knowledge.

SKILLS

- ReactJs
- NextJs
- Angular
- JavaScript
- Typescript
- GraphQL
- HTML
- CSS
- Tailwind CSS
- Contentful
- REST API
- Git/Gitlab
- JEST

EDUCATION

Bachelor of Computer Application

DRBCCC Hindu College

2016 – 2019

WORK EXPERIENCE

Senior Software Engineer | Feb 2023 – Present | IDP Education

Re-platforming of SAP hybris to React(v18) and NextJs(v13) application

- Spearheaded the implementation of user authentication journeys (Sign In, Sign Up, Forgot Password) using AWS Cognito, enhancing user experience and security.
- Analyzed and implemented routing functionality to support micro frontends based on specified requirements.
- Developed a Lead Generation Enquiry Form with React Hook Form, facilitating student inquiries and registrations. The form dynamically adjusts based on user geolocation and supports localization for 12+ countries.
- Executed a Proof of Concept (POC) for deploying a Next.js application using Serverless Stack (SST), improving scalability and efficiency.
- Integrated React components dynamically into the Next.js application by rendering data from Contentful through REST API and GraphQL queries.
- Optimized code through component splitting and conditional rendering, reducing bundle size and which reduced the package size which enhances overall page performance.
- Implemented dynamic SEO content using Contentful in conjunction with Next.js built-in methods, optimizing web pages for improved search engine visibility and performance.
- Enhanced security with JWT authentication via AWS Cognito for session management and integrated a third-party OTP service with CAPTCHA to mitigate spam risks.
- Managed hyper care tickets to ensure swift resolution of post-launch issues, providing critical support and enhancing user satisfaction.

Software Engineer | Oct 2020 – Jan 2023

Progressive profile Dynamic form | Angular (v8 & v12)

- Designed and Implemented User Interface of an Angular Single Page Application (SPA) to streamline customer registration for campaign forms, optimizing user engagement.
- This application used for the marketing team to manage organic and paid campaigns across 30+ countries, resulting in increased lead generation.
- Implemented a micro-frontend architecture, allowing the application to integrate seamlessly with various platforms.
- Developed a Single Page Application (SPA) using Angular, defining a content model in Contentful tailored for various countries.
- Dynamically rendered components based on Contentful customization and ensured unit test coverage with Jest.
- Conducted code optimization for SonarQube compliance with security and coding standards and maintained version control through GitLab.

Trainee / Developer Analyst | Sep 2019 – Sep 2020

User Accounts, Admin Progressive Profile | Angular (v8 & v12)

- Completed a six-month training program focused on Java, J2EE, HTML, CSS, JavaScript, and jQuery, achieving certification through assessment.
- Collaborated on a Java web application project (B2C), gained hands-on experience in development soon got trained into angular SPA Application and transitioned to Angular projects, contributing to B2B applications that track customer conversions into leads, enhancing sales insights for counselors.
- Developed B2B Angular applications, including forms for Campaigns, Walk-In Registrations, and Events, while creating a centralized admin portal for form management.
- Contributed to an Angular Element project as a micro frontend, enabling integration into various applications (Java/React) via JavaScript and Event Emitter for communication.
