Profile Summary

Dynamic and results-driven **Software Developer** with over **6+ years of experience**, specializing in **MERN stack development**. Expertise in building scalable web applications using **React.js**, **Next.js**, **Node.js**, and **MongoDB**, along with proficiency in **mobile app development** using **Flutter**. Skilled in crafting intuitive and responsive user interfaces with **Angular** and **Tailwind CSS**, complemented by backend solutions using **Express.js**. Adept at collaborating with cross-functional teams to deliver high-quality, client-focused solutions, ensuring performance optimization and user satisfaction.

Professional Experience

MERN Stack Developer / Next.js Developer
Constient Global Solutions, Chennai
Aug 2021 - Present

- Developed and maintained full-stack applications using the MERN stack.
- Developed **server-side rendered applications** with **Next.js**, enhancing **SEO** and application performance.
- Led front-end development with **React.js**, integrating dynamic backend services.
- Utilized **Tailwind CSS** to build responsive designs and **TypeScript** for type safety and maintainability.

Front End Developer / Mobile Application Developer
Trackeasy Software Solutions, Thanjavur
Oct 2018 - Jul 2021

- Built responsive and interactive web application UIs using **Angular** and **React.js**.
- Delivered cross-platform mobile applications for **Android** and **iOS** with **Flutter**.
- Optimized application functionality to ensure seamless user experiences.

Skills

Programming Languages: JavaScript (ES6+), Java, Dart
Frontend Technologies: React.js, Next.js, Angular (5/7/9/10), Flutter, Tailwind CSS
Backend Technologies: Node.js, Express.js
Databases: MongoDB, Firebase
Tools & Frameworks: Sanity, Atlassian Bitbucket, Jira, Confluence

Education

B.Tech in Information Technology
St. Joseph's Institute of Technology - Chennai

Projects

1. **Hotel Promotion Group**
   Website: https://bookoni.com/
   Technologies: Next.js, Tailwind CSS
   Developed a robust platform enabling users to explore hotels, view detailed information, and utilize vouchers for bookings. Leveraged server-side rendering (SSR) to optimize SEO and improve performance. Delivered a responsive user interface with dynamic content loading for a seamless experience from browsing to booking.

2. **Parking Management System (PMS)**
   Website: https://pms.shopping-raststaette.ch
   Technologies: MongoDB, Express.js, React.js, Node.js (MERN stack)
   Designed and developed a parking management application integrated with CCTV systems to monitor vehicle movements. Implemented functionality to detect overparked vehicles and generate automated PDF invoices, streamlining administrative processes. Ensured scalability and efficiency through a well-architected backend and a user-friendly frontend.

3. **Proproprop**
   Website: https://prop-web-dot-prop-364107.el.r.appspot.com
   Technologies: React.js, Node.js, MongoDB
   Created a **property sale/rental platform** where owners can list properties and buyers/tenants can search and select based on specific requirements. Developed **RESTful APIs** to ensure efficient data flow between client and server, providing users with a seamless and intuitive browsing experience.

4. **Web and App Studio**
   Website: https://webandappstudio.com
   Technologies: Next.js, Tailwind CSS
   Built a dynamic website for a software company, emphasizing **server-side rendering (SSR)** for enhanced SEO and fast performance. Designed **responsive UI components** using Tailwind CSS, ensuring compatibility across devices. Delivered dynamic content loading to boost user engagement and page load speed.

5. **JiViews**
   Google Play: JIVI Enterprise Workforce Management
   Technologies: Flutter, Dart
   Contributed to the development of the **JIVI Enterprise Workforce Management** mobile application, focusing on features such as employee calendars, leave applications, and filtered leave records. Designed a **smooth, responsive UI** tailored for terminal operations, improving workforce management efficiency and usability.
