KRISHNA PRAVEEN VEMURI

FRONTEND DEVELOPER-REACT & NEXT.JS

RESUME OBJECTIVE

Frontend Developer (React & Next.JS) with 10.8 years of hands-on experience in designing, developing, and implementing scalable web applications and solutions using modern front-end and back-end technologies. Experienced in leading full development cycles and collaborating with cross-functional teams to deliver high-quality digital experiences.

PROFESSIONAL EXPERIENCE

- Developed **more than 30 highly functional web applications** to analyse and process data for various clients, gaining recognition as a **Responsive Web Developer** by employer and team.
- Ensured applications' ability to **interact seamlessly with multiple APIs, microservices, and databases**.
- Worked in **Agile environment**, actively participating in sprint planning, estimation, code reviews, and cross-team collaborations.
- Collaborated closely with app development teams to **identify problems, define testing methods, and implement best practices** for frontend solutions.
- Optimized company processes, including **complaint handling**, by creating and delivering highly efficient app-based solutions.
- Developed **full-stack applications** across web and mobile platforms using **industry-standard technologies** and frameworks.
- Played a key role in the **development, enhancement, and maintenance** of web-based software products.
- Gained hands-on expertise in **React, Next.js, JavaScript (ES6+), TypeScript, Redux, jQuery, Ajax, HTML5, CSS3, SCSS, Tailwind, Bootstrap, and Foundation**, along with backend Node.js frameworks.
- Designed and implemented **responsive, accessible, and high-performance UI components** for enterprise and customer-facing applications.
- Conducted **unit, integration, and load testing** for high-profile applications, reducing system failures by **70%**.
- Implemented **state management solutions** (Redux, Context API) for scalable frontend architectures.
- Developed **interactive dashboards and data visualization tools** using Chart.js, Recharts, and D3.js.
- Improved **page load speed, performance, and SEO** for web applications, achieving faster rendering and better user engagement.
