Profile

- I have 6 years of professional experience in web applications using HTML5, CSS3, Bootstrap, JavaScript, JSON, Node JS, vue.js MongoDB, .NET, SQL, React JS and Redux.
- Creating style guides, best practices and setting UI standards for enterprise/consumer applications using Material UI.
- Expertise in using Object Oriented Programming concepts in JavaScript and working knowledge of DOM models.
- Implemented load-balancing with NGINX to allow dozens of Node JS instances to handle thousands of concurrent users.
- Developed user interface using JSP with Java Beans, JSTL and Custom Tag Libraries, JS, CSS, JQuery, Node.js, React Js, and HTML to speed the application. ○ Experience in fetching data from RESTful Web Services using AJAX.
- Experience in version control tools including Git.
- Expertise in developing web pages creating various UI widgets using JavaScript libraries like jQuery and in making cross-browser compatible.
- Experience working on CSS Preprocessors like SASS and LESS alongside JavaScript task runners like NPM and Web pack.
- Worked on React JS Virtual Dom and React views, rendering using components that contain additional components called custom HTML tags.
- Experience in using React JS for creating a user interface and single page web applications.

Experience

Azure Softtech Solutions, Madurai.

Senior Software Engineer **Jan2018 – Present**

Education

NMSSVN College, Madurai , Madurai. B.Com - Computer Applications

Skills & Abilities

- **CSS3**
- **SASS**
- **Bootstrap**
- **JavaScript**
- **ES6**
- **Angular**
- **NgRX**
- **HTML5**
- **TypeScript**
- **ReactJS**
- **vue.js**
- **.NET**
- **Redux**
- **NextJSc**

Project

1. Learning Management System – Codin City

Description:
A robust Learning Management System (LMS) built to streamline course delivery, administration, and tracking for educational institutions and corporate clients.

Technologies Used: ReactJS, Node.js, .NET, ReduxJS, Webpack, Grunt, Babel, SASS, GraphQL, RxJS, JavaScript, HTML5, CSS3, Bootstrap

Responsibilities:

- Collaborated with clients to gather requirements and deliver solutions aligned with business goals.
- Developed responsive front-end using **ReactJS** and integrated it with **.NET** and **Node.js** on the backend.
- Facilitated **Agile ceremonies** including sprint planning, retrospectives, and demos.
- Created scalable **Web APIs** using **Node.js**, hosted in a load-balanced environment.
- Optimized Microservices with **.NET** and **ES6**, enhancing database performance and scalability.
- Enabled **GraphQL integration** for efficient data fetching.
- Migrated legacy Java code to **Kotlin** for performance and maintainability.
- Configured production environments and managed dependencies using tools like Redux, Webpack, and Grunt.
- Leveraged **RxJS** and async/await for better state and data handling in React application.

2. Material Price Management – Valcan Analytics

Description:
A Material Pricing platform to manage inventory, logistics, pricing, and procurement planning.

Technologies Used: ReactJS, .NET, Node.js, Redux, jQuery, HTML5, CSS3, Bootstrap, SASS, Grunt, Dreamweaver

Responsibilities:

- Developed a custom, responsive **Single Page Application (SPA)** to replace a legacy web system.
- Built dynamic, cross-browser compatible UI components using **ReactJS**, **.NET**, and JavaScript.
- Integrated **Web APIs** and handled async data flow using Redux and $http service.
- Created drag-and-drop UI using jQuery, and ensured cross-device compatibility using Media Queries.
- Automated tasks using **Grunt** and enhanced UI with **jQuery components** in **MVC pattern**.
- Focused on modular and maintainable front-end development with **SASS**, **Bootstrap**, and responsive layouts.

3. Overtone – Tower 4S (Sound Insulation UI Tool)

Description:
An internal tool to manage sound insulation solutions involving customer input forms, offer management, and sound data analytics.

Technologies Used: ReactJS, Redux, React Router, ES6, SASS, Bootstrap, Node.js, Jest, Enzyme

Responsibilities:

- Built and maintained key modules such as login, customer data, and offers using **ReactJS** and ES6 features.
- Used **Redux** for global state management and **ReactRouter** for navigation and routing.
- Applied **SASS** and Bootstrap for consistent styling across platforms.
- Ensured cross-browser compatibility and debugging with Chrome/Redux DevTools.
- Wrote unit tests using **Jest** and **Enzyme** for component validation.
- Participated in **Agile/SCRUM** processes to align development with timelines and deliverables.

4. LMS – SaaS Application

Description:
A cloud-based Learning Management System offering modules for content management, user tracking, communication, and analytics.

Technologies Used: ReactJS, Node.js, Redux, .NET, HTML5, CSS3, Bootstrap, SASS

Responsibilities:

- Re-engineered a legacy LMS into a modern **SPA** with **ReactJS** and back-end powered by **.NET**.
- Managed global application state using **Redux** and asynchronous actions with Redux-Thunk.
- Integrated backend services via **.NET Web APIs** and handled data flow with $http.
- Focused on cross-browser compatibility and mobile responsiveness using **Media Queries** and **Bootstrap**.

5. Volunteer Management System – Govt. of Andhra Pradesh

Description:
A training and resource management platform supporting mobile and web access for over 200,000 users.

Technologies Used: ReactJS, Node.js, Redux, .NET, HTML5, CSS3, Bootstrap, SASS

Responsibilities:

- Replaced outdated LOB applications with responsive, React-based SPAs.
- Developed and integrated stateful components using **ReactJS**, **Redux**, and **Node.js**.
- Implemented external API integrations and handled real-time data updates.
- Focused on accessibility, cross-browser compatibility, and responsive design.
- Ensured code maintainability and scalability by adhering to **.NET MVC patterns** and front-end best practices.
