Profile Summary

Experienced **Software Engineer** with a strong background in building scalable web and mobile applications. Skilled in developing REST APIs using **Express.js**, **Sequelize**, and **Knex.js**, and creating dynamic, SEO-friendly web pages with **Next.js** and **React**. Proficient in **React Native** for cross-platform mobile development, ensuring seamless user experiences across devices. Adept at optimizing frontend performance, managing state efficiently with **Redux**, and implementing secure authentication flows. A collaborative team player focused on delivering high-quality, maintainable, and efficient solutions.

Technical Skills

- **Languages** - JavaScript, TypeScript
- **Frameworks -** React.js, Next.js, Express.js, React Native
- **ORM** - Sequelize, Knex.js
- **Databases** - MySQL, Microsoft SQL Server
- **CSS Frameworks**: Bootstrap, Tailwind CSS, Ant Design

Professional Experience

Software Engineer | Kaay Labs Pvt Ltd | Chennai, India | Sept 2020 – Present

- Developed REST APIs using **Express.js**, integrating **Sequelize**, **Knex.js**, and optimizing stored procedures for enhanced database operations.
- Designed and optimized SQL queries, indexes, and stored procedures to enhance database performance in **MS SQL Server** and **MySQL**.
- Implemented **JWT**-based authentication along with **Google** and **Facebook** login to ensure data security and accessibility. Integrated **Razorpay** and **Cashfree** for secure payment processing.
- Configured and managed CORS policies dynamically in **Express.js** to securely handle different environments.
- Implemented real-time communication capabilities using **Socket.IO** to enhance application functionality.
- Developed responsive web applications using **React**, incorporating reusable components and complex business logic to ensure a seamless user experience across devices.
- Leveraged **Next.js** for dynamic web pages with server-side rendering, enhancing performance and Implementing **SEO best practices** for better search engine visibility.
- Developed business logic for Android and IOS platforms using **React Native**, ensuring a seamless and consistent user experience.
- Integrated **Redux** and **Redux Saga** for efficient state management in mobile and web applications, enhancing performance and maintainability.
- Optimized JavaScript bundling and transpilation using **Webpack** to improve frontend performance and reduce load times.

- Developed and improved container scripts to ensure uniform application environments across development and production.
- Leveraged **AWS** services, including S3 for file storage, to enhance application scalability and performance.
- Integrated **Playwright** for end-to-end testing to ensure application reliability and stability.
- Collaborated with cross-functional teams to design, develop and deploy features aligned with customer business requirements.

Education

B.Tech in Computer Science and Engineering, SRM Institute of Science and Technology, Chennai (2019)
