SOFTWARE DEVELOPER

Shibin Raja

EXPERIENCE

REACT JS DEVELOPER — OCT 2020 - APR 2021
CRAFTVEDA TECHNOLOGY. KOLKATA.

- Maximized application efficiency, operability, and flexibility.
- Leveraged diverse ideas from distributed sources to address complex challenges.
- Collaboratively developed application integrations with REST APIs for third-party payment SDK and other services.

FULL STACK DEVELOPER — APR 2021 - NOV 2021
EMBETECH SOLUTION. CHENNAI.

- Designed and integrated front-end module operations utilizing Material UI and Apollo GraphQL.
- Implemented AWS Cognito for enhanced project security.
- Developed endpoints using GraphQL and Serverless Stack.

FULL STACK DEVELOPER — NOV 2021 - MAY 2024
NEOITO TECHNOLOGY. TRIVANDRUM.

- Successfully translated client requirements into comprehensive application designs and system specifications.
- Demonstrated strong multitasking abilities and collaborated effectively with both internal and external teams.
- Contributed to the development of strategic initiatives for designing, coding, and testing solutions.
- Enhanced website performance and user experience by implementing responsive design and ensuring cross-browser compatibility.

SENIOR SOFTWARE ENGINEER — JUL 2024 - DEC 2024
KYYBA TECHNOLOGIES. CHENNAI.

- Enhanced project management capabilities by developing individual plugins for auto-scheduling, critical path analysis, start and end date management, and resource histogram visualization.
- Improved application efficiency and flexibility by integrating DHTMLX Suite with other libraries and frameworks.
- Addressed complex challenges by leveraging diverse ideas and implementing innovative solutions within the DHTMLX Gantt functionalities.

EDUCATION

B.E MECHANICAL ENGINEERING — 2013 - 2017
S. A ENGINEERING COLLEGE. CHENNAI.

HSLC — 2011 - 2013
BHARATH MONTESSORI. TENKASI.

SSLC — 2010 - 2011
VELAMMAL. CHENNAI.

PROJECTS

1. Comunify :
Online Community Management software that helps community managers better understand their community and deliver relevant reporting. Involved in developing the application from scratch.

2. Permit Flow :
Intuitive workflow software that helps general contractors and developers identify the optimal permitting process and needed application forms for a particular project, and then easily fill the relevant paperwork to prepare a robust application package. I created the front-end application system to make a schematic workflow and node js was used as the backend system to create API / Graphql Query.

3. MindCan:
MindCan is a reusable Gantt component using DHTMLX Gantt and Stencil, with React and Angular wrappers to ensure seamless integration into applications built with these frameworks.

4. CareNow :
CareNowDoc is a fully integrated platform for seamless doctor-patient consultations, offering features to upload prescriptions, book appointments, and consult with doctors easily. Involved in the front-end development of the application

PASSION

1. Sports 2.Reading Blogs 3. Novels 4. Space Science 5.Chess
