B. Venkata Ramireddy

Email: venkataram338@gmail.com
Phone: +91 97311 29397

Profile Summary

- Having **5+** years of experience in **UI DEVELOPMENT-HTML, CSS, JavaScript, TypeScript, Bootstrap4, REACT16+, Material Ui, Tailwind CSS, Redux, RxJs, NgRx Store, Jest, NextJs, NodeJs.**
- Specialized in writing clean, semantic, accessible front-end code including HTML5, CSS3,and JavaScript for **Mobile First-Responsive Design**
- Good knowledge of cross plat form rendering issues between major browsers and platforms.
- Experience in developing responsive Web Applications.
- Have strong experience in integrating with REST API services using fetch, XML Http Request and Axios library.
- Passion for code standards, optimized and progressive enhancement.
- Experience in integration of user-facing elements developed by front-end developers with server-side logic, writing reusable, testable, efficient code and design and implementation of low-latency, high availability, and performance applications with the help of NPM.
- Experience with version controlling (GIT) for source code version management.
- Familiarity with Restful APIs, GraphQL
- Experience working in Micro Frontend architecture using React and Webpack.
- Excellent capability to explore, learn and understand newer business domains and technology.

Organizational Experience

- Working as a Senior Software Engineer @ **Frontline Login system Pvt ltd**, Mumbai from April 2023–Till Date.
- Working as a Junior Engineer @ **Insemi**, Bangalore from April 2022–March 2023.
- Working as a Associate software engineer @ **Spil Technologies**, Hyderabad from December 2019–November 2021.

Key Result Areas

- Developing software solutions by studying information needs, conferring with users, studying systems flow, data usage, and work processes.
- Understanding process requirements, providing use cases for business, functional & technical requirements
- Managing delivery frameworks & new technology implementation projects for streamlining related activities as per quality standards.
- Participating in requirements gathering for enhancements and creation of high-level & detailed-level design documents.
- Advancing solutions for given technical specifications, installing application software and deploying customizations, contributing to code reviews.
- Liaising with stake holders during problem solving, requirements gathering, detailed level design, development, system test and production implementation to ensure that optimal resolutions are achieved.

IT Skills

Technologies : JavaScript, TypeScript, React16+, HTML5, CSS2/3, Bootstrap, TailwindCSS, Nextjs, Redux NodeJs, ExpressJs, Restful APIs, GraphQl, Material UI, Webpack, MongoDB, Aws(Basics)
Unit Testing : Jest, Karma & Jasmine.
Editing Tools : Vscode, Notepad, Eclipse, Sublime
Text Design Patterns : Singleton, Constructor, Prototype
Operating System : Mac, Windows.
Version Controlling : Git, BitBucket.

Academic Details

2018: B.Tech from JNTU, Anantapur. (2014-2018)

PROJECTS UNDERTAKEN

Title : **LILTriangle**
Tools Used : **HTML5, CSS3, React18, TypeScript, JavaScript, TailwindCSS, Redux, Jest**

Project Description: This is a pre-school management application available as both a web and mobile app. It is designed for seamless teacher-parent communication and includes a wide range of features such as franchise management, staff and student management, fee management, inquiry and admissions, classroom management, messaging, CCTV integration, transport management, daycare management, and expense tracking. Additionally, we provide a complete digital marketing and website management solution for preschools.

Roles& Responsibilities:

- Developing a complete Front-End Application.
- Gathering Requirement Analysis, Design, Implementation and Testing. Worked heavily with React Hooks for sharing state across multiple components.
- React.JS for faster rendering and developing reusable components.
- Helping Back-end developers (Node) to integrate the code and fixing the issues.
- Ensuring high Performance at mobile and desktop.
- Developed pixel perfect pages that meet design requirements.
- Making web pages cross-browser compatible.
- JIRA for quality control activities like defect tracking and fixing.

Title : **DSD(DataSyncDirect)**
Tools Used : **HTML5, CSS3, JavaScript, Bootstrap, React, Jest**

Project Description: The **Data Sync Services** project is designed to provide seamless, real-time, and scheduled synchronization between multiple data sources, ensuring data consistency, integrity, and availability across systems. This service facilitates secure and efficient data exchange between databases, APIs, cloud storage, and on-premises systems.

Roles& Responsibilities:

- Developing a complete Front-End Application.
- Gathering Requirement Analysis, Design, Implementation and Testing. Worked heavily with React Hooks for sharing state across multiple components.
- React.JS for faster rendering and developing reusable components.
- Helping Back-end developers (Node) to integrate the code fixing the issues.
- Ensuring high Performance at mobile and desktop.
- Developed pixel perfect pages that meet design requirements.
- Making web pages cross-browser compatible.
- JIRA for quality control activities like defect tracking and fixing.

Title : **AFTERMARKETSALESKITPORTAL**
Tools Used : **HTML5,CSS3,Sass,Bootstrap,JavaScript,ReactJs,Redux,Redux-thunk,MaterialUI,Typescript,redux-toolkit. Next.js**

Project Description: **Market Sales Kit portal** is a web based application where users can find the kits for engines after they buy machines. Users can search based on keywords like sales model, histogram, engine model etc. The UI interface is responsive and when user searches each kit will appearing a card based on search results. The search functionality implemented across all the records.

Roles& Responsibilities:

- Developing a complete Front-End Application.
- Gathering Requirement Analysis, Design, Implementation and Testing. Worked heavily with React Hooks for sharing state across multiple components.
- React.JS for faster rendering and developing reusable components.
- Helping Back-end developers (Node) to integrate the code fixing the issues.
- Ensuring high Performance at mobile and desktop.
- Developed pixel perfect pages that meet design requirements.
- Making web pages cross-browser compatible.
