PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years of experience in front-end and back-end development for insurance, telecom, and marketing platforms. Proficient in React.js, Ruby on Rails, and Node.js. Expertise in building responsive UIs, optimising performance, and collaborating in Agile environments to deliver scalable solutions. Proven track record of reducing deployment times by 15% and increasing user engagement by 25%.

Work Experience

Deloitte (Contract via Rite Solutions), Hyderabad 09/2025 – Present

Full Stack Developer (Definity)

- Developed rich, interactive UIs and scalable full-stack features for Definity's insurance platform using React.js (with Hooks and Functional Components), Redux for state management, and Ruby on Rails for robust backend services and microservices, enhancing user workflows and reducing feature deployment time by 15%.
- Built and integrated RESTful APIs with frontend applications, ensuring seamless data flow and high performance across cross-functional Application Management and Delivery (AMD) and Application Management Services (AMS) stakeholders in Agile environments.
- Troubleshot production issues in real-time using debugging tools and monitoring systems, conducting root cause analysis to decrease mean time to resolution (MTTR) by 20% and minimise downtime for critical applications.

Incedo Inc, Hyderabad 02/2024 – 04/2025

Senior Software Engineer (Front End Developer / Auto-Bi and Kirke)

- Developed intuitive and responsive React.js UI screens from scratch for Auto-Bi, a data-driven AI tool for the Verizon Kirke project, a Telecom product.
- Partnered with UX/UI design teams to overhaul existing React-based applications, refreshing colour scheme and typography, leading to a 20% conversion rate increase and positive client feedback.
- Actively participated in daily Scrum calls and sprint planning sessions, ensuring alignment with project goals and timelines.
- Collaborated closely with clients to review and refine wireframes, incorporating feedback to align with business and user requirements in React implementations.
- Discussed and implemented UX designs using React components, focusing on usability and functionality improvements for a refined user experience.
- Optimised React UI design and front-end functionality based on client feedback, enhancing responsiveness and overall performance.
- Enhanced user experience through seamless AI-powered workflows in React, contributing to improved accuracy and efficiency in planning processes.
- Engineered a new user onboarding flow in React.js for the Verizon Kirke platform, achieving a 95% completion rate for new users and earning recognition as the “most impactful project” of the quarter.
- Built extensive test coverage for new React components, reducing the number of customer complaints by 10%.
- Migrated legacy UI to modern React UI with end-to-end functionality and pages using canvas components.
- Worked closely with product leadership teams to gather and clarify product requirements, ensuring React-based solutions streamlined workflows and reduced iteration time by 15%.

Seneca Global, Hyderabad 11/2020 – 02/2024

Software Engineer (Full Stack Developer / Path Factory)

- Developed and implemented high-performance React.js frontend interfaces, resulting in a 40% increase in page load speed and a 25% decrease in bounce rate. Collaborated cross-functionally with UX/UI designers and backend teams to ensure seamless user experiences.
- Built cross-browser compatible and accessibility-compliant React applications, resulting in 22% faster load time than the industry average.
- Collaborated with product management teams to clarify product requirements and deliver efficient React-based solutions, reducing iteration time by 15%.
- Implemented unit-tested backend code using Mocha-like frameworks and CI/CD practices, earning two Bravo Instant awards for 98% on-time delivery and 95%+ client satisfaction scores.

Software Engineer Intern (Full Stack Developer / Talent Acquisition Group App) (01/2020 – 03/2020)

- Collaborated with the Talent hiring team to build a React. js-based web application, reducing candidate assessment and interview processing time by 30%.
- Ensured end-to-end process of data extraction until reporting, improving efficiency by up to 25%.
- Designed and implemented user authentication in a React app, integrating Firebase Authentication to increase account security by 25%.
- Utilised React with Material UI to revamp the user interface, leading to a 20% improvement in engagement and a 15% increase in user satisfaction across devices.

EDUCATION

Keshav Memorial Institute of Technology**,** Sep. 2016 – Nov. 2020

Bachelor of Technology, Computer Science.

SKILLS

Front-End: React.js (Hooks, Functional Components, Redux) | TypeScript | HTML/CSS/CSS3 | JavaScript | JSON | Responsive UI Design | Tailwind CSS | Bootstrap | Ant Design | Canvas | RTL

Back-End: Node.js | Ruby on Rails (Controllers, Models, ActiveRecord) | RESTful APIs | SQL (MySQL) | Authentication (JWT, OAuth)

Tools & Practices: Git/GitHub/GitLab | Generative AI | Unit Testing (Jest, RSpec) | CI/CD Pipelines | Agile/Scrum | Deployment (AWS)
